Two numbers occur after words in the index: the first refers to the page where the word is illustrated and the second to the item number of the word on that page. For example, above [ə bʊv] 102 2 means that the word *above* is the item numbered 2 on page 102. If only a bold number appears, then that word is part of the unit title or a subtitle.

The index includes a pronunciation guide for all the words illustrated in the book. This guide uses symbols commonly found in dictionaries for native speakers. These symbols, unlike those used in transcription systems such as the International Phonetic Alphabet, tend to preserve spelling and so should help you to become more aware of the connections between written English and spoken English.

Consonants

[b] as in back [bæk]	[k] as in kite [kaɪ]	[ʃ] as in shell [ʃel]

	or for [fōr]	[ə] as in above [ə bʊv]

All pronunciation symbols used are alphabetical except for the schwa [ə], which is the most frequent vowel sound in English. If you use it appropriately in unstressed syllables, your pronunciation will sound more natural.

You should note that an umlaut (¨) calls attention to the special quality of vowels before [r]. (The sound [ö] can also represent a vowel not followed by [r] as in *claw*.) You should listen carefully to native speakers to discover how these vowels actually sound.

Stress

This guide also follows the system for marking stress used in many dictionaries for native speakers.

- (1) Stress is not marked if a word consisting of a single syllable occurs in isolation.
- (2) Where stress is marked, two levels are distinguished:
 - a bold accent [/] is placed after each syllable with primary stress,
 - a light accent [/] is placed after each syllable with secondary stress.

Syllable Boundaries

Syllable boundaries are indicated by a single space.

NOTE: The pronunciation used in this index is based on patterns of American English. There has been no attempt to represent all of the varieties of American English. Students should listen to native speakers to hear how the language actually sounds in a particular region.
