

# Basic English Usage

Michael Swan

Oxford

## 123 explain

After *explain*, we use *to* before an indirect object.

*I explained my problem **to her**. (NOT ~~I explained her my problem.~~)*

*Can you explain **(to me)** how to get to your house?*

*(NOT ~~Can you explain me ... ?~~)*

## 124 fairly, quite, rather and pretty

- 1 *Fairly* modifies adjectives and adverbs. It is not very strong: if you say that somebody is 'fairly nice' or 'fairly clever', she will not be very pleased.

*'How was the film?' **Fairly** good. Not the best one I've seen this year.'*

*I speak Greek **fairly** well — enough for most everyday purposes.*

- 2 *Quite* is a little stronger than *fairly*.

*'How was the film?' **Quite** good. You ought to go.'*

*He's been in Greece for two years, so he speaks Greek **quite** well.*

*Quite* can modify verbs.

*It was a good party. I **quite enjoyed** myself.*

- 3 *Rather* is stronger than *quite*. It can mean 'more than is usual', 'more than was expected' or 'more than is wanted'.

*'How was the film?' **Rather** good — I was surprised.'*

*Maurice speaks Greek **rather** well. People often think he's Greek.*

*I think I'll put the heating on. It's **rather** cold.*

*Rather* can modify verbs.

*I **rather** like gardening.*

- 4 *Pretty* is similar to *rather*. It is only used in informal English.

*'How are you feeling?' **Pretty** tired. I'm going to bed.'*

- 5 Note:

a The exact meaning of these words may depend on the intonation used.

b *Quite* is not used very much in this way in American English.

c We put *quite* and *rather* before *a/an*.

*It was **quite a** nice day. I'm reading **rather an** interesting book.*

d For other meanings of *quite*, see 274. For other meanings of *rather*, see 370.

## 125 far and a long way

*Far* is most common in questions and negative sentences, and after *too* and *so*.

**How far** did you walk?

I **don't** live **far** from here.

You've gone **too far**.

'Any problems?' 'Not **so far**.' (= Not up to now.)

In affirmative sentences, we usually use *a long way*.

We walked **a long way**. (We walked **far** is possible, but not usual.)

She lives **a long way** from here.

*Much*, *many* and *long* (for time) are also more common in questions and negative sentences. (See 205 and 194.)

## 126 farther and further

- 1 We use both *farther* and *further* to talk about distance. There is no difference of meaning.

Edinburgh is **farther/further** away than York.

(Only *farther* is used in this sense in American English.)

- 2 We can use *further* (but not *farther*) to mean 'extra', 'more advanced', 'additional'.

For **further** information, see page 277.

College of **Further** Education.

## 127 fast

*Fast* can be an adjective or an adverb.

I've got a **fast** car. (adjective)    It goes **fast**. (adverb)

## 128 feel

*Feel* has several meanings.

- 1 'to touch something'

**Feel** the car seat. It's wet.

Progressive tenses are possible.

'What are you doing?' 'I'm **feeling** the shirts to see if they are dry.'

- 2 'to receive physical sensations'

I suddenly **felt** something on my leg.

We do not use progressive tenses, but we often use *can feel* to talk about a present sensation.

*I **can feel** something biting me!*

### 3 'to think, have an opinion'

Progressive tenses are not used.

*I **feel** that you're making a mistake. (NOT ~~I'm feeling~~ ...)*

### 4 Copula verb (see 91), used with adjectives

*Your hands **feel** cold on my skin. I **feel** fine. Do you **feel** happy?*

Progressive forms can be used to talk about one's 'inside' feelings.

*I'm **feeling** fine. How **are** you **feeling**?*

## 29 (a) few and (a) little

- 1 We use *few* with plural nouns, and *little* with singular (uncountable) nouns. Compare:

***Few** politicians are really honest. I have **little** interest in politics.*

- 2 There is a difference between *a few* and *few*, and between *a little* and *little*. *Few* and *little* are rather negative: they mean 'not much/many'. *A few* and *a little* are more positive: their meaning is more like 'some'. Compare:

*His ideas are very difficult, and **few** people understand them.  
(= not many people; hardly any people)*

*His ideas are very difficult, but **a few** people understand them.  
(= some people — better than nothing)*

*Cactuses need **little** water. Give the roses **a little** water every day.*

- 3 *Few* and *little* (without *a*) are rather formal. In conversation, we prefer *not many*, *not much*, *only a few* or *only a little*.

***Only a few** people speak a foreign language perfectly.*

*Come on! We haven't got **much** time!*

## 30 fewer and less

*Fewer* is the comparative of *few* (used before plural nouns).

*Less* is the comparative of *little* (used before uncountable nouns, which are singular).

***few** problems **fewer** problems **little** money **less** money*

*I've got **fewer** problems than I used to have.*

*I earn **less** money than a postman.*

In informal English, some people use *less* with plural words.

*I've got **less** problems than I used to have.*

### 131 for: purpose

- 1 We use *for* before a noun to talk about a purpose, or reason for doing something.

*We went to the pub **for a drink**. I went to London **for an interview**.*

We do not use *for* before a verb to talk about purpose.

*I went to the pub **to have** a drink. (NOT . . . ~~for (to) have~~ a drink.)*

*I went to London **to see** about a job.*

- 2 We can use *for* . . . -ing to talk about the purpose of a thing — the reason why we use it.

*We use an altimeter **for measuring** height.*

*'What's that stuff **for**?' 'Cleaning leather.'*

### 132 for + object + infinitive

- 1 We use this structure after certain adjectives. Some common examples are: *usual, unusual, common, normal, rare, important, essential, necessary, unnecessary, anxious, delighted*.

adjective + *for* + object + *to*-infinitive

*Is it usual **for John to be** so late?*

*It's unusual **for the weather to be** bad in July.*

*It's important **for the meeting to start** at eight.*

*It's unnecessary **for all of us to go** — one will be enough.*

*I'm anxious **for Peter to go** to a good school. (= I want him to go . . .)*

*I'd be delighted **for you to come** and stay with us.*

We could often use a *that*-clause instead (for example: *It's important **that the meeting should start** at eight*). A *that*-clause is usually more formal.

- 2 We use a *for*-structure after *too* (see 348.1) and *enough* (see 113.3).

*It's **too heavy for you to lift**.*

*It's warm **enough for the snow to melt**.*

- 3 We can use the same structure after some nouns. Examples: *idea, time*.

*His **idea is for us to travel** in separate cars.*

*It's **time for everybody to go** to bed.*

- 4 Common verbs that are followed by *for* + object + infinitive: *ask, hope, arrange, pay, wait, take* (time).

*She asked **for the car to be** ready by five o'clock.*

*I was hoping **for somebody to come** and help me.*

*Can you arrange **for the car to be** ready this evening?*

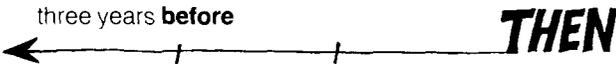

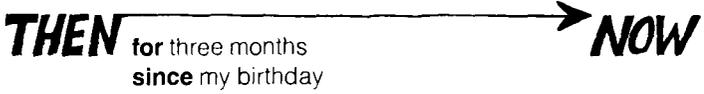

*He paid **for her to see** the best doctors.*

*I'm waiting **for it to get** dark.*

*It takes five days **for a letter to go** from London to New York.*

## 133 for, since, from, ago and before

- 1 *For, since and from* 'point forwards' in time.  
*Ago and before* 'point backwards' in time.

For details of the use of *ago* and *before*, see 20.4.

- 2 We use *for* to say how long something lasts.

**for + period of time**

*I once studied the guitar **for three years**.*  
*That house has been empty **for six weeks**.*  
*We go away **for three weeks** every summer.*  
*My boss will be in Italy **for the next ten days**.*

When we talk about a period of time up to the present, we use *for* with the present perfect tense (*have* + past participle).

**I've known her** for a long time. (NOT ~~+know her~~ . . .)

A present progressive with *for* often refers to the future.

How long **are you staying** for? (= *Until when* . . .)

We can leave out *for* with *How long* . . . ?

How long are you staying?

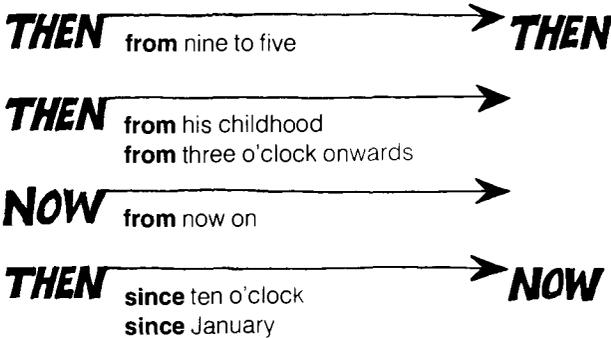

How long have you been waiting?

- 3 *From* and *since* give the starting point of an action or state: they say when something begins or began.

**from/since + starting point**

*I'll be here **from three o'clock** onwards.*  
*I work **from nine** to five.*  
**From now on**, I'm going to go running every day.  
**From his earliest childhood** he loved music.  
*I've been waiting **since ten o'clock**.*  
*I've known her **since January**.*

*Since* gives the starting point of actions and states that continue up to the present; *from* gives the starting point of other actions and states.

- 4 *For* and *since* can both be used with the present perfect (*have* + past participle). They are not the same.

*for* + period

*since* + starting point

*I've known her for three days.*

*I've known her since Tuesday.*

*I've been here for a month.*

*I've been here since July.*

*I've had my car for ages.*

*I've had my car since 1980.*

## 134 future: introduction

There are several ways to talk about the future in English.

### 1 Present tenses

When we talk about future events which are already decided *now*, or which we can see *now* 'are on the way', we often use present tenses.

There are two possibilities: the present progressive *I am ... -ing*,

and a structure with the present progressive of *go* *I am going to ...*

*I'm seeing John tomorrow. She's going to have a baby.*

For more details, see 135.

We can sometimes use the simple present to talk about the future, but only in certain cases. See 138.

### 2 shall/will

When we are predicting future events which are *not* already decided or obviously 'on the way', we usually use *shall/will* + infinitive

*Nobody will ever know what happened to her.*

*I think Liverpool will win.*

For more details, see 136.

- 3 We can also use shall or will + infinitive to express 'interpersonal' meanings: when we are offering, making requests, promising or threatening.

**Shall** I open the window?

I **WILL** stop smoking!

**Will** you give me a hand for a moment?

**You'll** be sorry!

For more details, see 137.

#### 4 Other ways of talking about the future

future perfect (see 139)

By next Christmas **we'll have been here** for eight years.

future progressive (see 140)

This time tomorrow **I'll be lying** on the beach.

about to (see 2)

I think the plane's **about to** take off.

be to (see 58)

The President **is to** visit Beijing.

## 135 future: present progressive and going to

We use these two present tenses to talk about future actions and events which are already decided *now*: they are planned, or they are starting to happen: we can see them coming.

### 1 Present progressive

We often say that something *is happening* in the future. We talk like this about actions that are already planned; we often give the time or date.

What **are you doing** this evening?

**We're going** to Mexico next summer.

**I'm having** dinner with Larry on Saturday.

## 2 going to

We can also say that something is *going to happen* in the future.

- a We can use *going to* in the same way as the present progressive: to talk about plans and arrangements.

***I'm going to get a new car soon.***

***John's going to call in this evening.***

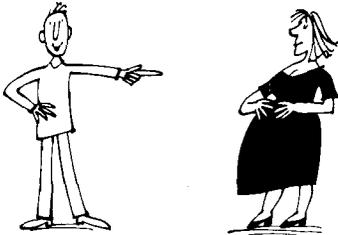

***When are you going to get your hair cut?***

- b We can also use *going to* to say that a future action or event is 'on the way' — we can see it coming; it is starting to happen.

***She's going to have a baby. It's going to rain.***

***He's going to fall!***

### Present

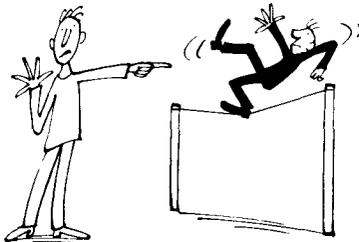

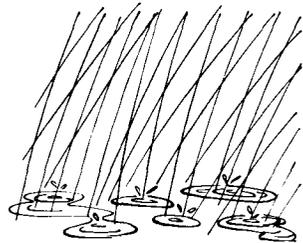

***She's going to have a baby.***

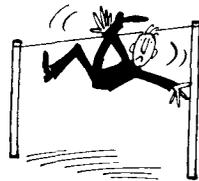

### Future

***It's going to rain.***

***He's going to fall!***

- ▷ For a comparison between the present forms and *shall/will*, see 136.3.

## 136 future: **shall/will** (predictions)

### 1 Forms

I shall/will you will he/she/it will we shall/will they will	} + infinitive without to
questions: <i>shall/will I; will you; will he/she/it</i> , etc negatives: <i>I will/shall not; you will not</i> , etc contractions: <i>I'll, you'll, he'll</i> etc; <i>shan't, won't</i> .	

In modern English, *I shall* and *I will*, *we shall* and *we will* are used with the same meaning to talk about the future. We prefer *I will* in promises and threats, and *shall I* in offers: see 137.

### 2 Meaning

We say that things *will happen* when they are not already planned or obviously on the way.

*Who do you think **will win** on Saturday?*

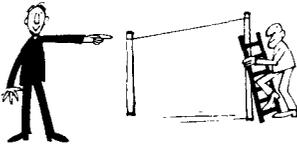

*Tomorrow **will be** warm, with some cloud in the afternoon.*

*One day **I shall/I will/I'll** be rich.*

### 3 Present tenses and **shall/will**: a comparison

When I say that something *is happening*, or *is going to happen* in the future, I probably have *outside evidence* for what I say — for example I can show you a page in a diary, black clouds in the sky, a person who is going to fall.

When I say that something *will happen*, I do not have outside evidence to show you. I am telling you what I know, or believe, or have calculated, and I am asking you to *believe what I say*. Compare:

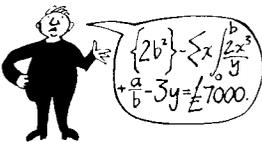

*He's not very good.*

**He'll** fall.

**He's going to** fall.

*I reckon **it'll** cost about £7,000 to repair the roof.*

*The builder's just sent his estimate.*

**It's going to** cost £9,000 to repair the roof.

## 137 future: shall and will (interpersonal uses)

We can use *shall* and *will* to express our intentions and attitudes towards other people.

### 1 Decisions

We use *will* at the moment of making a decision.

*'The phone's ringing.'* **I'll answer it.** (NOT ~~*I'm going to answer it.*~~)  
*'I'm going out for a drink.'* **Wait a moment and I'll come with you.**  
 (NOT . . . ~~*I come with you.*~~)

We use *shall* to ask what decision we should make.

What **shall** I do? **Shall** we tell her?

### 2 Threats and promises

**I'll hit you** if you do that again.  
*I promise I **won't** smoke again.* (NOT ~~*I promise I don't . . .*~~)  
**I'll give you a teddy bear** for your birthday.  
**I'll phone you** tonight. (NOT ~~*I phone you . . .*~~)

### 3 Offers and requests

We use *Shall I . . . ?* when we offer to do things.

**Shall I** carry your bag?

We can use *Will you . . . ?* to ask people to do things.

**Will you** get me a newspaper when you're out?

## 138 future: simple present

- 1 We can sometimes use the simple present to talk about the future. This is common when we are talking about events which are on a timetable, or something similar.

What time **does the train arrive** at Paddington?  
 When **is** the next bus for Warwick?  
**Are you** on duty next weekend?  
 The summer term **starts** on April 10th.

- 2 The simple present is often used with a future meaning after conjunctions. For details, see 343.

*I'll phone you when I **arrive**.*

- 3 In other cases, we usually use a different tense to talk about the future.

**I'm seeing** John tomorrow. (NOT ~~*I see John tomorrow.*~~)  
**I'll phone** you this evening. (NOT ~~*I phone you this evening.*~~)

▷ For more information about the simple present, see 261.

## 139 future perfect

*shall/will have + past participle*

We use the future perfect to say that something will have been completed by a certain time in the future.

*I'll **have been here** for seven years next Friday.*

*The painters say **they'll have finished** the downstairs rooms by Tuesday.*

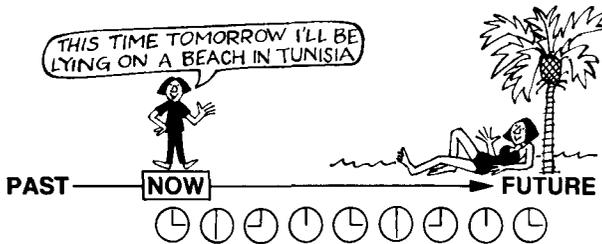

A progressive form is possible.

*I'll **have been teaching** for twenty years this summer.*

## 140 future progressive

*shall/will + be + ... -ing*

We can use the future progressive to say that something will be going on at a particular moment in the future.

## 141 gender (masculine and feminine language)

English does not have many problems of grammatical gender: people are *he* or *she* and things are *it*.

Note the following points:

### 1 Animals, cars and countries

People sometimes call animals *he* or *she*, especially pet animals like cats, dogs and horses.

*Go and find the cat and put **him** out.*

Some people use *she* for cars, motorbikes etc; sailors often use *she* for boats and ships.

*'How's your new car?' 'Terrific. **She's** running beautifully.'*

We can use *she* for countries, but *it* is more common.

*He loves Spain — **its** culture, **its** history and **its** civilization.*

(OR ... **her** culture, **her** history ...)

## 2 **he or she**

We can use *he or she*; *him or her*; *his or her* to refer to people like a student or a politician (who can be men or women).

*If a student is ill, **he or she** must send **his or her** medical certificate to the College Office.*

This is heavy, and most people use *he/him/his* instead of *he or she* etc.

*A politician has to do what **his** party tells **him**.*

After *anybody*, *somebody*, *nobody* and some other expressions (see 307), we often use *they/them/their* (with a singular meaning) instead of *he or she* etc.

*If anybody phones, tell **them** I'm out.*

## 3 **actor and actress etc**

Some jobs and positions have different words for men and women.

<b>Man</b>	<b>Woman</b>	<b>Man</b>	<b>Woman</b>	<b>Man</b>	<b>Woman</b>
actor	actress	host	hostess	steward	stewardess
duke	duchess	monk	nun	waiter	waitress
bridegroom	bride	prince	princess	widower	widow

Some words ending in *-man* have a feminine form (for example *policeman/policewoman*).

Others do not: for example, the *chairman* of a committee can be a man or a woman. Many people prefer to use words ending in *-person* for these cases (for example *chairperson*, *spokesperson*).

# 142 **get + noun, adjective, adverb particle or preposition**

*Get* is a very common word in spoken English. It is usually informal, and structures with *get* are not so common in writing.

*Get* has different meanings — it depends what kind of word comes after it.

## 1 **get + noun/pronoun**

Before a noun or pronoun, *get* usually means 'receive', 'fetch', 'obtain' or something similar.

*I **got a letter** from Lucy this morning.*

*Can you come and **get me** from the station when I arrive?*

*I'm going out to **get some bread**.*

For the structure *I have got*, see 153.

## 2 **get + adjective**

Before an adjective, *get* usually means 'become'.

*As you **get old** your memory **gets worse**. My feet are **getting cold**.*

We can use get + object + adjective (= 'make something become ...').

*I can't **get my hands warm**.*

*We must **get the house clean** before Mother arrives.*

For *go + adjective* (*go green, go blind* etc), see 146.

### 3 **get + adverb particle or preposition**

Before an adverb particle (like *up, away, out*) or a preposition, **get** nearly always refers to a movement.

*I often **get up** at five o'clock.*

*I went to see him, but he told me to **get out**.*

*Would you mind **getting off** my foot?*

We can use the structure with an object, to talk about making somebody/ something move.

*You can't **get her out of** the bathroom in the morning.*

*Would you mind **getting your papers off** my desk?*

*Have you ever tried to **get toothpaste back into** the tube?*

▷ For structures with get (+ object) + verb, see 143.

## 143 **get (+ object) + verb-form**

- 1 After **get**, we can use an object with an infinitive or *-ing* form.

get + object + infinitive

*I can't **get the car to start**.*

get + object + *-ing* form

*Don't **get him talking** about his illnesses, please.*

We often use the structure with the infinitive to talk about persuading somebody to do something.

***Get John to help us**, if you can. I can't **get that child to go** to bed.*

- 2 We can use get + object + past participle with a passive meaning, to talk about arranging for jobs to be done.

*I must **get my hair cut**.*

*You ought to **get your watch repaired**.*

- 3 We can use **get** instead of **be** to make passive structures. We often do this when we are talking about things that happen by accident or unexpectedly.

*My watch **got broken** while I was playing with the children.*

*He **got caught** by the police driving at 160km an hour.*

▷ For similar structures with *have*, see 155.

## 144 get and go: movement

*Get* is used for the end of a movement — the arrival.

*Go* is used for the whole movement. Compare:

*I go to work by car and Lucy goes by train. I usually **get** there first.*

*I **went** to Bristol yesterday. I **got** to Bristol at about eight o'clock.*

We often use *get* when there is some difficulty in arriving.

*It wasn't easy to **get** through the crowd.*

*I don't know how we're going to **get** over the river.*

*Can you tell me how to **get** to the police station?*

## 145 go: been and gone

- 1 If somebody has *gone* to a place, he or she is there now, or on the way.  
*'Is Lucy here?' 'No, she's **gone** to London.'*

If somebody has *been* to a place, he or she has travelled there and come back.

*I've **been** to London six times this week.*

***Have** you ever **been** to Northern Ireland?*

*Been* is also used to mean 'come (and gone away again)'.  
*She's **been** to see us twice since Christmas.*

- 2 We can use *be* with *gone* to say that something has disappeared, or that there is no more.  
*Is the butter all **gone**? When I came back my car **was gone**.*

## 146 go meaning 'become'

We use *go* to mean 'become' before *some adjectives*.

- 1 This happens with colour words.  
*Leaves **go** brown in autumn.*  
*People **go** red, pale or white with anger; blue with cold; green with seasickness.*  
*If you faint, everything **goes** black.*

In a formal style, we use *turn* instead of *go* in these cases.

- 2 We use *go* with some other adjectives to talk about things changing for the worse. Some common expressions:  
*People **go** mad, crazy, deaf, blind, grey, bald.*  
*Machines **go** wrong, iron **goes** rusty, meat **goes** bad, milk **goes** sour, bread **goes** stale.*

## 147 go . . . -ing

We often use the structure *go . . . -ing*, especially to talk about sports and free-time activities.

Let's **go climbing** next weekend.

Did you **go dancing** last Saturday?

Common expressions:

<i>go climbing</i>	<i>go dancing</i>	<i>go fishing</i>
<i>go hunting</i>	<i>go riding</i>	<i>go sailing</i>
<i>go shooting</i>	<i>go shopping</i>	<i>go skiing</i>
<i>go swimming</i>	<i>go walking</i>	

## 148 had better

- 1 We use *had better* to give advice, or to tell people **what** to do. The meaning is present or future, not past, but we always use *had*, not *have*. After *had better*, we use the infinitive without *to*.

It's late — **you'd better hurry** up.

(NOT . . . ~~you have better~~ . . .)

(NOT . . . ~~you had better hurrying to hurry~~ up.)

We make the negative with *better not* + infinitive.

You'd **better not** wake me up when you come in.

(NOT ~~You hadn't better~~ wake me . . .)

We can 'tell ourselves what to do' by using *I'd better*.

It's seven o'clock. **I'd better** put the meat in the oven.

- 2 We do not use *had better* in polite requests.

Could you help me, if you've got time?

(NOT ~~You'd better~~ help me. This would sound like an order.)

## 149 half (of)

- 1 We can use *half* or *half of* before a noun.

**Half (of)** my friends live abroad.

She spends **half (of)** her time travelling.

*Of* is not used in expressions of measurement and quantity.

I live **half a mile** from here. (NOT . . . ~~half of a mile~~ . . .)

How much is **half a bottle** of whisky?

(NOT . . . ~~half of a bottle~~ . . .)

We use *half of* before pronouns.

'Did you like the books?' 'I've only read **half of them**.'

**Half of us** are free on Tuesdays, and the other half on Thursdays.

- 2 We only use *the* with *half* if we are saying which half we mean. Compare:  
*I've bought some chocolate. You can have **half**.*  
 (NOT ... ~~**the** half.~~)  
*You can have **the big half**.*
- 3 *One and a half* is plural.  
*I've been waiting for **one and a half hours**.* (NOT ... ~~**hour**.~~)

## 150 hard and hardly

- 1 *Hard* can be an adjective or an adverb.  
*It's a **hard** job.* (adjective)  
*This is very **hard** bread.* (adjective)  
*You have to work **hard**.* (adverb)  
 (NOT ~~*You have to work **hardly**.*~~)  
*Hit it **hard**.* (adverb)
- 2 *Hardly* is an adverb. It means 'almost no' or 'almost not'.  
*He **hardly** works at all.* (= He does very little work.)  
*I've got **hardly** any money.*  
*He knows **hardly** anything about geography.*

Note that *hardly*, *hardly any*, *hardly ever* etc are much more common than *almost not*, *almost no*, *almost never* etc.

He works **hard**.

He **hardly** works at all.

## 151 have: introduction

We can use *have* in several different ways.

- a auxiliary verb

**Have** you heard about Peter and Corinne?

- b to talk about possession, relationships, and other states:

*I've got a new car.*

*Have you got any brothers or sisters?*

*Do you often have headaches?*

- c to talk about actions:

*I'm going to have a bath.*

*We're having a party next weekend.*

- d to talk about obligation (like *must*):

*I had to work last Saturday.*

- e to talk about causing things to happen:

*He soon had everybody laughing.*

*I must have my shoes repaired.*

The grammar is not the same for all of these different meanings of *have*.  
For details, see the next five sections.

- ▷ For contractions (*I've*, *haven't* etc), see 90.

For 'weak forms' (*/əv/* etc), see 358.

For had better + infinitive, see 148.

## 152 have: auxiliary verb

have + past participle

- 1 We use *have* as an auxiliary verb to make 'perfect' verb forms.

*Have you heard about Peter and Corinne?*

(present perfect: see 243; 244)

*I realized that I had met him before.*

(past perfect: see 245)

*We'll have been living here for two years next Sunday.*

(future perfect: see 139)

*I would have told you, but I didn't see you.*

(perfect conditional: see 88)

*I'd like to have lived in the eighteenth century.*

(perfect infinitive: see 175)

*You should have written to me.*

(modal auxiliary with perfect infinitive: see 202.3)

*Having been there before, he knew what to expect.*

(perfect participle)

- 2 Like all auxiliary verbs, *have* makes questions and negatives without *do*.

*Have you heard the news?* (NOT ~~*Do you have heard*~~ . . . ?)

*I haven't seen them.* (NOT ~~*+don't have seen them*~~.)

## 153 have (got): possession, relationships etc

- 1 We can use *have* to talk about possession, relationships, illnesses, and the characteristics of people and things (for example in descriptions). We can use *do* in questions and negatives.

*They hardly **have** enough money to live on.*

**Do you have** any brothers or sisters?

*The Prime Minister **had** a bad cold.*

*My grandmother **didn't have** a very nice character.*

- 2 In British English, we often use the structure *I have got* to talk about possession, relationships etc. *I have got* means exactly the same as *I have* — it is a present tense, not a present perfect. Questions and negatives are made without *do*.

*They've hardly **got** enough money to live on.*

**Have you got** any brothers or sisters? **I haven't got** much hair.

*Got*-forms are used mostly in the present: *I had got* is unusual. They are informal: we use them very often in conversation, but less often in, for example, serious writing.

We do not use *got*-forms to talk about repetition or habit. Compare:

*I've got* toothache.

*I often have* toothache. (NOT ~~*I've often got* toothache.~~)

*We haven't got* any beer today, I'm afraid.

*We don't often have* beer in the house.

- 3 Note that we do not use progressive forms of *have* for these meanings.

*I have* a headache. OR *I've got* a headache.

(NOT ~~*I'm having* a headache.~~)

## 154 have: actions

We often use *have* + object to talk about actions. (For example: *have a drink*; *have a rest*.) In these expressions, *have* can mean 'eat', 'drink', 'take', 'do', 'enjoy', 'experience' or other things — it depends on the noun. Common expressions:

*have breakfast/lunch/tea/dinner/a meal/a drink/coffee/a beer/a glass of wine*

*have a bath/a wash/a shave/a shower/a rest/a lie-down/a sleep/a dream*

*have a holiday/a day off/a good time/a nice evening/a bad day*

*have a talk/a chat/a conversation/a disagreement/a row/a quarrel/a fight/a word with somebody*

*have a swim/a walk/a ride/a game of tennis, football etc*

*have a try/a go*

have a baby (= 'give birth')

have difficulty in ... -ing    have trouble ... -ing

have a nervous breakdown

In these structures, we make questions and negatives with *do*. *Got* is not used. Progressive forms are possible. Contractions of *have* are not used.

**Did you have** a good holiday?

'What are you doing?' **I'm having** a bath.'

I **have** lunch at 12.30 most days. (NOT ~~I've~~ lunch ...)

## 155 have + object + verb form

- 1 We often use the structure have + object + verb form

It's nice to **have people smile** at you in the street.

We'll soon **have your car going**.

We use I won't have + object + verb form to say that we refuse to allow or accept something.

**I won't have you telling** me what to do.

**I won't have people talk** to me like that.

- 2 We use have + object + past participle with a passive meaning, to talk about jobs which are done for us by other people.

I must **have my shoes repaired**.

Lucy **had her eyes tested** yesterday, and she needs glasses.

▷ For similar structures with *got*, see 143.

## 156 have (got) to

We use have (got) + infinitive to talk about obligation.

The meaning is similar to *must*.

Sorry, **I've got to go** now.

**Do you often have to travel** on business?

The forms with *got* are common in an informal style in present-tense verb forms. (See 153.2.) Compare:

**I've got to go** to London tomorrow.

**I had to go** to London yesterday. (NOT ~~I had got to~~ ...)

We do not use *got*-forms to talk about habits or repeated obligations. Compare:

**I've got to write** a financial report tomorrow.

**I have to write** financial reports at the end of every month.

▷ For the difference between *have (got) to* and *must*, and between *haven't got to*, *don't have to*, *mustn't* and *needn't*, see 209.

## 157 hear and listen (to)

- 1 *Hear* is the ordinary word to say that something 'comes to our ears'.

*Suddenly I **heard** a strange noise.*

*Can you **hear** me?*

*Did you **hear** the Queen's speech yesterday?*

*Hear* is not used in progressive tenses (see 225). When we want to say that we hear something at the moment of speaking, we often use *can hear*. (See 81.)

*I **can hear** somebody coming. (NOT ~~am hearing~~ . . . )*

- 2 We use *listen (to)* to talk about concentrating, paying attention, trying to hear as well as possible. Compare:

*I **heard** them talking in the next room, but I didn't really **listen to** what they were saying.*

*'**Listen** carefully, please.' 'Could you speak a bit louder? I can't **hear** you very well.'*

We use *listen* when there is no object, and *listen to* before an object.

Compare:

*Listen!* (NOT ~~Listen to!~~)

*Listen **to** me!* (NOT ~~Listen me!~~)

- ▷ The difference between *hear* and *listen (to)* is similar to the difference between *see* and *look (at)*. See 196.

For hear + infinitive or -ing form see 182.6.

## 158 help

We can use object + infinitive after *help*.

*Can you **help me to find** my ring?*

In an informal style, we often use the infinitive without *to*.

*Can you **help me find** my ring?*

***Help me get** him to bed.*

We can also use help + infinitive without an object.

*Would you like to **help peel** the potatoes?*

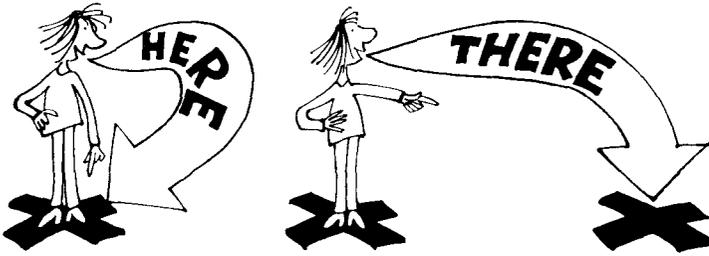

## 159 here and there

We use *here* for the place where the speaker is, and *there* for other places.

(on the telephone) *'Hello, is Tom **there**?' 'No, I'm sorry, he's not **here**.'*

(NOT . . . ~~he's not **there**.~~)

Don't stay **there** in the corner by yourself. Come over **here** and talk to us.

## 160 holiday and holidays

We use the singular *holiday* for a short period of, say, one or two days.

*We've got **a holiday** next Tuesday.*

*We get five days' Christmas **holiday** this year.*

We often use *holidays* for the 'big holiday' of the year.

*Where are you going for your summer **holiday(s)**?*

We always use the singular in the expression *on holiday*. (Note the preposition.)

*I met her **on holiday** in Norway. (NOT ... *in holidays* ...)*

Americans use the word *vacation* for a long holiday.

## 161 home

We do not use *to* before *home*.

*I think I'll go **home**. She came **home** late.*

(NOT ... *to home*.)

In American English, *home* is often used to mean *at home*.

*Is anybody **home**?*

## 162 hope

1 After *I hope*, we often use a present tense with a future meaning.

*I hope she **likes** (= will like) the flowers.*

*I hope the bus **comes** soon.*

- 2 In negative sentences, we usually put *not* with the verb that comes after *hope*.

*I hope she **doesn't** wake up.*  
 (NOT *+don't hope she wakes up.*)

- 3 We can use *I was hoping* to introduce a polite request.

*I was hoping you could lend me some money . . .*

*I had hoped* is used to talk about hopes that were not realized — hopes for things that did not happen.

*I had hoped that Jennifer would become a doctor, but she wasn't good enough at science.*

- ▷ For *I hope so/not*, see 311.  
 For the difference between *hope*, *want*, *expect*, *wish*, *look forward to* and *wait*, see 122.

## 163 how and what . . . like?

- 1 We use *how* to ask about things that change — for example people's moods and health.

We use *what . . . like* to ask about things that do not change — for example, people's appearance and character. Compare:

*'How's Ron?' 'He's very well.'*  
*'What's Ron like?' 'He's tall and dark, and a bit shy.'*  
*'How does he look?' 'Surprised.'*  
*'What does he look like?' 'Nice.'*

- 2 We often use *how* to ask about people's reactions to their experiences.

*'How was the film?' 'Great.'*  
*'How's your steak?' 'Nice.'*  
*'How's the new job?' 'Great.'*

- 3 Don't confuse the preposition *like* (in *What . . . like?*) with the verb *like*. Compare:

*'What **is** she like?' 'Lovely.'*  
*'What **does** she like?' 'Dancing and fast cars.'*

## 164 if: ordinary tenses

<i>if</i> + clause, + clause clause + <i>if</i> + clause
---

- 1 An *if*-clause can come at the beginning or end of the sentence.

*If you eat too much, you get fat.*    *You get fat if you eat too much.*

**2** We can use the same tenses with *if* as with other conjunctions.

If you **want** to learn a musical instrument, you **have** to practise.

If that **was** Mary, why **didn't** she **stop** and say hello?

If you **don't** like hot weather, **you'll be** unhappy in Texas.

**3** In the *if*-clause, we usually use a present tense to talk about the future. (This happens after most conjunctions — see 343.)

*If I have* enough time tomorrow, I'll come and see you.

(NOT ~~*If I will have*~~ enough time . . . )

I'll give her your love *if I see* her.

(NOT . . . ~~*if I will see*~~ her.)

**4** We can use if + will in polite requests, but the meaning is not really future.

*If you will* come this way, I'll take you to the manager's office.

(= **If you are willing** to come this way, . . . )

▷ For if + will in reported speech (for example *I don't know **if I'll be** here tomorrow*), see 343.2.

For *if not* and *unless*, see 350.

For the use of special tenses with *if*, see 165.

## 165 **if**: special tenses

We use 'special' tenses with *if* when we are talking about 'unreal' situations — things that will probably not happen, present or future situations that we are imagining, or things that did not happen. (For example, we can use past tenses to talk about the future.)

### 1 **Present and future situations**

To talk about 'unreal' or improbable situations now or in the future, we use a past tense in the *if*-clause, and a conditional (see 88) in the other part of the sentence.

if + past, conditional  
conditional if + past

If I **knew** her name, I **would tell** you.

(NOT ~~*if I would know*~~ . . . NOT . . . ~~*if I will tell you*~~.)

If you **came** tomorrow, I **would have** more time to talk.

I **would be** perfectly happy if I **had** a car.

What **would you do** if you **lost** your job?

We often use *were* instead of *was* after *if*, especially in a formal style.

If I **were** rich, I **would spend** all my time travelling.

## 2 Special tenses and ordinary tenses compared

The difference between *if I get* and *if I got*, or *if I have* and *if I had*, is not a difference of time. They can both refer to the present or future. After *if*, the past tense suggests that the situation is less probable, or impossible, or imaginary. Compare:

*If I **become** President, I'll . . .* (said by a candidate in an election)

*If I **became** President, I'd . . .* (said by a schoolboy)

*If I **win** this race, I'll . . .* (said by the fastest runner)

*If I **won** this race, I'd . . .* (said by the slowest runner)

## 3 Past situations

To talk about past situations that did not happen, we use a past perfect tense (with *had*) in the *if*-clause, and a perfect conditional (see 88) in the other part of the sentence.

*if* + past perfect, perfect conditional  
perfect conditional *if* + past perfect

*If you **had worked** harder, you **would have passed** your exam.*

*If you **had asked** me, I **would have told** you.*

*I'd **have been** in bad trouble if Jane **hadn't helped** me.*

## 166 *if*-sentences with **could** and **might**

In *if*-sentences, we can use *could* to mean 'would be able to' and *might* to mean 'would perhaps' or 'would possibly'.

*If I had another £500, I **could** buy a car.*

(= . . . I would be able to buy a car.)

*If you asked me nicely, I **might** buy you a drink.*

## 167 *if only*

We can use *if only . . . !* to say that we would like things to be different.

It means the same as *I wish* (see 367), but is more emphatic.

We use the same tenses after *if only* as after *I wish*:

a. past to talk about the present

*If only I **knew** more people!*

*If only I **was** better-looking!*

In a formal style, we can use *were* instead of *was*.

*If only I **were** better-looking!*

b. *would* to refer to the future

*If only it **would** stop raining!*

*If only somebody **would** smile!*

c. past perfect ( **had + past participle** ) to refer to the past

*If only she **hadn't** told the police, everything would have been all right.*

## 168 if so and if not

We can use these expressions instead of repeating a verb that has already been mentioned.

*Are you free this evening? **If so**, let's go out for a meal.*

(= ... *If you are* ...)

*I might see you tomorrow. **If not**, then it'll be Saturday.*

(= ... *If I don't* ...)

## 169 ill and sick

1 *Ill* means 'unwell'.

*I'm sorry I didn't answer your letter. I've been **ill**.*

We do not use *ill* before a noun. Instead, we can use *sick*.

*She spent years looking after her **sick** mother.*

2 We can use *be sick* (in British English) to mean 'bring food up from the stomach'. If you *feel sick*, you want to do this.

*I **was sick** three times in the night.*

*I **feel sick**. Where's the bathroom?*

*She's never **sea-sick**.*

In American English, *be sick* means 'be ill'.

## 170 imperative

1 When we say *Have a drink*, *Come here* or *Sleep well*, we are using *imperative* verb forms: *have*, *come* and *sleep*.

Imperatives have exactly the same form as the infinitive without *to*. We use them, for example, for telling people what to do, making suggestions, giving advice, giving instructions, encouraging people, and offering things.

**Look** in the mirror before you drive off.

**Tell** him you're not free this evening.

**Try** again — you nearly did it!

**Have** some more tea.

Negative imperatives are made with *don't* or *do not*.

**Don't worry** — everything will be all right.

**Do not lean** out of the window.

We can make an emphatic imperative with *do*. This is common in polite requests, complaints and apologies.

**Do sit** down. **Do try** to make less noise.

**Do forgive** me — *I didn't mean to interrupt.*

- 2 The imperative does not usually have a subject, but we can use a noun or pronoun to make it clear who we are speaking to.

**Mary come** here — *everybody else stay where you are.*

**Somebody answer** the phone!

- 3 After imperatives, we can use the question tags (see 273) *will you? won't you? would you? can you? can't you?* and *could you?*

*Come and help me, will you?*

*Give me a cigarette, could you?*

*Be quiet, can't you?*

- ▷ For the 'first-person plural imperative' *let's*, see 191.

## 171 in and into (prepositions)

- 1 To talk about the position of something (with no movement), we use *in*.

*'Where's Susie?' 'In the bedroom.'*

*My mother's the woman in the chair by the window.*

- 2 When we talk about a movement, we usually use *into*.

*She came into my room holding a paper.*

*I walked out into the garden to think.*

After some words, both are possible. (For example *throw, jump, cut, push*.) We prefer *into* when we think of the movement, and *in* when we think of the end of the movement — the place where something will be. Compare:

*She threw her ring into the air.*

*She threw her ring in(to) the river.*

We use *in* after *sit down*, and very often after *put*.

*He sat down in his favourite armchair. (NOT He sat down into ...)*

*I put my hand in my pocket.*

## 172 in case

- 1 We use *in case* to talk about things we do because something else might happen.

*Take an umbrella in case it rains. (= ... because it might rain.)*

*I've bought a chicken in case your mother stays to lunch.*

*I wrote down her address in case I forgot it.*

After *in case*, we use a present tense with a future meaning.

... *in case it rains*. (NOT ... *in case it will rain*.)

We can also use *should* + infinitive. In this structure, *should* means 'might'.

*I've bought a chicken in case your mother should stay to lunch.*

*I wrote down her address in case I should forget it.*

The structure with *should* is more common in the past.

## 2 Don't confuse *in case* and *if*.

'I do A in case B happens' =

'I do A first because B might happen later.' A is first.

'I do A if B happens' =

'I do A if B has happened first.' B is first.

Compare:

*Let's get a bottle of wine in case Roger comes.*

(= *We'll buy some wine now because Roger might come later.*)

*Let's buy a bottle of wine if Roger comes.*

(= *We'll wait and see. If Roger comes, then we'll buy the wine. If he doesn't we won't.*)

## 173 in spite of

*In spite of* is a preposition.

*In spite of* + noun = *although* + clause

*We went out in spite of the rain.*

(= *We went out although it was raining.*)

*We understood him in spite of his accent.*

(= *We understood him although he had a strong accent.*)

*In spite of* is the opposite of *because of*. Compare:

*He passed the exam because of his good teachers.*

*He passed the exam in spite of his bad teachers.*

## 174 indeed

We use *indeed* to strengthen *very*.

*Thank you very much indeed.*

*I was very pleased indeed to hear from you.*

*He was driving very fast indeed.*

We do not usually use *indeed* after an adjective or adverb without *very*.

(NOT *He was driving fast indeed*.)

## 175 infinitive: negative, progressive, perfect, passive

### 1 Negative infinitive: **not + infinitive**

Try **not to be** late. (NOT . . . **to not be** late.)

I decided **not to study** medicine. (NOT . . . **to not study** . . .)

You'd better **not say** that again.

Why **not tell** me about your problems?

For the difference between the infinitive with and without *to*, see 179.

### 2 Progressive infinitive: **(to) be . . . -ing**

It's nice **to be sitting** here with you.

This time tomorrow I'll **be lying** on the beach.

### 3 Perfect infinitive: **(to) have + past participle**

It's nice **to have finished** work.

Ann said she was sorry **to have missed** you.

You should **have told** me you were coming.

For perfect infinitives after modal verbs (*should, might* etc), see 202.3.

### 4 Passive infinitive: **(to) be + past participle**

There's a lot of work **to be done**.

She ought **to be told** about it.

That window must **be repaired** before tonight.

For the meaning of passive forms, see 237.

## 176 infinitive: use

### 1 Subject

An infinitive can be the subject of a sentence.

**To learn** Chinese is not easy.

But we more often use a structure with *it* as a 'preparatory subject' (see 187), or with an *-ing* form as subject (see 180).

**It** is not easy **to learn** Chinese.

**Learning** Chinese isn't easy.

### 2 After verb

We often use an infinitive after another verb.

It's **beginning to rain**.

I **expect to be free** tomorrow evening.

I don't **want to see** you again.

Some common verbs that can have an infinitive after them:

afford	happen	prefer
appear	hate	prepare
arrange	help	pretend
ask	hope	promise
(can't) bear	intend	refuse
begin	learn	remember
dare (see 94)	like	seem
decide	love	start
expect	manage	try
fail	mean	want
forget	offer	wish

Some of these verbs can be used with object + infinitive (for example *I **want her to be** happy*). For details, see 3 below.

After some of these verbs, we can also use an *-ing* form. The meaning is not always the same (for example, *try running/try to run*). For details, see 182.

### 3 Verb + object + infinitive

After some verbs, we can use object + infinitive.

*She didn't **want me to go**.*

(NOT ~~*She didn't want that I go.*~~)

*I didn't **ask you to pay** for the meal.*

Some common verbs that are used in this structure:

advise	hate	prefer
allow	help (see 158)	remind
ask	invite	teach
(can't) bear	like	tell
cause	mean	want
encourage	need	warn
expect	order	wish
get (see 143)	persuade	

For verb + infinitive without to, see 179.

### 4 After adjective

Infinitives are used after some adjectives.

*I'm **pleased to see** you.*

*John was **surprised to get** Ann's letter.*

*His accent is not **easy to understand**. (NOT . . . *to understand it*.)*

*She's very **nice to talk to**. (NOT . . . *to talk to her*.)*

For structures like *I'm **anxious for the meeting to finish** early*, see 132.

For *enough* and *too* with adjective + infinitive, see 113; 348.

## 5 After noun

We can use infinitives after some nouns.

*I have no **wish to change**.*

*I told her about my **decision to leave**.*

The infinitive often explains the purpose of something: what it **will** do, or what somebody will do with it.

*Have you got a key **to open this door**?*

*I need some more work **to do**.*

- ▷ For information about the structures that are possible with any verb, adjective or noun, look in a good dictionary.

For the 'infinitive of purpose', see 178.

For infinitives after *who*, *what*, *how* etc, see 177.

For *to* used instead of the whole infinitive, see 108.5.

For the use of the infinitive without *to*, see 179.

## 177 infinitive after **who**, **what**, **how** etc

- 1 In reported speech (see 282; 284), we can use an infinitive after the question-words *who*, *what*, *where* etc (but not *why*) to talk about questions and the answers to questions.

verb + question-word + infinitive

*I wonder **who to invite**.*

*Show me **what to do**.*

*Can you tell me **how to get** to the station?*

*I don't know **where to put** the car.*

*Tell me **when to pay**.*

*I can't decide **whether to answer** her letter.*

- 2 We cannot begin a direct question with *How to ... ?*, *What to ... ?* etc. We often use *shall* or *should*.

*How **shall** I tell her? (NOT ~~How to tell her?~~)*

*What **shall** we do? (NOT ~~What to do?~~)*

*Who **should** I pay? (NOT ~~Who to pay?~~)*

For questions beginning Why (not) + infinitive, see 179.3.

## 178 infinitive of purpose

We often use an infinitive to talk about a person's purpose — why he or she does something.

*I sat down for a minute **to rest**.*

*He went abroad **to forget**.*

*I'm going to Austria **to learn German**.*

In a more formal style, we often use *in order to* or *so as to*.

*He got up early **in order to have time** to pack.*

*I moved to a new flat **so as to be near** my work.*

In negative sentences, we nearly always use the structure with *so as not to* or *in order not to*.

*I'm going to leave now, **so as not to be late**.*

(NOT ~~*I'm going to leave now, not to be late.*~~)

## 179 infinitive without to

We usually put *to* before the infinitive (for example *I want **to go**; It's nice **to see you***). But we use the infinitive without *to* in the following cases:

### 1 Modal auxiliary verbs

After the modal auxiliary verbs *will, shall, would, should, can, could, may, might* and *must*, and after *had better*, we use the infinitive without *to*.

*I **must go** now.*

***Will you help** me?*

*It **might rain**.*

*You **had better stop**.*

### 2 *let, make, hear* etc

After some verbs, we use an object and the infinitive without *to*. The most common of these verbs are *let, make, see, hear, feel, watch*, and *notice*.

verb + object + infinitive without *to*

*She **lets her children do** what they want to.*

*I **made them give** me the money back.*

*I didn't **see you come in**.*

*I **heard her say** that she was tired.*

In an informal style, we often use *help* with this structure.

*Could you **help me push** the car?*

### 3 *why (not)*

We can use an infinitive without *to* after *why*. This usually means that it is unnecessary or stupid to do something.

***Why pay** more at other shops? Our prices are the lowest.*

*Why not . . . ?* is used to make suggestions.

***Why not** ask Susan to help you?*

#### 4 **and, or, except, but, than**

We can join two infinitives with *and, or, except, but, or than*. The second infinitive is usually without *to*.

*I'd like **to lie down and go** to sleep.*

*Do you want **to eat now or wait** till later?*

*We had nothing **to do except look** at the garden.*

*I'll **do anything but work** on a farm.*

*It's easier **to do** it yourself **than explain** to somebody else how to do it.*

## 180 **-ing form ('gerund')**

### 1 **Gerund or participle**

Words like *smoking, walking* are verbs. But we can also use them as adjectives or nouns. Compare:

*You're **smoking** too much these days.* (part of a verb)

*There was a **smoking** cigarette end in the ashtray.* (adjective)

***Smoking** is bad for you.* (noun: subject of sentence)

When *-ing* forms are used as verbs or adjectives, they are called 'present participles'. For details, see 234–236. When they are more like nouns, grammars call them 'gerunds'.

For the use of gerunds, see this section and the next two.

### 2 **Subject, object or complement of a sentence**

An *-ing* form can be a subject, object or complement.

***Smoking** is bad for you.* (subject)

*I hate **packing**.* (object)

*My favourite activity is **reading**.* (complement)

The *-ing* form subject, object or complement is still a verb, and can have its own object.

***Smoking cigarettes** is bad for you.*

*I hate **packing suitcases**.*

*My favourite activity is **reading poetry**.*

We can use determiners (for example *the, my*) with *-ing* forms.

***the opening** of Parliament*

*Do you mind **my smoking**?*

(OR, not so formal: *Do you mind **me** smoking? )*

### 3 **After verb**

After some verbs we can use an *-ing* form, but not an infinitive.

*I **enjoy travelling**.* (NOT *I enjoy **to travel***.)

*He's **finished mending** the car.* (NOT ... ***to mend*** ... )

Common verbs which are followed by an *-ing* form are:

avoid	forgive	practise
consider	give up	put off
delay	go	risk
dislike	(can't) help	(can't) stand
enjoy	imagine	spend time/money
excuse	keep	suggest
feel like	mind	understand
finish	miss	

Examples:

*I **dislike arguing** about money.*

***Forgive my interrupting** you.*

*Let's **go swimming**.*

*I can't **understand his being** so late.*

After some verbs, we can use either an *-ing* form or an infinitive. For example: *like, start, try, remember, forget.*

*How old were you when you **started to play/playing** the piano?*

With some verbs, the two structures have different meanings. For details, see 182.

#### 4 After verb (passive meaning)

After *need* and *want*, an *-ing* form has a passive meaning.

*Your hair **needs cutting**. (= ... needs **to be cut**.)*

*The car **wants servicing**. (= ... needs **to be serviced**.)*

#### 5 After preposition

After prepositions we use *-ing* forms, not infinitives.

*Check the oil **before starting** the car. (NOT ... **before to start** ...)*

*You can't make an omelette **without breaking** eggs.*

*You can get there faster **by going** on the motorway.*

When *to* is a preposition, we use an *-ing* form after it. (See 181.)

*I look forward **to hearing** from you. (NOT ... **to hear from you**.)*

#### 6 *it* ... *-ing*

We can use *it* as a 'preparatory subject' for an *-ing* form (see 187).

***It's nice being** with you.*

This is common in the structures *It's no good* ... *-ing* and *It's no use* ... *ing*.

***It's no good talking** to him — he never listens.*

***It's no use expecting** her to say thank-you.*

For *It's (not) worth* ... *-ing*, see 368.

## 181 -ing form after to

We sometimes use an *-ing* form after *to*.

*I look forward **to seeing** you. (NOT . . . ~~to see you.~~)*

*I'm not used **to getting up** early.*

These structures may seem strange.

In fact, *to* is two words:

a. a part of the infinitive

*I want **to go** home.*

*Help me **to understand**.*

b. a preposition

*I look forward **to** your next letter.*

*I prefer meat **to** fish.*

*I'm not used **to** London traffic.*

After the preposition *to*, we can use an *-ing* form, but not usually an infinitive.

*I look forward **to hearing** from you.*

(NOT . . . ~~**to hear** from you.~~)

*I prefer riding **to** walking.*

*I'm not used **to driving** in London.*

If you want to know whether *to* is a preposition, try putting a noun after it. Compare:

a. ~~*I want **to your letter**.*~~ (Not possible: *to* is not a preposition. Use the infinitive after *I want*.)

b. *I'm looking forward **to your letter**.* (This is all right, so *to* is a preposition. Use the *-ing* form after *look forward to*.)

## 182 -ing form or infinitive?

Some verbs and adjectives can be followed by an infinitive or by an *-ing* form, often with a difference of meaning.

### 1 remember and forget

We *remember* or *forget doing* things in the past — things that we did.

*Forget . . . -ing* is used especially in the structure *I'll never forget . . . -ing*.

*I still **remember buying** my first packet of cigarettes.*

*I'll never **forget meeting** the Queen.*

We *remember* or *forget to do* things which we have to do.

*Did you **remember to buy** my cigarettes?*

*You mustn't **forget to go** and meet Mr Lewis at the station tomorrow.*

**2 stop**

If you *stop doing* something, you don't do it any more.

*I really must **stop smoking**.*

If you *stop to do* something, you pause (in the middle of something else) in order to do it.

*Every hour I **stop work to have** a little rest.*

**3 go on**

If you *go on doing* something, you continue — you do it more.

*She **went on talking** about her illnesses until everybody went to sleep.*

If you *go on to do* something, you do it next — you stop one thing and start another.

*She stopped talking about her illnesses and **went on to tell** us about all her other problems.*

**4 regret**

You *regret doing* something in the past — you are sorry that you did it.

*I don't **regret telling** her what I thought, even if it made her angry.*

The expression *I regret to say/tell you/announce* etc means 'I'm sorry that I have to say . . . '.

*British Rail **regret to announce** that the 13.15 train for Cardiff will leave approximately thirty-seven minutes late. This delay is due to the late running of the train.*

**5 allow**

After *allow*, we use . . . -ing in active clauses if there is no object. If there is an object, we use an infinitive.

*We don't **allow smoking** in the lecture room.*

*We don't **allow people to smoke** in the lecture room.*

**6 see, watch and hear**

If you *saw, watched* or *heard something happening*, it was happening: you saw or heard it while it was going on. If you *saw, watched* or *heard something happen*, it happened: you saw or heard a complete action.

Note the infinitive without *to*: see 179.

(For the difference between *it was happening* and *it happened*, see 242.)

*I looked out of the window and **saw Mary crossing** the road.*

(= She was in the middle of crossing the road.)

*I **saw Mary** step off the pavement, **cross** the road and disappear into the post office.*

## 7 try

Try . . . -ing = 'make an experiment; do something to see what will happen'.

*I **tried sending** her flowers, **giving** her presents, **writing** her letters; but she still wouldn't speak to me.*

Try to . . . = 'make an effort'. It is used for things that are difficult.

*I **tried to write** a letter, but my hands were too cold to hold a pen.*

## 8 afraid

We use *afraid of . . . -ing* to talk about accidents.

*I don't like to drive fast because I'm **afraid of crashing**.*

(NOT . . . ~~I'm afraid to crash.~~)

In other cases, we can use *afraid of . . . -ing* or *afraid to . . .* with no difference of meaning.

*I'm not **afraid of telling/to tell** her the truth.*

## 9 sorry

We use *sorry for . . . -ing* or *sorry about . . . -ing* to talk about past things that we regret.

*I'm **sorry for/about waking** you up. (= I'm sorry that I woke you up.)*

We can use a perfect infinitive **with** the same meaning.

*I'm **sorry to have woken** you up.*

*Sorry + infinitive* is used to apologize for something that we are doing or going to do.

***Sorry to disturb** you — could I speak to you for a moment?*

*I'm **sorry to tell** you that you failed the exam.*

## 10 certain and sure

If I say that somebody is *certain/sure of doing* something, I am talking about his or her feelings — he or she feels sure.

*Before the game she felt **sure of winning**, but after five minutes she realized that it wasn't going to be so easy.*

If I say that somebody is *certain/sure to do* something, I am talking about my own feelings — I am sure that he or she will succeed.

*'Kroftová's **sure to win** — the other girl hasn't got a chance.' 'Don't be so sure.'*

## 11 like, love, hate, prefer, begin, start, attempt, intend, continue, can't bear

After these verbs, we can use either the *-ing* form or the infinitive without much difference of meaning.

*I **hate working/to work** at weekends.*

*She **began playing/to play** the guitar when she was six.*

*I **intend telling her/to tell** her what I think.*

In British English, we usually use *like . . . -ing* to talk about enjoyment, and *like to . . .* to talk about choices and habits. Compare:

*I **like climbing** mountains. I **like to start** work early in the morning.*

After the conditionals *would like*, *would prefer*, *would hate* and *would love*, we use the infinitive.

*I'd **like to tell** you something.*

*'Can I give you a lift?' 'No, thanks. I'd **prefer to walk**.'*

*I'd **love to have** a coat like that.*

Compare:

***Do you like dancing?** (= Do you enjoy dancing?)*

***Would you like to dance?** (An invitation. = Do you want to dance now?)*

- ▷ For the difference between used to + infinitive and be used to . . . -ing, see 353; 354.

## 183 instead of . . . -ing

After *instead of*, we can use a noun or an *-ing* form, but not an infinitive.

*Would you like to take a taxi **instead of a bus**?*

*Would you like to take a taxi **instead of going by bus**?*

(NOT . . . **instead to go** by bus:-)

## 184 inversion: auxiliary verb before subject

auxiliary verb + subject + main verb

We put an auxiliary verb before the subject of a clause in several different structures.

### 1 Questions (see 270)

***Have your father and mother** arrived?*

(NOT *Have arrived your father and mother?*)

*Where **is the concert** taking place?*

(NOT *Where is taking place the concert?*)

Spoken questions do not always have this word order (see 271).

***You're coming** tomorrow?*

Reported questions do not usually have this order (see 284).

*I wondered what time **the film was starting**.*

(NOT . . . *what time was the film starting*:-)

**2 if**

In a formal style, *had I . . .*, *had he . . .* etc can be used instead of *if I had . . .*, *if he had . . .* etc.

**Had I known** what was going to happen, I would have warned you.  
( = *If I had known . . .* )

**3 neither, nor, so** (see 217; 312)

These words are followed by auxiliary verb + subject.

'I'm hungry.' 'So **am I**.'

'I don't like Mozart.' 'Neither/Nor **do I**.'

**4 Negative adverbial expressions**

In a formal style, we may put a negative adverb or adverb phrase at the beginning of a clause. The order is

negative adverb (phrase) + auxiliary + subject + verb.

**Under no circumstances can we** accept cheques.

**Hardly had I** arrived when trouble started.

**5 only**

The same thing happens with expressions containing *only*.

**Only then did I** understand what she meant.

**Not only did we** lose our money, but we were also in danger of losing our lives.

**6 Exclamations**

Exclamations often have the same structure as negative questions (see 120.3).

**Isn't it cold!**    **Hasn't she** got lovely eyes!

**185 inversion: whole verb before subject****1 here, there etc**

If we begin a sentence with *here* or *there*, we put the whole verb before the subject, if this is a noun.

*Here comes Mrs Foster.* (NOT *Here Mrs Foster comes.*)

*There goes your brother.*

If the subject is a pronoun, it comes before the verb.

*Here she comes.*    *There he goes.*

This structure is possible with some other short adverbs like *down*, *up*.

*So I stopped the car, and up walked a policeman.*

## 2 Other adverbs (literary style)

In descriptive writing and story-telling, other adverbs of place can come at the beginning of a clause, followed by verb + subject.

*Under a tree was sitting the biggest man I have ever seen.*

*On the bed lay a beautiful young girl.*

## 3 Reporting (literary style)

In books, the subject often comes after verbs like *said*, *asked* in reporting direct speech.

*'What do you mean?' asked Henry.*

If the subject is a pronoun, it comes before the verb.

*'What do you mean?' he asked.*

# 186 irregular verbs

- 1 This is a list of common irregular verbs. You may like to learn them by heart.

Infinitive	Simple past	Past participle
arise	arose	arisen
awake	awoke	awoken
be	was, were	been
beat	beat	beaten
become	became	become
begin	began	begun
bend	bent	bent
bite	bit	bitten
bleed	bled	bled
blow	blew	blown
break	broke	broken
bring	brought	brought
build	built	built
burn	burnt/burned	burnt/burned
buy	bought	bought
can	could/was able	been able
catch	caught	caught
choose	chose	chosen
come	came	come
cost	cost	cost
cut	cut	cut
deal /di:l/	dealt /delt/	dealt /delt/
dig	dug	dug
do	did	done
draw	drew	drawn

<b>Infinitive</b>	<b>Simple past</b>	<b>Past participle</b>
dream /dri:m/	dreamt /dremt/ dreamed /dri:md/	dreamt /dremt/ dreamed /dri:md/
drink	drank	drunk
drive	drove	driven
eat /i:t/	ate /et/	eaten /'i:tn/
fall	fell	fallen
feel	felt	felt
fight	fought	fought
find	found	found
fly	flew	flown
forget	forgot	forgotten
forgive	forgave	forgiven
freeze	froze	frozen
get	got	got
give	gave	given
go	went	gone/been
grow	grew	grown
hang	hung	hung
have	had	had
hear /hɪə(r)/	heard /hɜ:d/	heard /hɜ:d/
hide	hid	hidden
hit	hit	hit
hold	held	held
hurt	hurt	hurt
keep	kept	kept
know	knew	known
lay	laid	laid
lead	led	led
learn	learnt/learned	learnt/learned
leave	left	left
lend	lent	lent
let	let	let
lie	lay	lain
light	lit/lighted	lit/lighted
lose	lost	lost
make	made	made
mean /mi:n/	meant /ment/	meant /ment/
meet	met	met
pay	paid	paid
put	put	put
read /ri:d/	read /red/	read /red/
ride	rode	ridden
ring	rang	rung
rise	rose	risen
run	ran	run

<b>Infinitive</b>	<b>Simple past</b>	<b>Past participle</b>
say /seɪ/	said /sed/	said /sed/
see	saw	seen
sell	sold	sold
send	sent	sent
set	set	set
shake	shook	shaken
shine /ʃaɪn/	shone /ʃɒn/	shone /ʃɒn/
shoot	shot	shot
show	showed	shown
shut	shut	shut
sing	sang	sung
sit	sat	sat
sleep	slept	slept
smell	smelt/smelled	smelt/smelled
speak	spoke	spoken
spell	spelt/spelled	spelt/spelled
spend	spent	spent
stand	stood	stood
steal	stole	stolen
stick	stuck	stuck
strike	struck	struck
swim	swam	swum
take	took	taken
teach	taught	taught
tear	tore	torn
tell	told	told
think	thought	thought
throw	threw	thrown
understand	understood	understood
wake	woke	woken
wear	wore	worn
win	won	won
write	wrote	written

## 2 Verbs that are easy to confuse

<b>Infinitive</b>	<b>Simple past</b>	<b>Past participle</b>
fall	fell	fallen
feel	felt	felt
fill	filled	filled
lay (= 'put down flat')	laid	laid
lie (= 'be down')	lay	lain
lie (= 'say things that are not true')	lied	lied
leave (= 'go away')	left	left
live (= 'be alive', 'be at home')	lived	lived
raise (= 'put up')	raised	raised
rise (= 'go up')	rose	risen

## 187 it: preparatory subject

When the subject of a sentence is an infinitive or a clause, this does not usually come at the beginning. We prefer to start the sentence with the 'preparatory subject' *it*.

*It's nice **to be** with you.*

(*To be with you is nice* is possible, but unusual.)

*It's probable **that** we'll be a little late.*

- 1 We often use this structure in sentences with *be* + adjective.

*It + be + adjective + infinitive*

*It's hard **to live** on my salary.*

*It is possible **to go** by road or rail.*

*It is important **to book** in advance.*

*It + be + adjective + clause*

*It's possible **that** I'll be here again next week.*

*It's surprising **how many** unhappy people there are.*

*It wasn't clear **what** she meant.*

*Is **it** true **that** your father's ill?*

- 2 We also use the structure to talk about the time that things take. (See 338.)

*It took me months **to get to know her**.*

*How long does **it** take **to get to London** from here?*

- 3 *It* can be a preparatory subject for an *-ing* form. This happens especially with *it's worth* (see 368) and *it's no good/use*. In other cases it is rather informal.

*It's worth **going** to Wales if you have the time.*

*It's no use **trying** to explain — I'm not interested.*

*It was nice **seeing** you.*

- ▷ For the use of *it* as a subject in emphatic structures, see 111.  
For 'impersonal' *it* in sentences like *It's raining*, see 247.5.  
For *it* as 'preparatory object', see 188.

## 188 it: preparatory object

We sometimes use *it* as a preparatory object. This happens most often in the structures *make it clear that . . .* and *find/make it easy/difficult to . . .*

*George **made it clear that** he wasn't interested.*

*I **found it easy to talk** to her.*

*You **make it difficult to refuse**.*

## 191 let's

*Let's* + infinitive without *to* is often used to make suggestions. It is rather like a first-person plural imperative (see 170).

**Let's** *have a drink.* (= *I think we should have a drink.*)

**Let's** *go home, shall we?*

There are two possible negatives, with *Let's not . . .* and *Don't let's . . .*

**Let's not** *get angry.*    **Don't let's** *get angry.*

*Let's not* is considered more 'correct'.

## 192 letters

The most important rules for writing letters are:

- 1 Write your address in the top right-hand corner (**house-number** first, then street-name, then town, etc). Do not put your name **above** the address.
- 2 Put the date under the address. One way to write the date is: number — month — year (for example *17 May 1982*). For other ways, see 95.
- 3 In a business letter, put the name and address of the person you are writing to on the left-hand side of the page (beginning on the same level as the date).
- 4 Begin the letter (*Dear X*) on the left-hand side of the page.
- 5 Leave a line, and begin your first paragraph on the left-hand side. Leave another line after each paragraph, and begin each new paragraph on the left.
- 6 If you begin *Dear Sir(s)* or *Dear Madam*, finish *Yours faithfully . . .* . If you begin with the person's name (*Dear Mrs Hawkins*), finish *Yours sincerely* or *Yours* (more informal). Friendly letters may begin with a first name (*Dear Keith*) and finish with an expression like *Yours* or *Love*.
- 7 On the envelope, put the first name before the surname. You can write the first name in full (*Mr Keith Parker*), or you can write one or more initials (*Mr K Parker*; *Mr K S Parker*). Titles like *Mr*, *Ms*, *Dr* are usually written without a full stop in British English.

19 March 1984

Dear Keith and Ann

Thanks a lot for a great weekend. Can I come again soon?

Bill and I were talking about the holidays. We thought it might be nice to go camping in Scotland for a couple of weeks. Are you interested? Let me know if you are, and we can talk about dates etc.

See you soon, I hope. Thanks again.

Yours

Alan

Botley Road  
Oxford  
OX6 5JP

## 193 likely

*Likely* means the same as 'probable', but we use it in different structures.

### 1 be + likely + infinitive

*I'm likely to be busy tomorrow.*

*Are you likely to be at home this evening?*

*Do you think it's likely to rain?*

*He's unlikely to agree.*

### 2 it is likely + that-clause

*It's likely that the meeting will go on late.*

## 194 long and for a long time

*Long* is most common in questions and negative sentences, and after *too* and *so*.

*How long did you wait? I didn't play for long.*

*The concert was too long.*

In affirmative sentences, we usually use *a long time*.

*I waited (for) a long time.* (*I waited long* is possible, but not usual.)

*It takes a long time to get to her house.*

*Much*, *many* and *far* are also more common in questions and negative sentences. (See 205 and 125.)

## 195 look

### 1 *Look* can mean 'seem' or 'appear'. This is a 'copula verb' (see 91); it is followed by adjectives.

*You look angry — what's the matter?*

(NOT ~~*You look angrily*~~ . . .)

*The garden looks nice.*

We can also use *like* or *as if* after *look*.

look like + noun

*She looks like her mother.*

*'What's that bird?' 'It looks like a buzzard.'*

look as if + clause

*You look as if you've had a bad day.*

*It looks as if it's going to rain.*

*Look like* + clause is also possible — see 49.3.

- 2 *Look* can also mean 'turn your eyes towards something'. It can be used with adverbs.

*The boss looked at me **angrily**.*

*She looked **excitedly** round the room.*

- ▷ For the difference between *look*, *watch*, and *see*, see 196.

## 196 look (at), watch and see

- 1 *See* is the ordinary word to say that something 'comes to our eyes'.

*Suddenly I **saw** something strange. Can you **see** me?*

*Did you **see** the article about the strike in today's paper?*

*See* is not used in progressive tenses with this meaning (see 225). When we want to say that we see something at the moment of speaking, we often use *can see*. (See 81.)

*I **can see** an aeroplane. (NOT ~~am seeing~~ ...)*

- 2 We use *look (at)* to talk about concentrating, paying attention, trying to see as well as possible. Compare:

*I **looked at** the photo, but I didn't **see** anybody I knew.*

*'Do you **see** the man in the raincoat?' 'Yes.' **Look** again.' 'Good heavens! It's Moriarty!'*

We use *look* when there is no object, and *look at* before an object. Compare:

***Look!** (NOT ~~Look at!~~) **Look at** me! (NOT ~~Look me!~~)*

- 3 *Watch* is like *look (at)*, but suggests that something is happening, or going to happen. We *watch* things that change, move or develop.

***Watch** that man — I want to know everything he does.*

*I usually **watch** a football match on Saturday afternoon.*

- 4 We *watch* TV, but we *see* plays and films. Compare:

*Did you **watch** 'Top of the Pops' last night? (TV)*

*'Have you **seen** any of the Chaplin films?' 'Where are they on?' 'At the cinema in High Street.'*

- ▷ The difference between *see* and *look (at)* is similar to the difference between *hear* and *listen (to)*. See 157.

For structures with the infinitive and the *-ing* form after these verbs, see 182.6.

## 197 marry and divorce

- 1 *Marry* and *divorce* are used without a preposition.

*She **married** a builder. (NOT ~~She married with a builder.~~)*

*Will you **marry** me? Andrew's going to **divorce** Carola.*

- 2 When there is no direct object, we usually prefer the expressions *get married* and *get divorced*, especially in an informal style.

*Lulu and Joe **got married** last week.*

(*Lulu and Joe **married** . . .* is not so natural.)

*When are you going to **get married**?*

*The Robinsons are **getting divorced**.*

- 3 We can use *get/be married* with to + object.

*She **got married to** her childhood sweetheart.*

*I've **been married to** you for sixteen years and I still don't know what goes on inside your head.*

## 198 may and might: forms

- 1 *May* is a 'modal auxiliary verb' (see 202).

There is no -s in the third person singular.

*She **may** be here tomorrow.* (NOT ~~*She mays*~~ . . .)

Questions and negatives are made without *do*.

***May** I help you?* (NOT ~~*Do I may*~~ . . . ?)

After *may*, we use the infinitive without *to*.

*You **may be** right.* (NOT ~~*You may to be right.*~~)

- 2 *May* has no infinitive or participles. When necessary, we use **other words**.

*She wants **to be allowed** to open a bank account.*

(NOT . . . ~~*to may open*~~ . . .)

- 3 *Might* is a 'less definite' form of *may* — it **does not have a past meaning**.

We use both *may* and *might* to talk about the present and the future (see 199; 200).

- 4 There is a contracted negative *mightn't*. (*Mayn't* is very unusual.)

▷ *May* and *might* are used mostly to talk about probability and to ask for and give permission. See 199; 200.

## 199 may and might: probability

### 1 Chances

We use *may* and *might* to say that there is a chance of something: perhaps it is true, or perhaps it will happen.

*We **may** go climbing in the Alps next summer.* (= *Perhaps we'll go.*)

*'Where's Emma?' 'I don't know. She **may** be shopping, I suppose.'*

*Peter **might** phone. If he does, could you ask him to ring again later?*

*'I **might** get a job soon.'* 'Yes, and pigs might fly.' (= 'It's very unlikely.')

## 2 Questions

We do not use *may* in questions about probability.

*Do you think you'll go camping this summer?*

(NOT ~~*May you go camping this summer?*~~)

## 3 might

*Might* is not the past of *may*. It is used to talk about a smaller chance than *may*. Compare:

*I **may** go to London tomorrow.* (Perhaps a 50 per cent chance.)

*Joe **might** come with me.* (Perhaps a 30 per cent chance.)

## 4 Conditional

*Might* (but not *may*) can have a conditional use.

*If you ~~went~~ to bed for an hour you **might** feel better.*

(= ... *perhaps you would feel better.*)

## 5 *may/might have* ...

We use a special structure to talk about the chance that something happened in the past.

*may/might have + past participle*

*'Polly's very late.' 'She **may have missed** her train.'*

*'What was that noise?' 'It **might have been** a cat.'*

We can use the same structure (with *might* only) to say that something was possible, but did not happen.

*That was a bad place to go skiing. You **might have broken** your leg.*

(*Could have* ... is used in the same way. See 79.3.)

# 200 *may* and *might*: permission

## 1 Asking for permission

*May* and *might* can be used to ask for permission. They are more formal than *can* and *could*. *Might* is very polite and formal, and is not common.

***May** I put the TV on? I wonder if I **might** have a little more cheese?*

## 2 Giving and refusing permission

*May* is used to give permission. *May not* is used to refuse permission, and to forbid.

*'May I put the TV on?' 'Yes, of course you **may**.'*

*Students **may not** use the staff car park.*

These are rather formal. In informal language, we prefer *can* and *can't*. (See 80.)

### 3 Talking about permission

We do not usually use *may* and *might* to talk about permission which has already been given or refused. Instead, we use *can*, *could* or *be allowed to*.

*These days, children **can** do what they like.*

(NOT ... ~~*may do*~~ ...)

*I **could** read what I liked when I was a child.*

(NOT ~~*+might*~~ ...)

## 201 mind

*Mind* can mean 'dislike', 'be annoyed by', 'object to'. We use *mind* mostly in questions and negative sentences.

*I **don't mind** you coming in late if you don't wake me up.*

*'Do you **mind** the smell of tobacco?' 'Not at all.'*

*Do you mind ... ?* and *Would you mind ... ?* are often used to ask for permission, or to ask people to do things. We can use *-ing* forms or *if*-clauses.

*Do you mind/Would you mind ... -ing ... ?*

***Would you mind opening** the window? (= Please open the window.)*

***Would you mind my opening** the window? (= Can I open the window?)*

***Do you mind people smoking** in the kitchen?*

*Do you mind/Would you mind if ... ?*

***Would you mind if** I opened the window?*

***Do you mind if** people smoke in the kitchen?*

*'Do you **mind if** I smoke?' 'No, please do.'*

Note that the answer 'No' is used to *give* permission after *Do you mind ... ?* (*I don't mind* means 'I have nothing against it; it's all right'.)

## 202 modal auxiliary verbs

### 1 Forms

Modal auxiliary verbs are *can*, *could*, *may*, *might*, *must*, *will*, *would*, *shall*, *should*, *ought*, *dare* and *need*.

Modal verbs have no *-s* in the third person singular.

*She **might** know his address.* (NOT ~~*She mights*~~ ...)

Questions and negatives are made without *do*.

***Can you** swim?* (NOT ~~*Do you can swim?*~~)

*You **shouldn't do** that.* (NOT ~~*You don't should do that.*~~)

After modal auxiliary verbs, we use the infinitive without *to*. (*Ought* is an exception: see 232.)

*I **must remember** to write to Leslie.*  
(NOT ~~*+must to remember*~~ . . .)

## 2 Meanings

We do not use modal verbs for situations that definitely exist, or for things that have definitely happened. We use them, for example, to talk about things which we expect, which are possible, which we think are necessary, which we are not sure about, or which did not happen.

*She **will** be here tomorrow.*  
*I **may** come tomorrow if I have time.*  
*She **could** be in London or Paris or Tokyo — nobody knows.*  
*You **must** come and have dinner with us some time.*  
*What **would** you do if you had a free year?*  
*She **should** have seen a doctor when she first felt ill.*

## 3 Modal verb + perfect infinitive

We use the structure modal verb + perfect infinitive (for example *must have seen*, *should have said*) to talk about the past. This structure is used for speculating (thinking about what possibly happened) or imagining (thinking about how things could have been different).

modal verb + have + past participle

*She's two hours late. What **can have happened**?*  
*You **could have told** me you were coming.*  
*The potatoes **would have been** better with more salt.*  
*The plant's dead. You **should have given** it more water.*

- ▷ For more information, see the entries for *can*, *may* etc.  
*Dare* and *need* can be used in two ways: as modal auxiliary verbs and as ordinary verbs. See 94 and 213.  
For information about weak and strong pronunciations of modal auxiliary verbs, see 358.  
For contracted forms, see 90.

## 203 more (of): determiner

- 1 We can use *more* before uncountable or plural nouns.

*more* + noun

*We need **more time**.* (NOT . . . ~~*more of time*~~:-)  
***More people** are drinking wine these days.*

- 2 Before another determiner (for example *the, my, this*), we use *more of*. We also use *more of* before a pronoun.

*more of* + determiner + noun  
*more of* + pronoun

Can I have some **more of the** red wine, please?

Have you got any **more of that** smoked fish?

I don't think any **more of them** want to come.

- 3 We can use *more* alone, without a noun.

I'd like some **more**, please.

- ▷ For the use of *more* with comparative adjectives and adverbs, see 84; 87.  
 For *far more*, *much more* and *many more*, see 86.

## 204 most (of): determiner

- 1 We use *most* before uncountable or plural nouns.

*most* + noun

I hate **most** pop music. (NOT ... ~~most of pop music~~.)

**Most** people disagree with me.

(NOT ~~**Most of** people~~ ... NOT ~~**The most** people~~ ...)

- 2 Before another determiner (for example *the, my, this*), we use *most of*. We also use *most of* before a pronoun.

*most of* + determiner + noun  
*most of* + pronoun

I've eaten **most of the** salad.

You've read **most of my** books.

**Most of us** feel the same way.

- ▷ For the use of *most* with superlative adjectives and adverbs, see 84; 87.

## 205 much, many, a lot etc

- 1 In an informal style, we use *much* and *many* mostly in negative sentences and questions, and after *so*, *as* and *too*. In affirmative sentences (except after *so*, *as* and *too*), we use other words and expressions. Compare:

How **much** money have you got?

I've got **plenty**. (NOT ~~I've got much~~.)

I haven't got **many** pop records.

I've got **a lot of** jazz records.

(NOT USUALLY ~~I've got many jazz records~~.)

You make **too many** mistakes.

You make **lots of** mistakes.

(NOT USUALLY ~~You make many mistakes~~.)

- 2 We use *a lot of* and *lots of* mostly in an informal style. They are both used before uncountable (singular) and plural nouns, and before pronouns. When *a lot of* is used with a plural subject, the verb is plural; when *lots of* is used with a singular subject, the verb is singular.

*a lot of/lots of* + singular subject and verb

*A lot of time* **is** needed to learn a language.

**There's** *lots of coffee* in the pot. (NOT ~~**There are** lots of coffee . . .~~)

*a lot of/lots of* + plural subject and verb

**A lot of my friends** *think* *there's* going to be a war.

(NOT ~~**A lot of my friends** *thinks* . . .~~)

**Lots of people** *live* in the country and work in London.

**A lot of us** *would like* to change our jobs.

We use *a lot of* and *lots of* before a noun or pronoun; we use *a lot/lots* without *of* alone, when there is no noun or pronoun. Compare:

*She's* lost **a lot of weight**. (NOT . . . ~~**a lot weight**~~-)

*She's* lost **a lot**. (NOT . . . ~~**a lot of**~~-)

- 3 *A lot (of)* and *lots (of)* are rather informal. In a more formal style we use other expressions, like *a great deal (of)* (+ singular), *a large number (of)* (+ plural), or *plenty (of)* (+ singular or plural).

*Mr Lucas* has spent **a great deal of time** in the Far East.

*We* have **a large number of problems** to solve.

*Thirty years ago* there were **plenty of jobs**; now there are very few.

In a formal style, we can also use *much* and *many* in affirmative sentences.

*There* has been **much** research into the causes of cancer.

**Many** scientists believe . . .

- ▷ See also 125 (*far* and *a long way*) and 194 (*long* and *a long time*).

## 206 much (of), many (of): determiners

- 1 *Much* is used before uncountable (singular) nouns; *many* is used before plural nouns.

*I* haven't got **much time**. (NOT . . . ~~**much of time**~~-)

*I* haven't got **many friends**. (NOT . . . ~~**much friends**~~-)

- 2 We use *much of* and *many of* before other determiners (for example *the*, *my*, *this*, *these*), and before pronouns.

*much/many* + *of* + determiner + noun

*How* **much of the** house do you want to paint this year?

*I* don't think *I'll* pass the exam; *I've* missed too **many of my** lessons.

*You* didn't eat **much of it**.

*How* **many of you** are there?

- 3 We can use *much* and *many* alone, without a following noun.

*You haven't eaten **much**.*

*'Did you find any mushrooms?' 'Not **many**.'*

- ▷ *Much* and *many* are used mostly in questions and negative sentences. See 205.

## 207 **must**: forms

- 1 *Must* is a 'modal auxiliary verb' (see 202). There is no -s in the third person singular.

*He **must** start coming on time. (NOT ~~He-musts~~ ...)*

Questions and negatives are made without *do*.

***Must you go?** (NOT ~~Do you must go?~~)*

***You mustn't** worry. (NOT ~~You don't must worry.~~)*

After *must*, we use the infinitive without *to*.

*I **must write** to my mother. (NOT ~~+must to write~~ ...)*

- 2 *Must* has no infinitive or participles. When necessary, we use other expressions, such as *have to*.

*He **ll have to** start coming on time. (NOT ~~He'll must~~ ...)*

*I don't want **to have to** tell you again. (NOT ~~+don't want to must~~ ...)*

- 3 *Must* has no past tense: We can talk about past obligation with *had to*.

*I **had to** push the car to start it this morning. (NOT ~~+must push~~ ...)*

*Must can* have a past meaning in reported speech (see 282; 283).

*I told her she **must** be home by midnight.*

- 4 There is a contracted negative *mustn't*.

For 'weak' and 'strong' pronunciations of *must*, see 358.

## 208 **must**: obligation

- 1 We use *must* to give strong advice or orders, to ourselves or other people.

*I really **must** stop smoking.*

*You **must** be here before eight o'clock.*

In questions, we use *must* to ask what the hearer thinks is necessary.

***Must** I clean all the rooms?*

*Why **must** you always leave the door open?*

*Must not* or *mustn't* is used to tell people not to do things.

*You **mustn't** open this parcel before Christmas Day.*

- 2 We can also use *have (got) to* to talk about obligation. (See 156.) For the difference between *must* and *have (got) to*, see 209.
- 3 *Must* is not used to talk about past obligation (*must* is used mainly for giving orders, and you cannot give orders in the past). For the use of *had to*, see 156.
- ▷ For the difference between *must not* and *don't have to*, *haven't got to*, *don't need to* and *needn't*, see 209.

## 209 **must and have to; mustn't, haven't got to, don't have to, don't need to and needn't**

- 1 *Must* and *have (got) to* are not exactly the same. We usually use *must* to give or ask for orders — the obligation comes from the person who is speaking or listening.  
We use *have (got) to* to talk about an obligation that comes from 'outside' — perhaps because of a law, or a rule, or an agreement, or because some other person has given orders. Compare:
- I **must** stop smoking. (I want to.)*  
*I've **got to** stop smoking. Doctor's orders.*
- This is a terrible party. We really **must** go home.*  
*This is a lovely party, but we've **got to** go home because of the baby-sitter.*
- I've got bad toothache. I **must** make an appointment with the dentist.*  
*I can't come to work tomorrow morning because I've **got to** see the dentist. (I have an appointment.)*
- Must you** wear dirty old jeans all the time? (= Is it personally important for you?)*  
***Do you have to** wear a tie at work? (= Is it a rule?)*
- 2 *Mustn't* is used to tell people not to do things: it expresses 'negative obligation'.  
*Haven't got to, don't have to, don't need to* and *needn't* are all used to say that something is unnecessary. They express absence of obligation: no obligation. Compare:
- You **mustn't** tell George. (= Don't tell George.)*  
*You **don't have to** tell Alice. (= You can if you like, but it's not necessary.)*
- You **don't have to** wear a tie to work, but you **mustn't** wear jeans.*  
*(= Wear a tie or not, as you like. But no jeans.)*
- Haven't got to, don't have to, needn't* and *don't need to* all mean more or less the same.

## 210 must: deduction

- 1 We can use *must* to say that we are sure about something (because it is logically necessary).

*If A is bigger than B, and B is bigger than C, then A **must** be bigger than C.*

*Mary keeps crying. She **must** have some problem.*

*There's the doorbell. It **must** be Roger.*

*'I'm in love.' 'That **must** be nice.'*

- 2 In questions and negatives, we use *can* and *can't* with this meaning, not *must* and *mustn't*.

*'There's somebody at the door. Who **can** it be?*

*'It **can't** be the postman. It's only seven o'clock.'*

*What do you think this letter **can** mean?*

- 3 We use must have + past participle for deductions about the past (*can have* in questions and negatives).

must/can/can't have + past participle

*'We went to Rome last month.' 'That **must have been** nice.'*

*I don't think he **can have heard** you. Call again.*

*Where **can** John **have put** the matches? He **can't** have thrown them away.*

## 211 names and titles

We can use names and titles when we talk about people, and when we talk to them. There are differences.

- 1 Talking about people

When we talk about people, we can name them in four ways.

a **First name.**

This is informal. We use first names mostly to talk about friends and children.

*Where's **Peter**? He said he'd be here at three.  
How's **Maud** getting on at school?*

b **First name + surname.**

This can be formal or informal.

*Isn't that **Peter Connolly**, the actor?  
We're going on holiday with **Mary and Daniel Sinclair**.*

c **Title (Mr, Mrs etc) + surname.**

This is more formal. We talk like this about people we do not know, or when we want to show respect or be polite.

*Can I speak to **Mr Lewis**, please?  
We've got a new teacher called **Mrs Campbell**.  
Ask **Miss Andrews** to come in, please.  
Dear **Ms Sanders**, ...*

d **Surname only.**

We often use just the surname to talk about public figures — politicians, sportsmen and sportswomen, writers and so on.

*I don't think **Eliot** is a very good dramatist.  
The women's marathon was won by **Waitz**.*

We sometimes use surnames alone for employees (especially male employees), and for members of all-male groups (for example footballers, soldiers, schoolboys).

*Tell **Patterson** to come and see me at once.  
Let's put **Billows** in goal and move **Carter** up.*

2 **Talking to people**

When we talk to people, we can name them in two ways.

a **First name.**

This is usually friendly and informal.

*Hello, **Pamela**. How are you?*

b **Title + surname.**

This is more formal or respectful.

*Good morning, **Mr Williamson.***

Note that we do not usually use both the first name and the surname of people we are talking to. It would be unusual to say '*Hello, **Peter Matthews***', for example.

Note also that we do not normally use *Mr*, *Mrs*, *Miss* or *Ms* alone. If you want to speak to a stranger, for example, just say *Excuse me*, not *Excuse me, Mr* or *Excuse me, Mrs* (see 3 below).

**3 Titles**

Note the pronunciations of the titles:

*Mr* /'mɪstə(r)/    *Mrs* /'mɪsɪz/    *Miss* /mɪs/    *Ms* /mɪz, məz/

*Mr* (= *Mister*) is not usually written in full, and the others cannot be.

*Ms* is used to refer to women who do not wish to have to say whether they are married or not.

*Dr* (/ˈdɒktə(r)/) is used as a title for doctors (medical and other).

*Professor* (abbreviated *Prof*) is used only for certain high-ranking university teachers.

Note that the wives and husbands of doctors and professors do not share their partners' titles. We do not say, for example, *Mrs Dr Smith*.

*Sir* and *madam* are used mostly by shop assistants. Some employees call their male employers *sir*, and some schoolchildren call their male teachers *sir*. (Female teachers are often called *miss*.)

*Dear Sir* and *Dear Madam* are ways of beginning letters (see 192). In other situations *sir* and *madam* are unusual.

*Excuse me. Could you tell me the time?* (NOT ~~*Excuse me, sir.*~~ . . .)

**212 nationality words**

For each country, you need to know four words:

a. the adjective

**American** civilization    **French** perfume    **Danish** bacon

b. the singular noun (used for a person from the country)

an **American**    a **Frenchman**    a **Dane**

c. the plural expression *the* . . . (used for the nation)

**the Americans**    **the French**    **the Danes**

d. the name of the country

**America** OR **The United States**    **France**    **Denmark**

The name of the language is often the same as the adjective.

Do you speak **French**?    **Danish** is difficult to pronounce.

## 214 negative questions

### 1 Structure

auxiliary verb + *n't* + subject . . .

**Doesn't she** understand?

**Haven't you** booked your holiday yet?

auxiliary verb + subject + *not* . . .

**Does she not** understand?

**Have you not** booked your holiday yet?

The forms with *not* are formal.

### 2 Meaning

When we ask a negative question, we often expect the answer *yes*.

**Didn't you go** and see Helen yesterday? How is she?

Negative questions are common in exclamations and invitations.

**Isn't it** a lovely day!

**Won't you** come in for a minute?

We can use negative questions to show that we are surprised that something has not happened, or is not happening.

**Hasn't the postman come** yet?

**Aren't you** supposed to be working?

### 3 Polite requests

We do not usually use negative questions to ask people to do things for us. Compare:

**Can you** help me? (ordinary question: used for a request)

**You can't** help me, **can you**? (negative statement + question tag: common in spoken requests)

**Can't you** help me? (negative question: has a critical meaning — like *Why can't you help me?*)

See 286 for more information about polite requests.

### 4 *yes* and *no*

We answer negative questions like this.

**'Haven't you** written to Mary?

**'Yes.'** (= *I have written to her.*)

**'No.'** (= *I haven't written to her.*)

**'Didn't** the postman come?

**'Yes.'** (= *He came.*) **'No.'** (= *He didn't come.*)

## 215 negative structures

### 1 Negative verbs

We make negative verbs with auxiliary verb + *not*.

We **have not** forgotten you.

It **was not** raining.

In an informal style, we use contracted negatives with *n't* (see 90).

We **haven't** forgotten you.

It **wasn't** raining.

If there is no auxiliary verb, we use *do* with *not*.

I like the salad, but I **don't** like the soup.

### 2 Imperatives

We make negative imperatives with *do not* or *don't* + infinitive (see 170).

**Don't worry** — I'll look after you. (NOT ~~Worry not~~ . . . )

**Don't believe** a word he says.

**Don't be** rude. (See 57.)

### 3 Infinitives and -ing forms

We put *not* before infinitives and *-ing* forms. *Do* is not used.

It's important **not to worry**. (NOT . . . ~~to don't worry~~.)

The best thing on holiday is **not working**.

### 4 Other parts of a sentence

We can put *not* with other parts of a sentence, not only a verb.

Ask the vicar, **not his wife**.

Come early, but **not before six**.

It's working, but **not properly**.

We do not usually put *not* with the subject. Instead, we use a structure with *it* (see 111).

**It was not George** that came, but his brother.

(NOT ~~Not George~~ came, but his brother.)

For the difference between *not* and *no* with nouns, see 222.

### 5 Other negative words

Other words besides *not* can give a clause a negative meaning.

Compare:

He's **not** at home.

He's **never** at home.

He's **seldom/rarely/hardly ever** at home.

We do not use the auxiliary *do* with these **other words**.

Compare:

He **doesn't work**.

He never **works**.

(NOT ~~He **does never work**~~.)

He seldom/rarely/hardly ever **works**.

## 6 **some and any, etc**

We do not usually use *some, somebody, someone, something or somewhere* in questions and negative sentences. Instead, we use *any, anybody* etc. (See 314.)

Compare:

I've found **some** mushrooms.

I **haven't** found **any** mushrooms.

## 7 **think, believe, suppose, imagine and hope**

When we introduce negative ideas with *think, believe, suppose* and *imagine*, we usually make the first verb (*think* etc) negative, not the second.

I **don't think** you've met my wife.

(NOT ~~+think you **haven't** met my wife~~.)

I **don't believe** she's at home.

*Hope* is an exception (see 162).

I **hope** it **doesn't** rain.

(NOT ~~+**don't hope** it rains~~.)

Short answers are possible with *not* after the verb.

'Will it rain?' 'I **hope not**.'

With *believe, imagine* and *think*, we prefer the structure with *not . . . so* (see 311).

'Will it rain?' 'I **don't think so**.'

▷ For negative questions, see 214.

## 216 **neither (of): determiner**

- 1 We use *neither* before a singular noun to mean 'not one and not the other'.

*neither* + singular noun

'Can you come on Monday or Tuesday?' 'I'm afraid **neither day** is possible.'

- 2 We use *neither of* before another determiner (for example *the, my, these*), and before a pronoun. The noun or pronoun is plural.

*neither of* + determiner + plural noun  
*neither of* + pronoun

**Neither of my brothers** can sing.

**Neither of us** saw it happen.

After *neither of* + noun/pronoun, we use a singular verb in a formal style.

*Neither of my sisters* **is** married.

In an informal style, a plural verb is possible.

*Neither of my sisters* **are** married.

- 3 We can use *neither* alone, without a noun or pronoun.

'Which one do you want?' **Neither.**

## 217 neither, nor and not . . . either

- 1 We use *neither* and *nor* to mean 'also not'. They mean the same. *Neither* and *nor* come at the beginning of a clause, and are followed by auxiliary verb + subject.

*neither/nor* + auxiliary verb + subject

'I can't swim.' **Neither** can I. (NOT + ~~also can't~~)

'I don't like opera.' **Nor** do I. (NOT + ~~don't too~~)

- 2 We can use *not . . . either* with the same meaning.

'I can't swim.' 'I **can't either.**'

'I don't like opera.' 'I **don't either.**'

- ▷ For other uses of *either*, see 106; 107.  
 For *so am I, so do I* etc, see 312.

## 218 neither . . . nor . . .

We use this structure to join two negative ideas. (It is the opposite of *both . . . and . . .*.)

**Neither** James **nor** Virginia was at home.

I **neither** smoke **nor** drink.

The film was **neither** well made **nor** well acted.

In an informal style, we can use a plural verb after two subjects joined by *neither . . . nor . . .*

*Neither* James *nor* Virginia **were** at home.

## 219 next and nearest

- 1 *Nearest* is used for place — it means 'most near in space'.

*Excuse me. Where's the **nearest** tube station?*

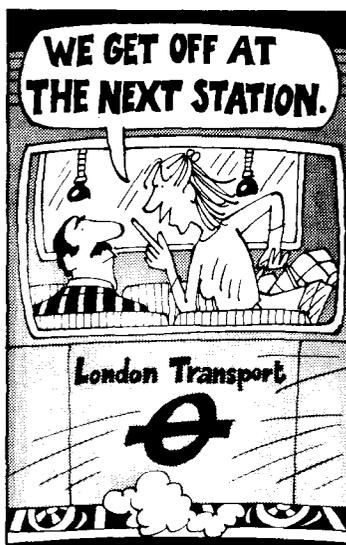

(NOT ... ~~the next tube station?~~)

*If you want to find Alan, just look in the **nearest** pub.*

*Next* is usually used for time — it means 'nearest in the future'.

*We get off at the **next station** (= the station that we will reach first)*

*I'm looking forward to her **next** visit.*

- 2 We use *next* in a few expressions to mean 'nearest in space'.

The most common are *next door* and *next to*.

*My girl-friend lives **next door**.*

*Come and sit **next to** me.*

## 220 next and the next

*Next week, next month* etc is the week or month just after this one. If I am speaking in July, *next month* is August; if I am speaking in 1985, *next year* is 1986. (Note that prepositions are not used before these time-expressions.)

*Goodbye! See you **next week**!*

*I'm spending **next Christmas** with my family.*

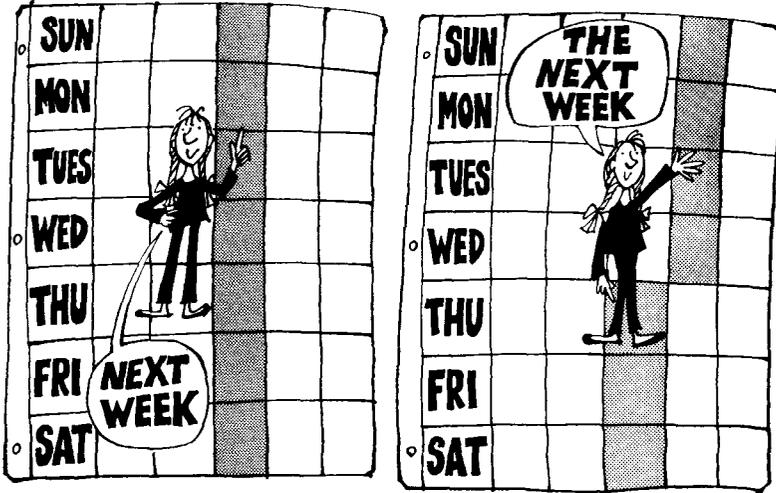

***Next year** will be difficult. (= the year starting next January)*

*The next week, the next month* etc can mean the period of seven days, thirty days etc starting at the moment of speaking. On July 15th, 1985,

*the next month* is the period from July 15th to August 15th; *the next year* is the period from July 1985 to July 1986.

*I'm going to be very busy for **the next week**.* (= the seven days starting today)

***The next year** will be difficult.* (= the twelve months starting now)

▷ For the difference between *last* and *the last*, see 190.

## 221 no and none

1 We use *no* (= 'not a', 'not any') immediately before a noun.

*no + noun*

**No** *aeroplane* is 100% safe.

There's **no time** to talk about it now.

Before another determiner (for example *the, my, this*), we use *none of*.

We also use *none of* before a pronoun.

*none of + determiner + noun*  
*none of + pronoun*

**None of the** keys would open the door.

**None of my** brothers remembered my birthday.

**None of us** speaks French.

When we use *none of* with a plural noun, the verb can be singular (more formal) or plural (more informal).

None of my **friends is/are** interested.

- 2 We can use *none* alone, without a noun.  
‘How many of the books have you read?’ **None.**
- 3 When we are talking about two people or things, we use *neither*, not *none* (see 216).  
**Neither of my parents could be there.**  
(NOT **None of** . . .)
- ▷ For *no* and *not a/not any*, see 223.

## 222 no and not

If we want to make a word, expression or clause negative, we use *not*.

**Not surprisingly**, we missed the train.  
(NOT ~~**No surprisingly**~~, . . .)  
The students went on strike, but *not* the teachers.  
(NOT . . . ~~but **no the teachers**~~.)  
I can see you tomorrow, but **not on Thursday**.  
I **have not** received his answer.

We can use *no* with a noun to mean ‘not a’ or ‘not any’ (see 223).

**No teachers** went on strike. (= There were **not any** teachers on strike.)  
I’ve got **no Thursdays** free this term. (= . . . **not any** Thursdays . . .)  
I telephoned, but there was **no answer**. (= . . . **not an** answer.)

Sometimes *verb + not* and *no + noun* can give a similar meaning.

There **wasn’t an answer**. / There **was no answer**.

We can use *no* with an *-ing* form.

**NO SMOKING**

## 223 no and not a/not any

- 1 *No* is a determiner (see 96). We use *no* before singular (countable and uncountable) nouns and plural nouns.  
*No* means the same as *not a* or *not any*, but we use *no*:  
(a) at the beginning of a sentence  
(b) when we want to make the negative idea emphatic.
- a **No cigarette** is completely harmless.  
(NOT ~~**Not any cigarette**~~ . . .)  
**No beer?** How do you expect me to sing without beer?  
**No tourists** ever come to our village.
- b I can’t get there. There’s **no bus**.  
(More emphatic than *There isn’t a bus*.)  
Sorry I can’t stop. I’ve got **no time**.  
There were **no letters** for you this morning, I’m afraid.

- 2 *Nobody, nothing, no-one* and *nowhere* are used in similar ways to *no*. Compare:

**Nobody** came. (NOT ~~**Not anybody** came.~~)

I saw **nobody**. (More emphatic than *I didn't see anybody*.)

- 3 We only use *no* immediately before a noun. In other cases we use *none (of)*. See 221.

## 224 no more, not any more, no longer, not any longer

We use *no more* to talk about quantity or degree — to say 'how much'.

There's **no more** bread. She's **no more** a great singer than I am.

We do not use *no more* to talk about time. Instead, we use *no longer* (usually before the verb), *not . . . any longer*, or *not . . . any more*.

I **no longer** support the Conservative Party. (NOT ~~+no more . . .~~)

This **can't** go on **any longer**.

Annie **doesn't** live here **any more**. (*Not . . . any more* is informal.)

## 225 non-progressive verbs

- 1 Some verbs are never used in progressive forms.

I **like** this music. (NOT ~~**I'm liking** this music.~~)

Other verbs are not used in progressive forms when they have certain meanings. Compare:

I **see** what you mean. (NOT ~~**I'm seeing** what you mean.~~)

**I'm seeing** the doctor at ten o'clock.

Many of these 'non-progressive' verbs refer to mental activities (for example *know, think, believe*). Some others refer to the senses (for example *smell, taste*).

- 2 The most important 'non-progressive' verbs are:

*like dislike love hate prefer want wish*

*surprise impress please*

*believe feel (see 128) imagine know mean realize*

*recognize remember suppose think (see 346) understand*

*hear see (see 290) smell (see 310) sound (see 318)*

*taste (see 340)*

*weigh (= 'have weight') belong to contain depend on*

*include matter need owe own possess*

*appear seem be (see 59)*

- 3 We often use *can* with *see, hear, feel, taste* and *smell* to give a 'progressive' meaning. See 81.

## 226 noun + noun

### 1 Structure

It is very common in English to put two nouns together without a preposition.

*tennis shoes a sheepdog the car door orange juice*

The first noun is like an adjective in some ways. Compare:

*a race-horse* (= a sort of horse)

*a horse-race* (= a sort of race)

*a flower garden* (= a sort of garden)

*a garden flower* (= a sort of flower)

*milk chocolate* (= something to eat)

*chocolate milk* (= something to drink)

The first noun is usually singular in form, even if the meaning is plural.

*a shoe-shop* (NOT ~~*a shoes-shop*~~)

*a bus-stop* (NOT ~~*a buses-stop*~~)

Some common short noun + noun expressions are written as one word (for example *sheepdog*). Others are written with a hyphen (for example *horse-race*) or separately (for example *milk chocolate*). There are no very clear rules, and we can often write an expression in more than one way. To find out what is correct in a particular case, look in a good dictionary.

### 2 Meaning

The first noun can modify the second in many different ways. It can say what the second is made of or from:

*milk chocolate a glass bowl*

or where it is:

*a table lamp Oxford University*

or when it happens:

*a daydream afternoon tea*

or what it is for:

*car keys a conference room*

### 3 Noun + noun + noun + noun . . .

We can put three, four or more nouns in a group.

*road accident research centre* (= a centre for research into accidents on roads)

Newspaper headlines often have this structure.

*HELICOPTER CRASH PILOT DEATH FEAR*

#### 4 Other structures

It is not always easy to know whether to use the noun + noun structure (for example *the chair back*), the *of*-structure (for example *the back of his head*) or the possessive structure (for example *John's back*). The rules are very complicated; experience will tell you which is the correct structure in a particular case.

## 227 numbers

### 1 Fractions

We say fractions like this:

$\frac{1}{8}$  *one eighth*     $\frac{3}{7}$  *three sevenths*  
 $\frac{2}{5}$  *two fifths*     $\frac{11}{16}$  *eleven sixteenths*

We normally use a singular verb after fractions below 1.

*Three quarters of a ton **is** too much.*

We use a plural noun with fractions and decimals over 1.

*one and a half **hours** (NOT ~~one and a half hour~~)*  
*1.3 **millimetres** (NOT ~~1.3 millimetre~~)*

### 2 Decimals

We say decimal fractions like this:

*0.125 **nought point one two five***  
 (NOT ~~0,125 — nought comma one two five~~)  
*3.7 **three point seven***

### 3 nought, zero, nil etc

The figure 0 is usually called *nought* in British English, and *zero* in American English.

When we say numbers one figure at a time, 0 is often called *oh* (like the letter O).

*My account number is four one three **oh** six.*

In measurements of temperature, 0 is called *zero*.

***Zero** degrees Centigrade is thirty-two degrees Fahrenheit.*

Zero scores in team games are called *nil* (American *zero*).

Zero in tennis and similar games is called *love*.

### 4 Telephone numbers

We say each figure separately. When the same figure comes twice, we usually say *double* (British English only).

*307 4922 **three oh seven four nine double two.***

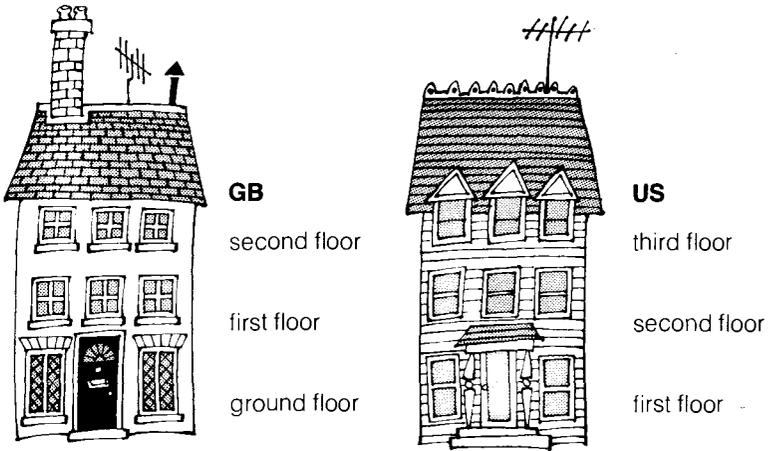

## 5 Kings and Queens

We say the numbers like this:

Henry VIII    Henry **the Eighth** (NOT ~~Henry Eight~~)  
 Louis XIV    Louis **the Fourteenth**

## 6 Floors

The ground floor of a British house is the first floor of an American house; the British first floor is the American second floor, etc.

## 7 and

In British English, we use *and* between the hundreds and the tens in a number.

310    three hundred **and** ten (US three hundred ten)  
 5,642    five thousand, six hundred **and** forty-two

Note that in writing we use commas (,) to separate thousands.

## 8 a and one

We can say *a hundred* or *one hundred*, *a thousand* or *one thousand*. *One* is more formal.

I want to live for **a** hundred years.  
 (NOT . . . *for hundred years*.)

Pay Mr J Baron **one** thousand pounds. (on a cheque)

We only use *a* at the beginning of a number. Compare:

**a** hundred    three thousand **one** hundred

We can use *a* with other measurement words.

**a** pint    **a** foot    **a** mile

## 9 Plurals without -s

After a number or determiner, *hundred*, *thousand*, *million* and *dozen* have no final -s. Compare:

*five **hundred** pounds*  
***hundreds** of pounds*  
*several **thousand** times*  
*It cost **thousands**.*

Other number expressions have no -s when they are used as adjectives.

*a five-**pound** note*    *a three-**mile** walk*

## 10 Measurements

We use *be* in measurements.

*She's five feet eight (inches tall).*  
*I'm sixty-eight kilos.*  
*What shoe size **are** you?*

In an informal style, we often use *foot* instead of *feet* when we talk about people's heights.

*My father's six **foot** two.*

## 11 Money

*1p one penny (informal: one p /pi:/) or a penny*  
*5p five pence (informal: five p)*  
*£3.75 three pounds seventy-five*

When we use sums of money as adjectives, we use singular forms.

*a five-**pound** note* (NOT *a five-**pounds** note*)

## 12 Adjectives

When expressions of measurement, amount and quantity are used as adjectives, they are normally singular.

*a ten-**mile** walk* (NOT *a ten-**miles** walk*)  
*six two-**hour** lessons*  
*a three-**month**-old baby*

We can use possessives in expressions of time.

*a **week's** holiday*    *four **days'** journey*

## 13 *there are* . . .

When we count the number of people in a group, we often use the structure *there are* + number + *of* + pronoun.

***There are** only **seven of us** here today.*  
***There were** **twelve of us** in my family.*  
 (NOT *We were twelve . . .*)

## 14 Spoken calculations

Common ways of calculating are:

$2 + 2 = 4$	<i>two and two is/are four</i> (informal)
	<i>two plus two equals four</i> (formal)
$7 - 4 = 3$	<i>four from seven is three</i> (informal)
	<i>seven minus four equals three</i> (formal)
$3 \times 4 = 12$	<i>three fours are twelve</i> (informal)
	<i>three multiplied by four equals twelve</i> (formal)
$9 \div 3 = 3$	<i>nine divided by three equals three</i>

▷ For ways of saying and writing dates, see 95.

## 228 once

When *once* has the indefinite meaning 'at some time', we use it to talk about the past, but not the future. Compare:

*I met her **once** in Venezuela.*

***Once** upon a time there were three baby rabbits . . .*

*Come up and see me **some time**. (NOT . . . ~~once-~~)*

*We must have a drink together **one day**. (NOT . . . ~~once-~~)*

## 229 one and you: indefinite personal pronouns

- 1 We can use *one* or *you* to talk about people in general.

***You** can't learn a language in six weeks.*

***One** can't learn a language in six weeks.*

*One* is more formal.

- 2 *One* and *you* mean 'anybody (including the speaker)'. They are only used to talk about people in general. We do not say *you* or *one* when we are talking about one person, or a group which could not include the speaker. Compare:

***One** usually knocks at a door before going into somebody's house.*

***Somebody's** knocking at the door. (NOT ~~One is knocking~~ . . .)*

***One** can usually find people who speak English in Sweden.*

*English **is spoken** in this shop. (NOT ~~One speaks English-~~ The meaning is not 'people in general'.)*

***One** has to believe in something.*

*In the sixteenth century **people** believed in witches.*

*(NOT . . . ~~one believed~~ . . . The group could not include the speaker.)*

- 3 *One* can be a subject or object; there is a possessive *one's*, and a reflexive pronoun *oneself*.

*He talks to **one** like a teacher. **One's** family can be very difficult.*

*One should always give **oneself** plenty of time to pack.*

## 230 one: substitute word

- 1 We often use *one* instead of repeating a noun.

*I'm looking for a flat. I'd like **one** with a garden.*

(= ... a flat with a garden.)

*'Can you lend me a pen?' 'Sorry, I haven't got **one**.'*

*'Which is your child?' 'The **one** in the blue coat.'*

- 2 We only use *a/an* before *one* if there is an adjective. Compare:

*I'd like **a big one** with cream on.*

*I'd like **one** with cream on. (NOT ... ~~a one~~ ...)*

- 3 There is a plural *ones*, used after *the* or an adjective.

*'Which shoes do you want?' 'The **ones** at the front of the window.'*

*How much are the red **ones**?*

Compare:

*I've got five green **ones**.*

*I've got five. (NOT ... ~~five ones~~.)*

- 4 We only use *one* for countable nouns. Compare:

*If you haven't got a fresh chicken I'll take a frozen **one**.*

*If you haven't got fresh milk I'll take tinned. (NOT ... ~~tinned one~~.)*

## 231 other and others

When *other* is an adjective, it has no plural.

*Where are the **other** photos? (NOT ... the ~~others~~ photos?)*

*Have you got any **other** colours?*

When *other* is used alone, without a noun, it can have a plural.

*Some grammars are easier to understand than **others**.*

*I'll be late. Can you tell the **others**?*

▷ For *another*, see 33.

## 232 ought

### 1 Forms

*Ought* is a 'modal auxiliary verb' (see 202). The third person singular has no -s.

*She **ought** to understand.*

We usually make questions and negatives without *do*.

***Ought we** to go now? (NOT ~~Do we ought~~ ... ?)*

*It **oughtn't** to rain today.*

After **ought**, we use the infinitive with *to*. (This makes *ought* different from other modal auxiliary verbs.)

*You **ought to see** a dentist.*

## 2 Obligation

We can use *ought* to advise people (including ourselves) to do things; to tell people that they have a duty to do things; to ask about our duty. The meaning is similar to the meaning of *should* (see 294); not so strong as *must* (see 208).

*What time **ought I** to arrive?*

*I really **ought to** phone Mother.*

*People **ought not to** drive like that.*

## 3 Deduction

We can use *ought* to say that something is probable (because it is logical or normal).

*Henry **ought to be** here soon — he left home at six.*

*'We're spending the winter in Miami.' 'That **ought to be** nice.'*

## 4 *ought to have* . . .

We can use *ought + perfect infinitive* to talk about the past. This structure is used to talk about things which did not happen, or which may or may not have happened (see 202.3).

*ought to + have + past participle*

*I **ought to have phoned** Ed this morning, but I forgot.*

*Ten o'clock: she **ought to have arrived** at her office by now.*

▷ For the differences between *ought*, *should* and *must*, see 295.

## 233 own

- 1 We only use *own* after a possessive word.

*It's nice if a child can have **his own** room.*

(NOT . . . **an-own room**.)

*I'm **my own** boss.*

- 2 Note the structure *a . . . of one's own*.

*It's nice if a child can have **a room of his own**.*

*I'd like to have **a car of my own**.*

- 3 We can use *own* without a following noun.

*'Would you like one of my cigarettes?' 'No thanks. I prefer **my own**.'*

## 234 participles: 'present' and 'past' participles (-ing and -ed)

### 1 'Present' participles:

*breaking going drinking making beginning  
opening working stopping*

For rules of spelling, see 321; 322.

When *-ing* forms are used like nouns, they are often called *gerunds*. For details, see 180.1.

### 2 'Past' participles:

*broken gone drunk made begun opened  
worked stopped*

### 3 The names 'present' and 'past' participle are not very good (although they are used in most grammars). Both kinds of participle can be used to talk about the past, present or future.

*She was **crying** when I saw her. (past)*  
*Who's the man **talking** to Elizabeth? (present)*  
*This time tomorrow I'll be **lying** on the beach. (future)*  
*He was **arrested** in 1972. (past)*  
*You're **fired**. (present)*  
*The new school is going to be **opened** next week. (future)*

### 4 We use participles with auxiliary verbs to make some tenses.

*What are you **doing**?*  
*I've **broken** my watch.*

▷ For other ways of using participles, see the next two sections.

## 235 participles used as adjectives

### 1 We can often use participles as adjectives.

*It was a very **tiring** meeting.*  
*There are **broken** toys all over the floor.*  
*I thought the film was pretty **boring**.*  
*You look terribly **frightened**.*

### 2 Don't confuse pairs of words like *tiring* and *tired*, *interesting* and *interested*, *boring* and *bored*, *exciting* and *excited*.

The present participle ( . . . *-ing*) has an active meaning: if something is **interesting** it **interests** you.

The past participle ( . . . *-ed*) has a passive meaning: an **interested** person **is interested by** (or **in**) something.

Compare:

*I thought the lesson was **interesting**.*  
*I was **interested** in the lesson.*  
 (NOT ~~*I was **interesting** in the lesson.*~~)

*Sheila's party was pretty **boring**.*  
*I went home early because I felt **bored**.*  
 (NOT . . . ~~*because I felt **boring**.*~~)

*It was an **exciting** story.*  
*When I read it I felt **excited**.*

*The explanation was **confusing**. I got **confused**.*  
*It was a **tiring** day. It made me **tired**.*

- 3 There are a few exceptional past participles which can have active meanings. The most important:

***fallen** rocks . . . a **retired** army officer*  
*a **grown-up** daughter . . . an **escaped** prisoner*

## 236 participle clauses

- 1 We can use a participle rather like a conjunction, to introduce a 'participle clause'.

*Who's the fat man **sitting in the corner**?*  
*Do you know the number of people **employed by the government**?*  
***Jumping into a small red sports car**, she drove off.*

- 2 Participle clauses can have different uses. Some of them are 'adjectival': they modify nouns, rather like adjectives or relative clauses (see 280). Compare:

*What's the name of the **noisy** child?* (adjective)  
*What's the name of the child **making the noise**?* (participle clause)  
*What's the name of the child **who is making the noise**?* (relative clause)

Other participle clauses are 'adverbial'. They may express ideas of time, cause, consequence or condition, for example.

***Putting down my newspaper**, I walked over to the window.*  
 (time: one thing happened before another)

*I sat **reading some old letters**.*  
 (time: two things happened at the same time)

***Not knowing what to do**, I telephoned the police.*  
 (reason: *Because I did not know . . .*)

*It rained all the time, **completely ruining our holiday**.*  
 (consequence: . . . *so that it ruined our holiday.*)

***Driven carefully**, the car will do fifteen kilometres to the litre of petrol.*  
 (condition: *If it is driven carefully . . .*)

- 3 The subject of a participle clause is usually the same as the subject of the rest of the sentence.

**Hoping** to surprise her, **I** opened the door very quietly.

(*I hoped to surprise her; I opened the door.*)

**Wanting** some excitement, **Mary** became a pilot.

(*Mary wanted excitement; Mary became a pilot.*)

We do not usually make sentences where the subjects are different. For example, we would probably not say:

**Looking** out of the window, the mountains were beautiful.

(This sounds as if the mountains were looking out of the window.)

- 4 Sometimes a participle clause has its own subject.

A little girl walked past, **her hair blowing** in the wind.

We often use *with* to introduce clauses like this.

A car drove past **with smoke pouring** out of the back.

**With all the family travelling** in America, the house seems very empty.

- 5 We can use conjunctions and prepositions to introduce participle clauses.

**After talking** to you I always feel better.

**Before driving** off, always check your mirror.

**When telephoning** London from abroad, dial 1 before the number.

**On being introduced** to somebody, a British person may shake hands.

I got there **by taking** a new route through Worcester.

- ▷ For *-ing* clauses after see, hear + object (for example *I saw her crossing the road*), see 182.6.

## 237 passive structures: introduction

They **built** this house in 1486. (active)

This house **was built** in 1486. (passive)

Channel Islanders **speak** French and English. (active)

French **is spoken** in France, Belgium, Switzerland, the Channel Islands, ... (passive)

A friend of ours **is repairing** the roof. (active)

The roof **is being repaired** by a friend of ours. (passive)

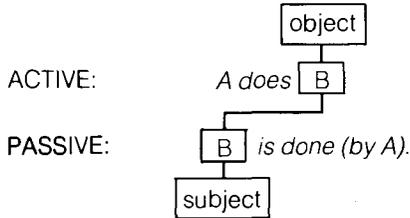

This book **will change** your life

Your life **will be changed** by this book.

When we say what people or things *do*, we use active verbs. (For example *built, speak, is repairing, will change.*)

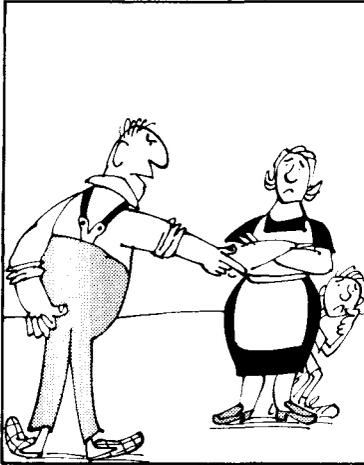

When we say what *happens* to people or things — what *is done* to them — we use passive verbs. (For example *was built, is spoken, is being repaired, will be changed.*)

The object of an active verb corresponds to the subject of a passive verb.

## 2 Active or passive?

We often prefer to begin a sentence with something that is already known, and to put the 'news' at the end. Compare:

*Your little boy broke my kitchen window this morning.*

*That window was broken by your little boy.*

In the first sentence, the hearer does not know about the broken window. So the speaker starts with the little boy, and puts the 'news' — the window — at the end. In the second sentence, the hearer knows about the window, but does not know who broke it. By using a passive structure, we can again put the 'news' at the end.

Another example:

*'John's writing a play.' 'I didn't know that.'*

*'This play was written by Marlowe.' 'Was it? I didn't know that.'*

- 3** To make passive verb forms, we use the auxiliary **be**.  
For details, see next section.
- ▷ For information about the use of *get* as a passive auxiliary, see 143.3.  
For verbs with two objects (for example *give*) in passive structures, see 356.4.  
For prepositions at the end of passive clauses (for example *He's been written to*), see 257.1c.

## 238 passive verb forms

We make passive verb forms with the different tenses of *be*, followed by the past participle (= pp).

TENSE	STRUCTURE	EXAMPLE
simple present	<i>am/are/is + pp</i>	<i>English <b>is spoken</b> here.</i>
present progressive	<i>am/are/is being + pp</i>	<i>Excuse the mess: the house <b>is being painted</b>.</i>
simple past	<i>was/were + pp</i>	<i>I <b>wasn't invited</b>, but I went anyway.</i>
past progressive	<i>was/were being + pp</i>	<i>I felt as if I <b>was being watched</b>.</i>
present perfect	<i>have/has been + pp</i>	<i><b>Has Mary been told?</b></i>
past perfect	<i>had been + pp</i>	<i>I knew why I <b>had been chosen</b>.</i>
future	<i>will be + pp</i>	<i>You <b>will be told</b> when the time comes.</i>
future perfect	<i>will have been + pp</i>	<i>Everything <b>will have been done</b> by Tuesday.</i>
'going to'	<i>going to be + pp</i>	<i>Who's <b>going to be invited?</b></i>

Future progressive passives and perfect progressive passives (*will be being + pp* and *has been being + pp*) are very unusual. Passive tenses follow the same rules as active tenses. Look in the index to see where to find information about the use of the present progressive, present perfect, etc.

## 239 past tense with present or future meaning

A past tense does not always have a past meaning. In some kinds of sentence we use verbs like *I had*, *you went* or *I was wondering* to talk about the present or future.

- 1 After *if* (see 165).

*If I **had** the money now I'd buy a car.*

*If you **caught** the ten o'clock train tomorrow you could be in Edinburgh by supper-time.*

- 2 After *it's time* (see 189), *would rather* (see 370) and *I wish* (see 367).

*Ten o'clock — **it's time** you **went** home.*

*Don't come and see me today — **I'd rather** you **came** tomorrow.*

***I wish I had** a better memory.*

- 3 We can express politeness or respect, when we ask for something, by beginning *I wondered*, *I thought*, *I hoped*, *I was wondering*, *I was thinking* or *I was hoping*.

***I wondered** if you were free this evening.*

***I thought** you might like some flowers.*

***I was hoping** we could have dinner together.*

- 4 If we are talking about the past, we usually use past tenses even for things which are still true, and situations which still exist.

*Are you deaf? I asked how old you **were**.*

*I'm sorry we left Liverpool. It **was** such a nice place.*

*Do you remember that nice couple we met on holiday? They **were** German, **weren't** they?*

## 240 past time: the past and perfect tenses (introduction)

We can use six different tenses to talk about the past:

- the simple past (*I worked*)
- the past progressive (*I was working*)
- the present perfect simple (*I have worked*)
- the present perfect progressive (*I have been working*)
- the past perfect simple (*I had worked*)
- the past perfect progressive (*I had been working*)

The two past tenses (simple past and past progressive) are used to talk about past actions and events.

***I worked** all day yesterday.*

*The boss came in while I **was working**.*

The two present perfect tenses are used to show that a past action or event has some connection with the present.

***I've worked** with children before, so I know what to expect in my new job.*

***I've been working** all day — I've only just finished.*

The past perfect tenses are used for a 'before past' — for things that had already happened before the past time that we are talking about.

*I looked carefully, and realized that I **had seen** her somewhere before.  
I was tired, because I **had been working** all day.*

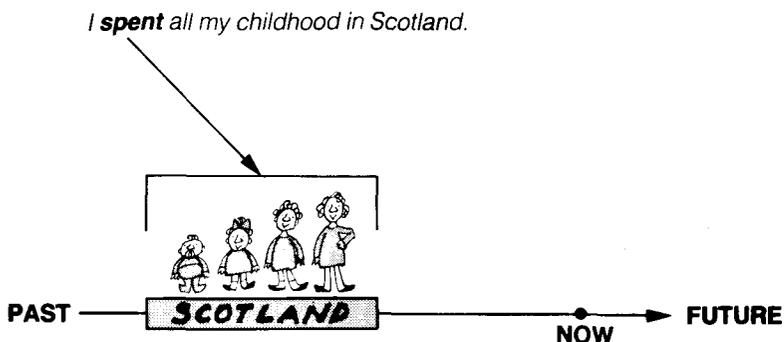

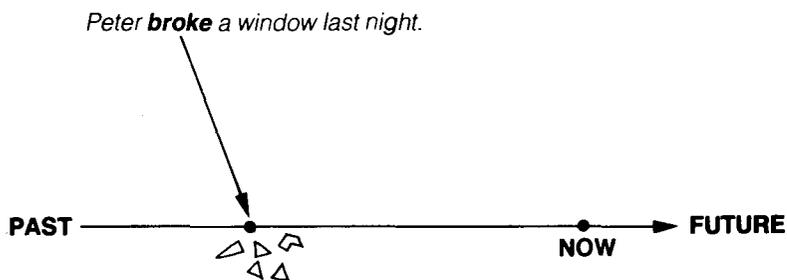

## 241 past time: simple past

### 1 Forms

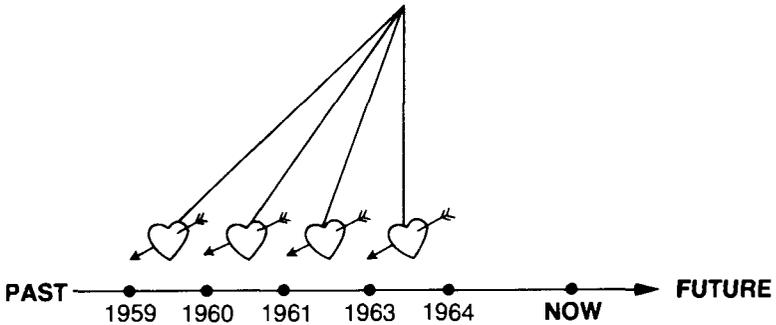

Affirmative	Question	Negative
I worked you worked he/she/it worked, etc	did I work? did you work? did he/she/it work? etc	I did not work you did not work he/she/it did not work, etc

### 2 Meanings

We use the simple past tense to talk about many kinds of past events: short, quickly finished actions and happenings, longer situations, and repeated events.

Regularly every summer, Janet **fell** in love.

We use the simple past in 'narrative' — when we tell stories, and when we tell people about past events.

*Once upon a time there **was** a beautiful princess who **lived** with her father. One day the king **decided** . . .*

*I **saw** John this morning. He **told** me . . .*

(NOT ~~I **have seen** John this morning. He **has told** me . . .~~)

A simple rule: use the simple past tense if you do not have a good reason for using one of the other past or perfect tenses.

## 42 past time: past progressive

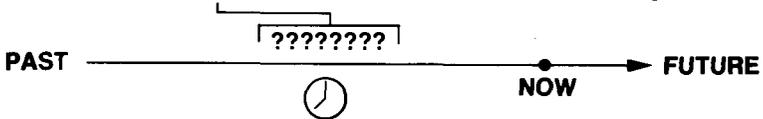

### 1 Forms

Affirmative	Question	Negative
I was working you were working, etc	was I working? were you working? etc	I was not working you were not working, etc

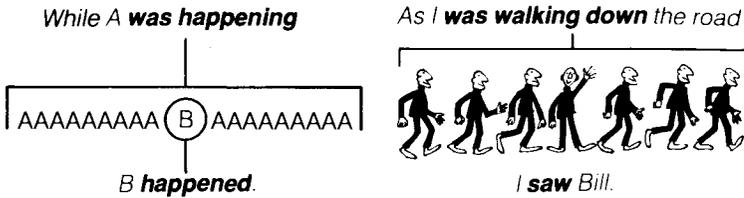

### 2 Meaning

We use the past progressive to say that something was going on around a particular past time.

What **were you doing** at eight o'clock yesterday evening?

We often use the past progressive together with a simple past tense. The past progressive refers to a longer 'background' action or situation; the simple past refers to a shorter action or situation that happened in the middle, or interrupted it.

The phone **rang** while I **was having** dinner.

Some verbs are not used in progressive tenses. (See 225.)

I tried a bit of the cake to see how it **tasted**.

(NOT ... ~~how it **was tasting**~~.)

▷ For **I was wondering** if you could help me, and similar structures, see 239.3.

## 243 past time: present perfect simple

### 1 Forms

Affirmative	Question	Negative
I have worked you have worked, etc	have I worked? have you worked? etc	I have not worked you have not worked, etc

### 2 Meaning

We use the present perfect simple to say that something in the past is connected with the present in some way.

If we say that something *has happened*, we are thinking about the past and the present at the same time.

We could often change a present perfect sentence into a present sentence with the same meaning.

*I've broken my leg.* = *My leg is broken now.*

*Have you read the Bible?* = *Do you know the Bible?*

We do not use the present perfect simple if we are not thinking about the present.

*I saw Lucy yesterday.*

(NOT ~~+have seen Lucy yesterday.~~)

### 3 Finished actions: result now

We often use the present perfect to talk about finished actions, when we are thinking of their present consequences: the results that they have now.

Somebody **has shot** the manager.

The manager is dead.

Other examples:

- Have you read** the Bible? → **Do you know** the Bible?
- Mary **has had** a baby. → Baby.
- I've broken** my leg. → I can't walk.
- Utopia **has invaded** Fantasia. → War.

We often use the present perfect to give news.

*And here are the main points of the news again. The pound **has fallen** against the dollar. The Prime Minister **has said** that the government's economic policies are working. The number of unemployed **has reached** five million. There **has been** a fire . . .*

#### 4 Finished actions: time up to now

We often use the present perfect to ask if something has *ever* happened; to say that it has happened *before*; or that it has *never* happened; or *not since* a certain date; or *not for* a certain period; to ask if it has happened *yet*; or to say that it has happened *already*.

**Have you ever seen** a ghost?

**I've never seen** a ghost.

*I'm sure **we've met before**. We **haven't had** a holiday **for** ages.*

*I **haven't seen** Peter **since** Christmas.*

***'Has Ann come yet?'** 'Yes, she **has already arrived**.'*

## 5 Repeated actions up to now

We use the present perfect to say that something has happened several times up to the present.

*I've written six letters since lunchtime.*

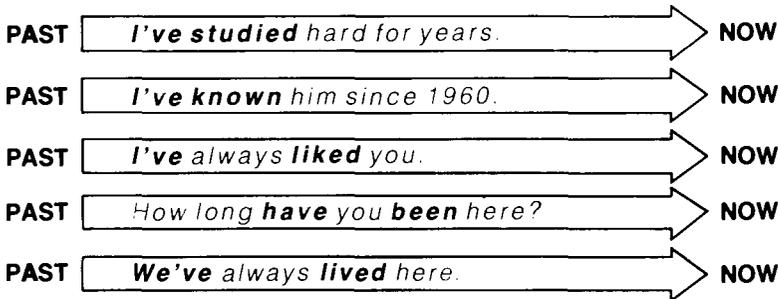

PAST —————> NOW

How often **have you been** in love in your life?

## 6 Actions and states continuing up to now

We use the present perfect to talk about actions, states and situations which started in the past and still continue.

We also use the present perfect progressive in this way.  
For the difference, see 244.4.

Do not use the simple present to say how long something has gone on.

*I've known him since 1960.* (NOT ~~I know him~~ . . .)

## 7 Present perfect not used

We do *not* use the present perfect with adverbs of finished time (like *yesterday, last week, then, three years ago, in 1960*).

*I saw Lucy yesterday.* (NOT ~~I have seen Lucy yesterday~~.)

Tom **was** ill **last week**. (NOT ~~Tom has been ill last week~~.)

What **did** you **do then**? (NOT ~~What have you done then?~~)

She **died three years ago**. (NOT ~~She has died three years ago~~.)

He **was born in 1960**. (NOT ~~He has been born in 1960~~.)

We do not use the present perfect in 'narrative' — when we tell stories, or give details of past events. (See 241.)

▷ For the structure *This is the first time I have . . .*, see 246.

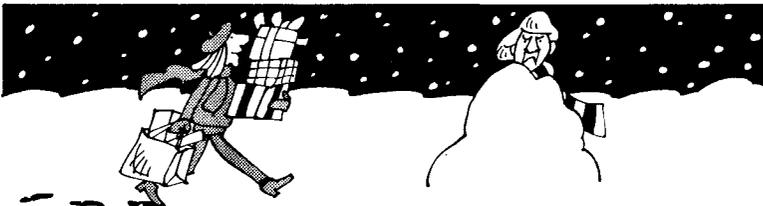

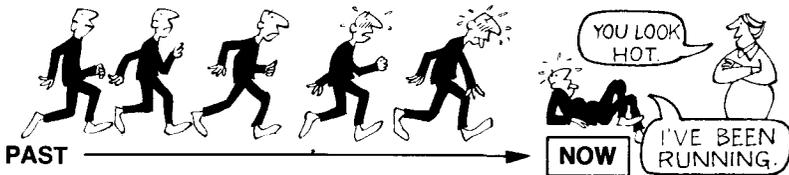

## 244 past time: present perfect progressive

### 1 Forms

Affirmative	Question	Negative
I have been working you have been working, etc	have I been working? have you been working? etc	I have not been working, etc

### 2 Meaning

We use the present perfect progressive to talk about actions, states and situations which started in the past and still continue, or which have just stopped.

*Have you been waiting long?*

### 3 *since* and *for*

We often use the present perfect progressive with *since* or *for*, to say how long something has been going on.

***It's been raining*** non-stop ***since*** Monday.

***It's been raining*** non-stop ***for*** three days.

***We've been living*** here ***since*** July.

***We've been living*** here ***for*** two months.

We use *since* when we mention the *beginning* of the period (for example *Monday, July*).

We use *for* when we mention the *length* of the period (for example *three days; two months*).

For the differences between *since*, *for*, *from* and *ago*, see 133.

### 4 Present perfect simple and progressive

We can use both the present perfect simple and the present perfect progressive to talk about actions and situations which started in the past and which still continue.

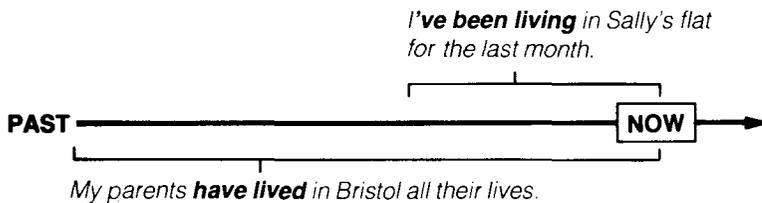

We prefer the present perfect progressive for more temporary actions and situations; when we talk about more permanent (long-lasting) situations, we prefer the present perfect simple. Compare:

That man's ***been standing*** on the corner all day.

For 900 years, the castle ***has stood*** on the hill above the village.

• I ***haven't been working*** very well recently.

• He ***hasn't worked*** for years.

Some verbs are not used in progressive forms (see 225).

***I've only known*** her for two days.

(NOT ~~*I've only been knowing*~~ her ...)

***I've had*** a cold since Monday. (NOT ~~*I've been having*~~ ...)

### 5 Present perfect progressive and present

To say how long something has been going on, we can use the present perfect progressive, but not the present.

***I've been working*** since six this morning. (NOT ~~*I am working*~~ ...)

***She's been learning*** English for six years.

(NOT ~~*She learns*~~ English for ...)

## 245 past time: past perfect simple and progressive

### 1 Forms

#### Past perfect simple

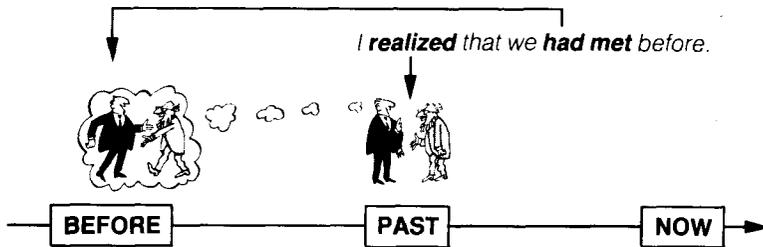

Affirmative	Question	Negative
I had worked you had worked he had worked, etc	had I worked? had you worked? had he worked? etc	I had not worked you had not worked, etc

#### Past perfect progressive

Affirmative	Question	Negative
I had been working you had been working, etc	had I been working? had you been working? etc	I had not been working, etc

### 2 Meaning

We use the past perfect simple to 'go back' to a 'second past'. If we are already talking about the past, we use the past perfect simple to talk about things that had *already happened* at the time we are talking about.

We often use the past perfect simple in reported speech, to talk about things that *had already happened* at the time when we were talking or thinking.

*I told her that I had finished.*

*I wondered who had left the door open.*

*I thought I had sent the cheque a week before.*

### 3 Past perfect progressive

We use the past perfect progressive to talk about longer actions or situations, which had continued up to the past moment that we are thinking about.

*When I found Mary, she **had been crying** for several hours.*

### 4 if etc

After *if, if only, wish* and *would rather*, the past perfect is used to talk about things that did not happen. (See 165, 167, 367 and 370.)

*If I **had gone** to university I would have studied medicine.*

*I **wish** you **had told** me the truth.*

## 246 perfect tenses with **this is the first time . . .**, etc

### 1 We use a present perfect tense after the following expressions:

*This/that/it is the first/second/third/fourth/etc*

*This/that/it is the only . . .*

*This/that/it is the best/worst/finest/most interesting/etc*

Examples:

*This is **the first time** (that) I've **heard** her sing.*

(NOT . . . ~~that I **hear** her sing.~~)

*That's **the third time** you've **asked** me that question.*

(NOT . . . ~~the third time you **ask** me . . .~~)

*It's one of **the most interesting** books I've **ever read**.*

### 2 When we talk about the past, we use a past perfect tense after the same expressions.

*It was **the third time** he **had been** in love that year.*

(NOT . . . ~~the third time he **was** . . .~~)

## 247 personal pronouns (*I, me, it* etc)

### 1 The words *I, me, you, he, him, she, her, it, we, us, they* and *them* are called 'personal pronouns'. This is not a very good name: these words are used for both persons and things.

- 2 *Me, you, him, her, us* and *them* are not only used as objects. We can use them in other ways (see 331).

'Who's there?' **Me.** I'm older than **her.**

- 3 We can use *it* to refer to a person when we are identifying somebody (saying who somebody is). Compare:

'Who's that?' **It's** John Cook. **He's** a friend of my father's.  
(NOT ~~**He's** John Cook.~~ NOT ~~**It's** a friend . . .~~)

- 4 We use *it* to refer to *nothing, everything* and *all*.

*Nothing* happened, did **it**?  
*Everything's* all right, isn't **it**?  
I did all I could, but **it** wasn't enough.

- 5 We use *it* as an 'empty' subject (with no meaning) to talk about time, weather, temperature and distances.

**It's** ten o'clock.  
**It's** Monday again.  
**It** rained for three days.  
**It's** thirty degrees.  
**It's** ten miles to the nearest petrol station.

- 6 *It* can mean 'the present situation'.

**It's** terrible — everybody's got colds, and the central heating isn't working.  
Isn't **it** lovely here!

- 7 We cannot leave out personal pronouns.

**It's** raining. (NOT ~~**ts** raining.-)~~  
**She** loved the picture because **it** was beautiful.  
(NOT . . . ~~**because was beautiful.**~~)  
They arrested him and put **him** in prison.  
(NOT . . . ~~**put in prison.**~~)  
'Have some chocolate.' 'No, I don't like **it.**'  
(NOT . . . ~~**I don't like.**~~)

Note that **we** do not always put *it* after *I know*.

'It's getting late.' **I know.** (NOT ~~**+know it.**~~)

- 8 One subject is enough. We do not normally need a personal pronoun if there is already a subject in the clause.

*My car* is parked outside. (NOT ~~**My car it is parked** . . .~~)  
*The boss* really makes me angry. (NOT ~~**The boss he really** . . .~~)  
*The situation* is terrible. (NOT ~~**it is terrible the situation.**~~)

For the use of *it* as a 'preparatory subject' for an infinitive or a clause, see 187.

- 9 We do not use personal pronouns together with relative pronouns. (See 277.1.)

*That's the girl **who** lives in the flat upstairs.*

(NOT *That's the girl **who she** lives . . .*)

*Here's the money (**that**) you lent me.*

(NOT *Here's the money (**that**) you lent **it** me.*)

- ▷ For the use of *they*, *them* and *their* to refer to *somebody*, *anybody* etc, see 307.  
For the use of *he* and *she* to refer to animals etc, see 141.  
For the 'indefinite' personal pronoun *one*, see 229.

## 248 play and game

A *play* is a piece of literature written for the theatre or television.

*Julius Caesar is one of Shakespeare's early **plays**.*

A *game* is, for example, chess, football, or bridge.

*Chess is a very slow **game**.* (NOT . . . *a very slow **play***.)

Verbs: people *act* in plays or films, and *play* games.

*My daughter is **acting** in her school play.*

*Have you ever **played** rugby football?*

## 249 please and thank you

- 1 We use *please* to make a request more polite.

*Could I have some more, **please**?*

*'Would you like some wine?' 'Yes, **please**.'*

Note that *please* does not change an order into a request.

*Stand over there.* (order) **Please** *stand over there.* (polite order)

For details of how to make requests, see 286.

- 2 We do not use *please* to ask people what they said. (See 121.)

*'I've got a bit of a headache.' 'I beg your pardon?'* (NOT . . . ***Please?***)

We do not use *please* when we give things to people.

*'Have you got a light?' 'Yes, here you are.'* (NOT . . . ***Please!***)

We do not use *please* as an answer to *Thank you*. (See 4 below.)

*'Thanks a lot.' 'That's OK.'* (NOT . . . ***Please!***)

- 3 *Thanks* is more informal than *thank you*. We use them as follows:

**Thank you.** (NOT **Thanks you.**)

**Thank you** very much. **Thanks** very much. **Thanks** a lot.

We can use an *-ing* form after *thank you/thanks*.

*'Thank you **for coming**.'* *'Not at all. Thank you **for having** me.'*

We often use *Thank you* to accept things (like *Yes please*).

'*Would you like some potatoes?*' '**Thank you.**' '*How many?*'

To make it clear that you are refusing something, say *No thank you*.

Note the expression *Thank God*.

**Thank God** *it's Friday!* (NOT ~~Thanks God~~ . . .)

- 4 We do not automatically answer when people say *Thank you*. If we want to answer, we can say *Not at all*, *You're welcome* (especially in American English), *That's all right* or *That's OK* (informal). Compare:

'*Here's your coat.*' '*Thanks.*' (No answer.)

'*Thanks so much for looking after the children.*' '**That's all right.** *Any time.*'

## 250 possessive 's: forms

### 1 Spelling

singular noun + 's : *my father's* car

plural noun + ' : *my parent's* house

irregular plural + 's : *the children's* room

We sometimes just add an apostrophe (') to a singular noun ending in -s: *Socrates' ideas*. But 's is more common: *Charles's wife*.

We can add 's to a whole phrase: *the man next door's wife*.

### 2 Pronunciation

The ending 's is pronounced just like a plural ending (see 302). The apostrophe (') in a form like *parents'* does not change the pronunciation at all.

- 3 Possessives are not usually used together with other determiners.

**The** car that is *John's* is **John's** car, not **the** *John's* car.

*Have you met Jack's new girl-friend?*

(NOT . . . **the** *Jack's new girl-friend?*)

For the structure *a friend of John's* etc, see 252.

- 4 We can use the possessive without a following noun.

'*Whose is that?*' '**Peter's.**'

We often talk about shops and people's houses in this way.

*Alice is at the hairdresser's.*

*We had a nice time at John and Susan's last night.*

- ▷ For the meanings and use of the possessive, see 251.

## 251 possessive 's: use

### 1 Meanings

We can use the possessive 's to talk about several different sorts of ideas. The meaning is often similar to the meaning of *have*.

*That's **my father's** house. (**My father has** that house.)*

***Mary's** brother is a lawyer. (**Mary has** a brother who is a lawyer.)*

***the plan's** importance (the importance that the **plan has**)*

Other meanings are possible.

*I didn't believe **the girl's** story. (The girl **told** a story.)*

*Have you read **John's** letter? (John **wrote** a letter.)*

***the government's** decision (The government **made** a decision.)*

***the train's** arrival (The train **arrived**.)*

### 2 's and of

We use the possessive structure (A's B) most often when the first noun (A) is the name of something living. In other cases, we often use a structure with *of* (the B of A). Compare:

*my **father's** house (NOT ~~the house of my father~~)*

*the **plan's** importance OR the importance **of** the plan*

### 3 Time expressions

We often use the possessive to refer to particular times, days, weeks etc.

***this evening's** performance*

***last Sunday's** paper*

***next week's** TV programmes*

***this year's** profits*

But we do not use the possessive when the expression of time has a 'general' meaning.

*the **nine o'clock** news*

*(NOT ~~the nine o'clock's~~ news)*

*a **Sunday** newspaper*

*(NOT ~~a Sunday's~~ newspaper)*

We also use the possessive in 'measuring' expressions of time which begin with a number.

***ten minutes'** walk    **two weeks'** holiday*

### 4 noun + noun

We can also put two nouns together in the structure noun + noun (for example a **table leg**; a **Sunday newspaper**). For details of this structure, see 226.

## 252 possessives with determiners (a friend of mine, etc)

We cannot put a possessive together with another determiner before a noun. We can say **my** friend, **Ann's** friend, **a** friend or **that** friend, but not **a my** friend or **that Ann's** friend.

determiner + noun + *of* + possessive

*That policeman is **a friend of mine**.*

*Here's **that friend of yours**.*

*I met **another boyfriend of Lucy's** yesterday.*

*He's **a cousin of the Queen's**.*

*Have you heard **this new idea of the boss's**?*

## 253 possessives: my and mine, etc

- 1 *My, your, his, her, its, one's, our* and *their* are determiners (see 96). In grammars and dictionaries they are often called 'possessive adjectives'.

*That's **my** watch.*

We cannot use *my, your* etc together with other determiners (for example *a, the, this*). You cannot say *a my friend* or *the my car* or *this my house*. (For the structure *a friend of mine*, see 252.)

Don't confuse *its* (possessive) and *it's* (= *it is/has*).

*'We've got a new cat.' 'What's **its** name?' 'It's called Polly.'*

- 2 *Mine, yours, his, hers, ours* and *theirs* are pronouns.

*That watch is **mine**. Which car is **yours**?*

We do not use articles with *mine* etc.

*Can I borrow your keys? I can't find **mine**.*

(NOT ~~+can't find the mine-~~)

- 3 We can use *whose* as a determiner (like *my*) or as a pronoun (like *mine*).

***Whose** bag is that? **Whose** is that bag?*

- 4 After a plural possessive, we do not usually use a singular word to express a plural meaning.

*The teacher told the children to open their **books**.*

(NOT ... ~~to open their book-~~)

## 254 prepositions after particular words and expressions

(This is a list of expressions which often cause problems.  
For the use of *of* with determiners, see 96.)

### ability **at** (NOT **in**)

*She shows great **ability at** mathematics.*

### afraid **of** (NOT **by**)

*Are you **afraid of** spiders?*

### agree **with** a person

*I entirely **agree with** you.*

### agree **about** a subject of discussion

*We **agree about** most things.*

### agree **on** a matter for decision

*Let's try to **agree on** a date.*

### agree **to** a suggestion

*I'll **agree to** your suggestion if you lower the price.*

### angry **with** (sometimes **at**) a person **for** doing something

*I'm **angry with** her **for** not telling me.*

### angry **about** (sometimes **at**) something

*What are you so **angry about**?*

### apologize **for**

*I must **apologize for** disturbing you.*

### arrive **at** or **in** (NOT **to**)

*What time do we **arrive at** Cardiff?*

*When did you **arrive in** England?*

**ask:** see 53

### bad **at** (NOT **in**)

*I'm not **bad at** tennis.*

### believe **in** God, Father Christmas etc (= believe that . . . exists)

*I half **believe in** life after death.*

### believe a person or something that is said (= accept as true)

*Don't **believe** her. I don't **believe** a word she says.*

### blue **with** cold, red **with** anger

*My hands were **blue with** cold when I got home.*

**borrow:** see 67

### call **after**

*We **called** him Thomas, **after** his grandfather.*

### clever **at** (NOT **in**)

*I'm not very **clever at** cooking.*

### congratulate/congratulations **on** (NOT **for**)

*I must **congratulate** you **on** your exam results.*

***Congratulations on** your new job!*

**crash into** (NOT **against**)

*I wasn't looking where I was going, and **crashed into** the car in front.*

**depend/dependent on** (NOT **from** or **of**)

*We may play football — it **depends on** the weather.*

*He doesn't want to be **dependent on** his parents.*

But: **independent of****different from** (sometimes **to**; American **from** or **than**)

*You're very **different from** your brother.*

**difficulty with** something, (**in**) **doing** something(NOT **difficulties to** . . .)

*I'm having **difficulty with** my travel arrangements.*

*You won't have much **difficulty (in) getting** to know people in Italy.*

**disappointed with** somebody

*My father never showed it if he was **disappointed with** me.*

**disappointed with/at/about** something

*You must be pretty **disappointed with/at/about** your exam results.*

a **discussion about** something

*We had a long **discussion about** politics.*

**to discuss** something (no preposition)

*We'd better **discuss** your travel plans.*

**divide into** (NOT **in**)

*The book is **divided into** three parts.*

**dream of** (= think of, imagine)

*I often **dreamed of** being famous when I was younger.*

**dream about**

*What does it mean if you **dream about** mountains?*

**dress in** (NOT **with**)

*Who's the woman **dressed in** green?*

**drive into**

*Granny **drove into** a tree again yesterday.*

**example of** (NOT **for**)

*Sherry is an **example of** a fortified wine.*

**explain** something **to** somebody (NOT **explain somebody something**)

*Could you **explain** this rule **to** me?*

**get in(to)** and **out of** a car, taxi or small boat

*When I **got into** my car, I found the radio had been stolen.*

**get on(to)** and **off** a bus, train, plane or ship

*We'll be **getting off** the train in ten minutes.*

**good at** (NOT **in**)

*Are you any **good at** tennis?*

**the idea of** . . . **-ing** (NOT **the idea to** . . .)

*I don't like the **idea of getting** married yet.*

**ill with**

The boss has been **ill with** flu this week.

**impressed with/by**

I'm very **impressed with/by** your work.

**independent of; independence of/from**

She got a job so that she could be **independent of** her parents.

When did India get her **independence from** Britain?

**insist on (NOT to ...)**

George's father **insisted on** paying.

**interest/interested in (NOT for)**

When did your **interest in** social work begin?

Not many people are **interested in** grammar.

**kind to (NOT with)**

People have always been very **kind to** me.

**laugh at**

I hate being **laughed at**.

**listen to**

If you don't **listen to** people, they won't **listen to** you.

**look at** (= 'point one's eyes at')

Stop **looking at** me like that.

**look after** (= take care of)

Thanks for **looking after** me when I was ill.

**look for** (= try to find)

Can you help me **look for** my keys?

**marriage to; get married to (NOT with)**

Her **marriage to** Philip didn't last very long.

How long have you been **married to** Sheila?

**nice to (NOT with)**

You weren't very **nice to** me last night.

**pay for** something (NOT ~~pay~~ something)

Excuse me, sir. You haven't **paid for** your drink.

**pleased with** somebody

The boss is very **pleased with** you.

**pleased with/about/at** something

I wasn't very **pleased with/about/at** my exam results.

**polite to (NOT with)**

Try to be **polite to** Uncle Richard for once.

**prevent ... from ... -ing (NOT to ...)**

The noise of your party **prevented** me **from sleeping**

**proof of (NOT for)**

I want **proof of** your love. Lend me some money.

**reason for (NOT of)**

Nobody knows the **reason for** the accident.

**remind of**

She **reminds me of** a girl I was at school with.

**responsible/responsibility for**

Who's **responsible for** the shopping this week?

**rude to (NOT with)**

Peggy was pretty **rude to** my family last weekend.

**run into ( = meet)**

I **ran into** Philip at Victoria Station this morning.

**search for ( = look for)**

The customs were **searching for** drugs at the airport.

**search without preposition ( = look through; look everywhere in/on)**

They **searched** everybody's luggage.

They **searched** the man in front of me from head to foot.

**shocked by/at**

I was terribly **shocked at/by** the news of Peter's accident.

**shout at (aggressive)**

If you don't stop **shouting at** me I'll come and hit you.

**shout to = call to**

Mary **shouted to** us to come in and swim.

**smile at**

If you **smile at** me like that I'll give you anything you want.

**sorry about** something that has happened

I'm **sorry about** your exam results.

**sorry for/about** something that one has done

I'm **sorry for/about** breaking your window.

**sorry for** a person

I feel really **sorry for** her children.

**suffer from**

My wife **is suffering from** hepatitis.

**surprised at/by**

Everybody was **surprised at/by** the weather.

**take part in (NOT at)**

I don't want to **take part in** any more conferences.

**think of/about (NOT USUALLY think to . . . )**

I'm **thinking of** studying medicine.

I've also **thought about** studying dentistry.

**the thought of . . . (NOT the thought to . . . )**

I hate **the thought of** going back to work.

**throw . . . at (aggressive)**

Stop **throwing** stones **at** the cars.

**throw . . . to** (in a game etc)

*If you get the ball, **throw it to** me.*

**typical of** (NOT **for**)

*The wine's **typical of** the region.*

**write**: see 356.6

**wrong with**

*What's **wrong with** Rachel today?*

## 255 prepositions before particular words and expressions

(This is a list of a few expressions which often cause problems. For information about other preposition + noun combinations, see a good dictionary.)

**at** the cinema; **at** the theatre; **at** a party; **at** university

a book **by** Joyce; a concerto **by** Mozart; a film **by** Fassbinder (NOT **of**)

**for** . . . reason

*My sister decided to go to America **for** several reasons.*

**in** pen, pencil, ink etc

*Please fill in the form **in** ink.*

**in** the rain, snow etc

*I like walking **in** the rain.*

**in** a . . . voice

*Stop talking to me **in** that stupid voice.*

**in** a suit, raincoat, shirt, skirt, hat etc

*Who's the man **in** the funny hat over there?*

**in** the end = finally, after a long time

***In** the end, I got a visa for the Soviet Union.*

**at** the end = at the point where something stops

*I think the film's a bit weak **at** the end.*

**in** time = with enough time to spare; not late

*I didn't get an interview because I didn't send in the form **in** time.*

**on** time = at exactly the right time

*Concerts never start **on** time.*

**on** the radio; **on** TV

## 256 prepositions: expressions without prepositions

(This is a list of important expressions in which we do not use prepositions, or can leave them out.)

- 1 We do not use prepositions after *discuss*, *marry* and *lack*.

*We must **discuss** your plans. She **married** a friend of her sister's.  
He's clever, but he **lacks** experience.*

- 2 No preposition before expressions of time beginning *next, last, this, one, every, each, some, any, all*.

See you **next Monday**. The meeting's **this Thursday**.  
Come **any day** you like. The party lasted **all night**.

Note also *tomorrow morning, yesterday afternoon*, etc.  
(NOT *on tomorrow morning* etc)

- 3 In an informal style, we sometimes leave out *on* before the names of the days of the week. This is very common in American English.

Why don't you come round **(on) Monday evening**?

- 4 We use *a* instead of a preposition in *three times a day, sixty miles an hour, eighty pence a pound*, and similar expressions.

- 5 We usually leave out *at* in (*At*) *what time . . . ?*

**What time** does Granny's train arrive?

- 6 Expressions containing words like *height, length, size, shape, age, colour, volume, area* are usually connected to the subject of the sentence by the verb *be*, without a preposition.

**What colour** are her eyes?  
He's just **the right height** to be a policeman.  
She's **the same age** as me.  
You're **a very nice shape**.  
I'm **the same weight** as I was twenty years ago.  
**What shoe size** are you?

- 7 We often leave out *in* (especially in spoken English) in the expressions (*in*) *the same way, (in) this way, (in) another way* etc.

They plant corn **the same way** their ancestors used to, 500 years ago.

- 8 We do not use *to* before *home*.

I'm going **home**.

In American English, *at* can be left out before *home*.

Is anybody **home**?

## 257 prepositions at the end of clauses

- 1 Prepositions often come at the ends of clauses in English. This happens in several kinds of structure:

- a questions beginning *what, who, where* etc.

**What** are you looking **at**?  
**Who** did you go **with**?  
**Where** did you buy it **from**?

## b relative clauses

*There's the house (that) I told you **about**.*  
*You remember the boy I was going out **with**?*

## c passive structures

*I hate **being laughed at**.*  
*They took him to hospital yesterday and **he's** already **been operated on**.*

## d infinitive structures

*It's a boring place **to live in**.*  
*I need something **to write with**.*

## 2 In a more formal style, we can put a preposition before a question-word or a relative pronoun.

***To whom** is that letter addressed?*  
*She met a man **with whom** she had been friendly years before.*  
***On which** flight is the general travelling?*

## 258 prepositions and adverb particles

Words like *down*, *in* are not always prepositions. Compare:

*I ran **down** the road.*      *He's **in** his office.*  
*Please sit **down**.*      *You can go **in**.*

In the expressions **down** *the road* and **in** *his office*, *down* and *in* are prepositions: they have objects (*the road*, *his office*).

In *Please sit **down*** and *You can go **in***, *down* and *in* have no objects. They are not prepositions, but adverbs of place, which modify the verbs *sit* and *go*.

Small adverbs like this are usually called 'adverb particles' or 'adverbial particles'. They include *in*, *out*, *up*, *down*, *on*, *off*, *through*, *past*, *away*, *back*, *across*, *over*, *under*. Adverb particles often join together with verbs to make two-word verbs, sometimes with completely new meanings. Examples: *break down* = 'stop working'; *put off* = 'delay', 'postpone'; *work out* = 'calculate'; *give up* = 'stop trying'. For information about these verbs, see the next section.

## 259 prepositional verbs and phrasal verbs

Many English verbs have two parts: a 'base' verb like *bring*, *come*, *sit*, *break* and another small word like *in*, *down*, *up*.

*Could you **bring in** the coffee?*  
*Come **in** and **sit down**.*  
*He **broke up** a piece of bread and threw the bits to the birds.*

The second part of the verb is sometimes a preposition, and sometimes

an adverb particle (see 258). When these verbs are used with objects, the sentence structure is not the same for the two kinds of verb.

### Prepositional verbs

verb + preposition + noun

She **ran down** the road.

He **sat on** the table.

verb + preposition + pronoun

She **ran down** it.

He **sat on** it.

### Phrasal verbs

(verbs with adverb particles)

verb + particle + noun  
verb + noun + particle

She **threw down** the paper.

She **threw** the paper **down**.

He **put on** his coat.

He **put** his coat **on**.

verb + pronoun + particle

She **threw** it **down**.

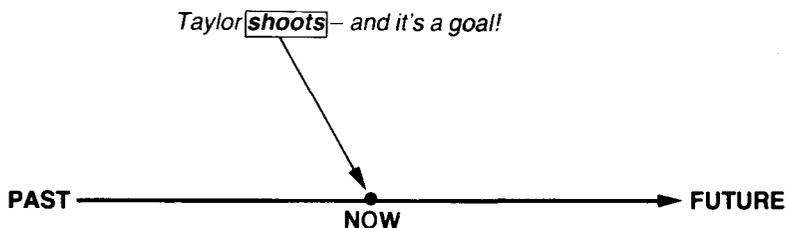

He **put** it **on**.

For detailed information about phrasal and prepositional verbs, see the *Oxford Dictionary of Current Idiomatic English, Volume 1*, or the *Longman Dictionary of English Idioms*.

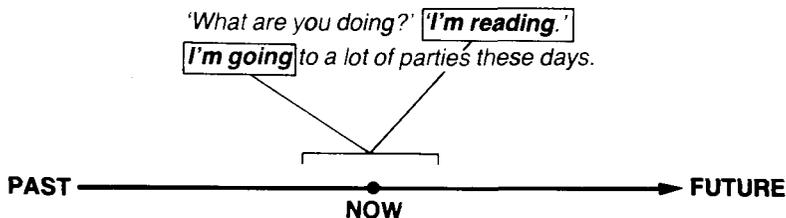

## 260 present tenses: introduction

'Present tenses' are used to talk about several different kinds of time.

### 1 Now, at this exact moment

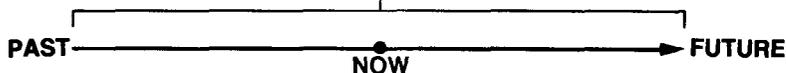

### 2 Around now

### 3 'General time' — at any time, all the time, not just around now

I **go** to London about three times a week.  
 My parents **live** near Dover.  
 Water **freezes** at 0° Centigrade.

When we talk about time 'around now', we usually use the 'present progressive tense' (for example, *I'm going, I'm reading*). In other cases, we usually use the 'simple present' tense (for example *I go, I read*). For details, see the next two sections.

We use a present perfect tense, not a present tense, to say how long something has been going on.

*I've known her since 1960.* (NOT ~~*I know her*~~ . . .)

*I've been learning English for three years.* (NOT ~~*I'm learning*~~ . . .)

For details, see 243 and 244.

## 261 present tenses: simple present

### 1 Forms

Affirmative	Question	Negative
I work	do I work?	I do not work
you work	do you work?	you do not work
he/she/it works	does he/she/it work?	he/she/it does not work
we work	do we work?	we do not work
they work	do they work?	they do not work

Verbs ending in *s*, *-z*, *-x*, *-ch*, and *-sh* have *-es* in the third person singular (for example *misses, buzzes, fixes, watches, pushes*).

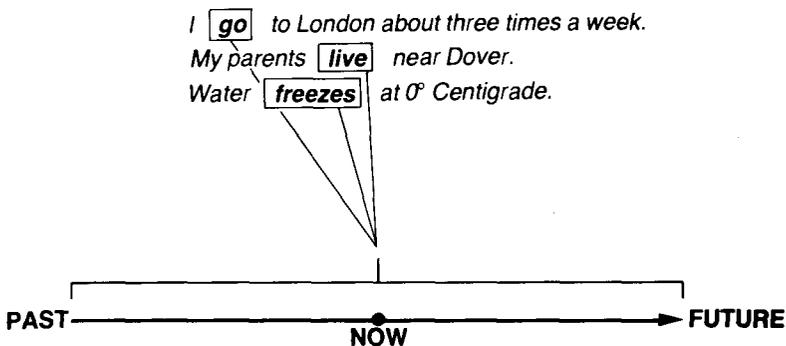

Other verbs have *-s*. Exceptions: *goes, does*.

Verbs ending in consonant + *y* have *-ies* in the third person singular (for example *hurries, worries*).

The pronunciation of *-(e)s* in the third person follows exactly the same rules as the pronunciation of plural *-(e)s*. See 302 for details.

## 2 'General time'

We can use the simple present to talk about actions and situations in 'general time' — things which happen at any time, or repeatedly, or all the time.

## 3 'Momentary' actions

We can also use the simple present to talk about 'momentary' present actions — things which take a very short time to happen. This tense is often used in sports commentaries.

*Lydiard **passes** to Taylor, Taylor to Morrison, Morrison back to Taylor  
 ... and Taylor **shoots** — and it's a goal!!!*

## 4 Actions 'around now' (present progressive)

We do not usually use the simple present to talk about longer actions and situations which are going on *around now*. In this case, we prefer the present progressive. (See 262.)

*'What **are you doing**?' 'I'm reading.'* (NOT ... ~~'I read.'~~)

There are a few exceptions: verbs which are not used in progressive forms (see 225).

*I **like** this wine.* (NOT ~~'I'm liking this wine.'~~)

## 5 Future

We can use the simple present to talk about the future. We do this:

a. after conjunctions: (see 343):

*I'll phone you **when I come** back.  
 She won't come **if you don't ask** her.  
 I'll always love you **whatever you do**.*

b. when we talk about programmes and timetables.

*The train **arrives** at 7.46. I **start** work tomorrow.*

In other cases, we do not use the simple present to talk about the future. We prefer the present progressive (see 262).

***Are you going** out tonight?  
 (NOT ~~'Do you go~~ out tonight?)*

## 262 present tenses: present progressive

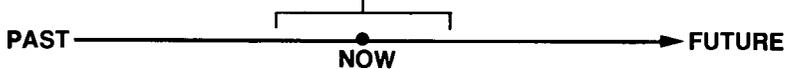

### 1 Forms

Affirmative	Question	Negative
I am working you are working he/she/it is working etc	am I working? are you working? is he/she/it working? etc	I am not working you are not working he/she/it is not working, etc

### 2 'Around now'

We use the present progressive to talk about actions and situations that are going on 'around now': before, during and after the moment of speaking.

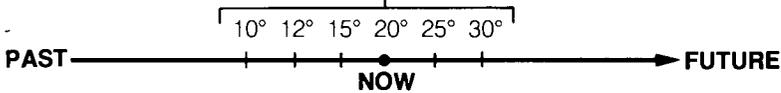

Hurry up! We **re all waiting** for you! (NOT *We all wait . . .*)  
 'What **are you doing**?' 'I **'m reading**.'  
 'I **'m going** to a lot of parties these days.'

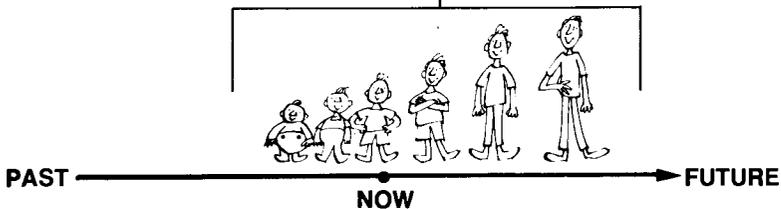

### 3 Changes

We also use the present progressive to talk about developing and changing situations.

The weather **'s getting** warmer.

That child **'s getting** bigger every day.

#### 4 Present progressive and simple present

We do not use the present progressive to talk about 'general time'. For this, we use the simple present. (See 261.) Compare:

*My sister's **living** at home for the moment. (around now)*

*You **live** in North London, don't you? (general time)*

*Why **is** that girl **standing** on the table?*

*Chetford Castle **stands** on a hill outside the town.*

*The leaves **are going** brown.*

*I **go** to the mountains about twice a year.*

- 5 We often use the present progressive to talk about the future. (For details, see 135.)

*What **are you doing** tomorrow evening?*

- 6 Some verbs are not used in progressive forms. (See 225.)

*I **like** this wine. (NOT ~~I'm liking~~ ...)*

- 7 Verbs that refer to physical feelings (for example *feel*, *hurt*, *ache*) can be used in the simple present or present progressive without much difference of meaning.

*How **do you feel**? OR How **are you feeling**?*

*My head **aches**. OR My head **is aching**.*

- 8 For the use of *always* with progressive forms (for example *She's always losing her keys*), see 263.

## 263 progressive tenses with **always**

We can use *always* with a progressive tense to mean 'very often'.

*I'm **always losing** my keys.*

*Granny's nice. **She's always giving** people things and doing things for people.*

*I'm **always running** into (= 'accidentally meeting') Paul these days.*

We use this structure to talk about things which happen very often (perhaps more often than expected), but which are not planned.

Compare:

*When Alice comes to see me, I **always meet her** at the station. (a regular, planned arrangement)*

*I'm **always meeting Mrs Bailiff** in the supermarket. (accidental, unplanned meetings)*

*When I was a child, **we always had** picnics on Saturdays in the summer. (regular, planned)*

*Her mother **was always arranging** little surprise picnics and outings. (unexpected, not regular)*

## 264 punctuation: apostrophe

We use apostrophes (') in two important ways.

a. To show where we have left letters out of a contracted form. (See 90.)

**can't** (= *cannot*)    **she's** (= *she is*)    **I'd** (= *I would*)

b. In possessive forms of nouns. (See 250.)

the **girl's** father    **Charles's** wife    three **miles'** walk

We do not use apostrophes in plurals, possessive determiners (except *one's*) or possessive pronouns.

blue **jeans** (NOT *blue jeans's*)

The dog wagged **its** tail. (NOT ... *it's tail*.)

This is **yours**. (NOT ... *your's*.)

## 265 punctuation: colon

1 We often use colons (:) before explanations.

*We decided not to go on holiday: we had too little money.*

*Mother may have to go into hospital: she's got kidney trouble.*

2 We also use colons before quotations.

*In the words of Murphy's Law: 'Anything that can go wrong will go wrong'.*

## 266 punctuation: comma

Some ways of using commas:

1 We use commas (,) to separate things in a series or list. We do not use them between the last two words or expressions (except when these are long).

*I went to Spain, Italy, Switzerland, Austria and Germany.*

*You had a holiday at Christmas, at New Year and at Easter.*

*I spent yesterday playing cricket, listening to jazz records, and talking about the meaning of life.*

We separate adjectives by commas after a noun, but not always before.

Compare:

*a tall(,) dark(,) handsome cowboy*

*The cowboy was tall, dark and handsome.*

We put commas in a series of colour adjectives.

*a green, red and gold carpet*

- 2** If we put adverbs in unusual places in a clause, we often put commas before and after them.
- My father, **however**, did not agree.*  
*Jane had, **surprisingly**, paid for everything.*  
*We were, **believe it or not**, in love with each other.*
- 3** In sentences that begin with conjunctions, we usually put a comma after the first clause.
- If** you're ever in London, come and see me.*  
***As soon as** we stop, get out of the car.*
- 4** We do not put commas before 'reported speech' clauses.
- Everybody realized that I was a foreigner.*  
 (NOT ~~Everybody realized, that~~ . . . )  
*I didn't know where I should go.*  
 (NOT ~~I didn't know, where~~ . . . )  
*Fred wondered if lunch was ready.*  
 (NOT ~~Fred wondered, if~~ . . . )
- 5** We do not usually use commas between grammatically separate sentences (in places where a full stop would be possible).
- The blue dress was warmer. On the other hand, the purple one was prettier.*  
 (OR *The blue dress was warmer; on the other hand . . .* )  
 (NOT ~~The blue dress was warmer, on the other hand~~ . . . )
- 6** In numbers, we often use a comma after the thousands.
- 3,164 = three thousand, one hundred and sixty-four*
- We do not use commas in decimals.
- 3.5 = three point five or three and a half*  
 (NOT ~~3.5 three comma five~~)
- ▷ For the use of commas in relative clauses, see 280.

## 267 punctuation: dash

We often use a dash (—) in informal writing. A dash can come before an afterthought.

*We'll be arriving on Monday morning — at least, I think so.*

Dashes are common in personal letters instead of colons or semi-colons, or instead of brackets.

*There are three things I can never remember — names, faces, and I've forgotten the other.*

*We had a great time in Greece — the kids really loved it.*

*My mother — who rarely gets angry — really lost her temper.*

## 268 punctuation: quotation marks

Quotation marks (' . . . ' " . . . ") can also be called 'inverted commas'.

- 1 We can use quotation marks when we say what name something has.  
*. . . can be called 'inverted commas'.*  
 And quotation marks are often used when we mention titles.  
*His next book was 'Heart of Darkness'.*
- 2 We can use quotation marks when we mention a word, or when we use it in an unusual way.  
*The word 'disinterested' does not mean 'uninterested'.*  
*A textbook can be a 'wall' between a teacher and a class.*
- 3 We use quotation marks (single ' . . . ' or double " . . . ") when we quote direct speech.  
*'Hello,' she said.* OR *"Hello," she said.*

## 269 punctuation: semi-colons and full stops

We can use semi-colons (;) or full stops (.) between grammatically separate sentences.

*Some people like Picasso. Others dislike him.*  
*Some people like Picasso; others dislike him.*

We often prefer semi-colons when the ideas are very closely connected.

*It is a good idea; whether it will work or not is another question.*

## 270 questions: basic rules

(Some spoken questions do not follow these rules. See 271.)

- 1 Put an auxiliary verb before the subject.

auxiliary verb + subject + main verb

**Have you** received my letter of June 17?

(NOT ~~You have received~~ . . . .)

Why **are you** laughing? (NOT ~~Why you are~~ laughing?)

How much **does the room** cost? (NOT ~~How much the room costs?~~)

- 2 If there is no other auxiliary verb, use *do* or *did*.

do + subject + main verb

**Do you** like Mozart? (NOT ~~Like you~~ Mozart?)

What **does** 'periphrastic' mean? (NOT ~~What means~~ . . . ?)

**Did you** like the concert?

- 3 Do not use *do* together with another auxiliary verb, or with *be*.  
**Can you** tell me the time? (NOT ~~Do you can~~ tell me ... ?)  
**Have you** seen John? (NOT ~~Do you have~~ seen John?)  
**Are you** ready?
- 4 After *do*, use the infinitive without *to*.  
**Did you go** camping last weekend?  
 (NOT ~~Did you went~~ ... ? NOT ~~Did you to go~~ ... ?)
- 5 Put *only* the auxiliary verb before the subject.  
**Is your mother** coming tomorrow?  
 (NOT ~~Is coming your mother~~ ... ?)  
 When **was your reservation** made?  
 (NOT ~~When was made your reservation?~~)
- 6 When *who*, *which*, *what* or *how many* is the subject of a sentence, do not use *do*.  
**Who left** the door open? (NOT ~~Who did leave~~ the door open?)  
**Which costs** more — the blue one or the grey one?  
 (NOT ~~Which does cost~~ more ... ?)  
**What happened?** (NOT ~~What did~~ happen?)  
**How many people work** in your office?  
 (NOT ~~How many people do~~ work ... ?)  
 When *who*, *which*, *what* or *how many* is the object, use *do*.  
**Who do** you want to speak to?  
**What do** you think?
- 7 In *reported* questions, do not put the verb before the subject (see 284). Do not use a question mark.  
 Tell me when **you are going** on holiday.  
 (NOT ~~Tell me when are you going~~ ... ?)

## 271 questions: word order in spoken questions

In spoken questions, we do not always use 'interrogative' word order.

**You're** working late tonight?

We ask questions in this way:

- a. when we think we know something, but we want to make sure

**That's** the boss? (= I suppose that's the boss, isn't it?)

- b. to express surprise

**THAT'S** the boss? I thought he was the cleaner.

This order is not possible after a question-word (*what*, *how* etc).

Where **are you** going? (NOT ~~Where you are~~ going?)

## 272 questions: reply questions

- 1 We often answer people with short 'questions'. Their structure is

auxiliary verb + personal pronoun

*'It was a terrible party.'* **Was it?** 'Yes, . . .'

These 'reply questions' do not ask for information. They just show that we are listening and interested. More examples:

*'We had a lovely holiday.'* **Did you?** 'Yes. We went . . .'

*'I've got a headache.'* **Have you, dear?** 'I'll get you an aspirin.'

*'John likes that girl next door.'* 'Oh, **does he?**'

*'I don't understand.'* **Don't you?** 'I'm sorry.'

We can answer an affirmative sentence with a negative reply question. This is like a negative-question exclamation (see 120.3) — it expresses emphatic agreement.

*'It was a lovely concert.'* 'Yes, **wasn't it?** I did enjoy it.'

*'She's put on a lot a weight.'* 'Yes, **hasn't she?**'

- ▷ Question tags have a similar structure. See 273.  
See also 293 (short answers).

## 273 question tags

We often put small questions at the ends of sentences in speech.

*That's the postman, **isn't it?*** *You take sugar in tea, **don't you?***

*Not a very good film, **was it?***

We use these 'question tags' to ask if something is true, or to ask somebody to agree with us.

### 1 Structure

We do not put question tags after questions.

***You're** the new secretary, **aren't you?***

(NOT ***Are you** the new secretary, **aren't you?***)

We put negative tags after affirmative sentences, and non-negative tags after negative sentences.

+   -

*It's cold, **isn't it?***

-   +

*It's **not** warm, **is it?***

If the main sentence has an auxiliary verb (or *be*), the question tag has the same auxiliary verb (or *be*).

Sally **can** speak French, **can't** she?

You **haven't** seen my keys, **have** you?

The meeting **'s** at ten, **isn't** it?

If the main sentence has no auxiliary verb, the question tag has *do*.

You *like* oysters, **don't** you?

Harry *gave* you a cheque, **didn't** he?

## 2 Meaning and intonation

We show the meaning of a question tag by the intonation. If the tag is a real question — if we really want to know something, and are not sure of the answer — we use a rising intonation: the voice goes up.

The meeting's at four o'clock, **isn't it?**

If the tag is not a real question — if we are sure of the answer — we use a falling intonation: the voice goes down.

It's a beautiful day, **isn't it?**

## 3 Requests

We often ask for help or information by using the structure

negative sentence + question tag

You **couldn't** lend me a pound, **could you?**

You **haven't** seen my watch anywhere, **have you?**

## 4 Note

- a The question tag for *I am* is *aren't I?*

*I'm late, aren't I?*

- b After imperatives, we use *won't you?* (to invite people to do things) and *will you?* *would you?* *can you?* *can't you?* and *could you?* (to tell people to do things).

*Do sit down, won't you?*    *Open a window, would you?*

*Give me a hand, will you?*    *Shut up, can't you?*

After a negative imperative, we use *will you?*

*Don't forget, will you?*

After *Let's . . .*, we use *shall we?*

*Let's have a party, shall we?*

- c *There* can be a subject in question tags.

**There's** something wrong, **isn't there?**

**There** weren't any problems, **were there?**

- d We use *it* in question tags to refer to *nothing*, and *they* to refer to *nobody*.

**Nothing** can happen, **can it?**    **Nobody** phoned, **did they?**

We also use *they* to refer to *somebody*, *everybody* (see 307).

*Somebody* wanted a drink, **didn't they?** *Who* was it?

## 274 quite

- 1 *Quite* has two meanings. Compare:

*It's **quite** good. It's **quite** impossible.*

*Good* is a 'gradable' adjective: things can be more or less good.

*Impossible* is not 'gradable'. Things cannot be more or less impossible; they are impossible or they are not.

With gradable adjectives, *quite* means something like 'fairly' or 'rather'. (See 124.)

*'How's your steak?' **Quite nice.***

*She's **quite pretty**. She'd look better if she dressed differently, though.*

With non-gradable adjectives, *quite* means 'completely'.

*His French is **quite perfect**. The bird was **quite dead**.*

- 2 We put *quite* before *a/an*.

***quite a** nice day **quite an** interesting film*

- 3 We can use *quite* with verbs.

*I **quite like** her. Have you **quite finished**?*

## 275 real(ly)

In informal English (especially American English), *real* is often used as an adverb instead of *really* before adverbs and adjectives.

*That was **real** nice. She cooks **real** well.*

Some people consider this 'incorrect'.

## 276 reflexive pronouns

Reflexive pronouns are *myself*, *yourself*, *himself*, *herself*, *itself*, *oneself*, *ourselves*, *yourselves*, *themselves*.

- 1 We use reflexive pronouns to talk about actions where the subject and the object are the same person.

*I cut **myself** shaving this morning. (NOT ~~I cut me~~ . . .)*

***We** got out of the river and dried **ourselves**. (NOT . . . ~~dried us-~~)*

*Why's **she** talking to **herself**?*

We do not usually use reflexive pronouns with *wash*, *dress* or *shave*.

*Do you **shave** on Sundays? (NOT . . . **shave yourself** . . .)*

After prepositions, we use personal pronouns instead of reflexives when it is clear which person we are talking about.

*She took her dog **with her**. (NOT . . . **with herself**.)*

- 2 We can use reflexive pronouns to mean 'that person/thing and nobody/ nothing else'.

*It's quicker if you do it **yourself**.*

*The manager spoke to me **himself**.*

*The house **itself** is nice, but the garden's very small.*

- 3 *By myself, by yourself* etc has two meanings.

- a 'alone'

*I often like to spend time **by myself**.*

- b 'without help'

*'Can I help you?' 'No, thanks. I can do it **by myself**.'*

- 4 Don't confuse *-selves* and *each other* (see 105).

**They** are thinking about **themselves**.

**They** are thinking about **each other**.

## 277 relative pronouns

- 1 Relative pronouns are *who, whom, whose, which, that* and *what*.

Relative pronouns do two things:

- they join clauses together, like conjunctions
- they are the subjects or objects of clauses (except *whose*).

Compare:

*What's the name of the tall man? **He** just came in.*

*What's the name of the tall man **who** just came in?*

(*Who* joins the two clauses together. It is the subject of the second clause: we use *who* in the same way as *he*.)

*This is Ms Rogers. You met **her** last year.*

*This is Ms Rogers. **whom** you met last year.*

(*Whom* joins the two clauses together. It is the object of the second clause: we use *whom* in the same way as *her*.)

*I've got a book. **It** might interest you.*

*I've got a book **which** might interest you.*

(*Which* joins the two clauses together. It is the subject of the second clause: we use *which* in the same way as *it*.)

*I've found the paper. You were looking for **it**.*

*I've found the paper **which** you were looking for.*

(*Which* is the object of the second clause.)

One subject or object is enough.

*Here's the book **which** you asked for.*

(NOT *Here's the book **which** you asked for **it**.*)

We use *who/whom* for people and *which* for things.

*She's a person **who** can do anything.* (NOT ... *a person **which*** ...)

*It's a machine **which** can do anything.* (NOT ... *a machine **who*** ...)

- 2 We often use *that* instead of *which* in 'identifying' relative clauses (see 280).

*I've got a book **that** might interest you.*

*Have you got a map **that** shows all the motorways?*

In an informal style, we also use *that* instead of *who(m)*.

*There's the woman **that** works in the photographer's.*

*You remember the boy **that** I was talking about?*

- 3 In 'identifying' relative clauses (see 280), we often leave out object pronouns.

*You remember the boy (that) I was talking about?*

*I've found the paper (that) you were looking for.*

- 4 We can use *when* and *where* in a similar way to relative pronouns.

*Can you tell me **a time when** you'll be free?*

(= ... ***a time at which*** ...)

*I know **a place where** you can find wild strawberries.*

- 5 Do not use *what* instead of *that* or *which*.

*Everything **that** happened was my fault.* (NOT ... ***what** happened* ...)

*She got married again, **which** surprised everybody.*

(NOT ... ***what** surprised everybody*.)

- 6 Some relative clauses 'identify' nouns — they tell us which person or thing is meant.

*What's the name of the tall man **who just came in**?*

Other relative clauses tell us more about a noun which is already identified.

*This is Ms Rogers, **whom you met last year**.*

The grammar is not quite the same in the two kinds of clause. We use *that* in identifying clauses, and we can leave out object pronouns. But in non-identifying clauses, we cannot use *that*, and we cannot leave out object pronouns. For details, see 280.

- ▷ For *whose*, see 279. For *what*, see 278.

## 278 relative pronouns: **what**

- 1 *What* is different from other relative pronouns.  
Other relative pronouns usually refer to a noun that comes before.

I gave her **the money that** she needed.

**The thing that** I'd like most is a home computer.

(*That* refers to — repeats the meaning of — *the money* and *the thing*.)

We use *what* as noun + relative pronoun together.

I gave her **what** she needed. (*What* = *the money that*.)

**What** I'd like most is a home computer. (*What* = *the thing that*.)

- 2 Do not use *what* with the same meaning as *that*.

You can have everything (**that**) you like.

(NOT . . . ~~everything **what** you like.~~)

The only thing **that** makes me feel better is coffee.

(NOT ~~The only thing **what** . . .~~)

We use *which*, not *what*, to refer to a whole sentence that comes before.

Sally married George, **which** made Paul very unhappy.

(NOT . . . ~~**what** made Paul very unhappy.~~)

## 279 relative pronouns: **whose**

*Whose* is a possessive relative word. It does **two** things:

- a. it joins clauses together  
b. it is a 'determiner' (see 96), like *his*, *her*, *its* or *their*. Compare:

I saw a girl. **Her hair** came down to her waist.

I saw a girl **whose hair** came down to her waist.

This is Felicity. You met **her sister** last week.

This is Felicity, **whose sister** you met last week.

Our friends the Robbins — we spent the summer **at their farmhouse** — are moving to Scotland.

Our friends the Robbins, **at whose farmhouse** we spent the summer, are moving to Scotland.

- ▷ For the interrogative pronoun *whose*, see 253.3.

## 280 relatives: identifying and non-identifying clauses

- 1 Some relative clauses 'identify' nouns. They tell us which person or thing is meant.

*What's the name of the tall man **who just came in**?*

(*who just came in* tells the hearer *which* tall man is meant: it *identifies* the man.)

*Whose is the car **that's parked outside**?*

(*that's parked outside* tells the hearer *which* car is meant: it *identifies* the car.)

Other relative clauses do not identify. They tell us more about a person or thing that is already identified.

*This is Ms Rogers, **whom you met last year**.*

(*whom you met last year* does not tell us *which* woman is meant: we already know that it is Ms Rogers.)

*Have you seen my new car, **which I bought last week**?*

(*which I bought last week* does not tell us *which* car is meant: we already know that it is 'my new car'.)

- 2 Non-identifying clauses are separated from the rest of the sentence by commas (,). Identifying clauses do not have commas. Compare:

*The woman **who does my hair** has moved to another hairdresser's.  
Dorothy, **who does my hair**, has moved to another hairdresser's.*

- 3 We only use *that* in identifying clauses. And we can only leave out the object in identifying clauses. Compare:

*The whisky (**that**) you drank last night cost £15 a bottle.*

*I gave him a large glass of whisky, **which** he drank at once.*

(NOT ... ~~whisky, that he drank~~ ...) (NOT ... ~~whisky, he drank~~ ...)

- 4 *Whom* is unusual in identifying clauses. Compare:

*The man (**that**) my daughter wants to marry has been divorced twice.*

*Max Harrison, **whom** my daughter wants to marry, has been divorced twice.*

- 5 Non-identifying clauses are unusual in an informal style.

## 281 remind

- 1 You *remind* somebody to do something that he might forget. We do not use *remember* with this meaning.

**remind + object + infinitive**

*Please **remind me to post** these letters.*

(NOT *Please ~~remember me~~ ...*)

*I **reminded her to send** her sister a birthday card.*

- 2 We use *remind . . . of* to say that something makes us remember the past.

*remind + object + of . . .*

*The smell of hay always **reminds me of** our old house in the country. She **reminds me of** her mother. (= She looks like her mother, or she behaves like her mother.)*

## 282 reported speech and direct speech

- 1 There are two ways of telling a person what somebody else said.

a. direct speech

*SUE: What did Bill say?*

*PETER: He said 'I want to go home'.*

b. reported speech

*SUE: What did Bill say?*

*PETER: He said **that he wanted to go home**.*

When we use 'direct speech', we give the exact words (more or less) that were said. When we use 'reported speech', we change the words that were said to make them fit into our own sentence. (For example, when Peter is talking about Bill he says *he wanted*, not *I want*.) For details, see 283.

- 2 We use a conjunction to join a reported speech clause to the rest of the sentence.

a. reported statements: *that*

*He said **that** he wanted to go home.*

In an informal style we can leave out *that*.

*He said he wanted to go home.*

b. reported questions: *if, whether, what, where, how, etc*

*She asked me **if** I wanted anything to drink.*

*She asked me **what** my name was.*

When we report orders, requests, advice *etc*, we usually use an infinitive structure.

*Who told you **to put** the lights off?*

*I advised Lucy **to go** to the police.*

For more details of these structures, see 284; 285.

- 3 'Reported speech' is not only used to report what people say. We use the same structure to report people's thoughts, beliefs, knowledge *etc*.

*I thought **something was wrong**.*

*She knew **what I wanted**.*

*Ann wondered **if Mr Blackstone really understood her**.*

## 283 reported speech: pronouns; 'here and now' words; tenses

BILL (on Saturday evening): **I don't like this** party. **I** want to go home.

PETER (on Sunday morning): Bill said **he didn't** like **the** party, and **he** wanted to go home.

### 1 Pronouns

In reported speech, we use the same pronouns to talk about people that we use in other structures.

Bill said **he** didn't like the party.

(NOT ~~Bill said I~~ didn't like the party.)

### 2 'Here and now' words

When somebody is speaking, he or she uses words like *this*, *here*, *now* to talk about the place where he or she is speaking, and the time when the words are said.

If we report the words in a different place at a different time, we will not use *this*, *here*, *now* etc.

Bill said he didn't like **the** party.

(NOT ~~Bill said he~~ didn't like **this** party.)

### 3 Tenses

When we report things that people said in the past, we do not usually use the same tenses as they used. (This is because the times are different.)

Bill said he **didn't** like the party.

(NOT ~~Bill said he~~ **doesn't** like the party.)

Compare:

#### Original words

#### Reported speech

**Will** you marry me?

I asked him if he **would** marry me.

(NOT . . . if he **will** marry me.)

You **look** nice.

I told her she **looked** nice.

(NOT . . . she **looks** nice.)

I **'m** learning French.

She said she **was** learning French.

(NOT . . . she **is** learning . . .)

I **'ve** forgotten.

He said he **had** forgotten.

(NOT . . . he **has** forgotten.)

John **phoned**.

She told me that John **had phoned**.

(NOT . . . that John **phoned**.)

#### 4 Exceptions

If somebody said something in the past that is still true, we sometimes report it with the same tense as the original speaker.

##### Original words

The earth **goes** round the sun.

How old **are** you?

##### Reported speech

He proved that the earth **goes/ went** round the sun.

I asked how old you **are/were**.

- ▷ For *must* in reported speech, see 207.3.

### 284 reported speech: questions

- 1 In reported questions, the subject comes before the verb.

He asked where **I was** going.

(NOT . . . ~~where was I going~~.)

I asked where **the President and his wife were** staying.

(NOT ~~I asked where were~~ . . .)

Auxiliary *do* is not used.

I wondered how **they felt**. (NOT . . . ~~how did they feel~~.)

Question marks are not used.

We asked where the money was. (NOT . . . ~~where the money was?~~)

- 2 When there is no question word (*who, what, how* etc), we use *if* or *whether* to introduce indirect questions.

The driver asked **if/whether** I wanted the town centre.

I don't know **if/whether** I can help you.

- ▷ For the difference between *if* and *whether*, see 361.

### 285 reported speech: orders, requests, advice etc

We usually use an infinitive structure to report orders, requests, advice and suggestions.

verb + object + infinitive

I **told Andrew to be** careful.

The lady downstairs **has asked us to be** quiet after nine o'clock.

I **advise you to think** again before you decide which one to buy.

The policeman **told me not to park** there.

We do not use *say* in this structure.

She **told** me to be quiet. (NOT ~~She said me to be quiet~~.)

- ▷ For the exact difference between *say* and *tell*, see 289.

## 286 requests

- 1 We usually ask people to do things for us by making yes/no questions. (This is because a yes/no question leaves people free to say 'No' if they want to.)

Common structures used in polite requests:

*Could you possibly help me for a few minutes?* (very polite)  
*I wonder if you could help me for a few minutes?* (very polite)  
*Could you help me for a few minutes?*  
*You couldn't help me for a few minutes, could you?*

- 2 If we use other structures (for example imperatives), we are not *asking* people to do things, but *telling* them to do things (giving orders). This may seem rude, and make people angry.  
*Please* changes an order into a polite order, but it does not change it into a request.

*Please help me for a few minutes.*  
*Carry this for me, please.*  
*Please answer by return of post. Please type your letter.*  
*You had better help me.*  
 (These are all orders. They are NOT polite ways of asking people to do things for you.)

▷ For the use of imperatives to give advice, make suggestions etc, see 170.

- 3 In shops, restaurants etc, we generally ask for things like this:

**Can I** have one of those, please?  
**Could I** have a red one?  
*I'd like* another glass of wine, please.  
**I would prefer** a small one.

*Could* is a little 'softer' than *can*.

- 4 We do not use negative questions in polite requests. But we often use negative *statements* with question tags.

**You couldn't** give me a light, **could you?**  
 (NOT **Couldn't you** give me a light?)

▷ For the use of negative questions, see 214.  
 For question tags, see 273.  
 For other rules of 'social' language, see 313.

## 287 road and street

- 1 A *street* is a road with houses on either side. We use *street* for roads in towns, but not for country roads.

*Cars can park on both sides of our **street**.*

Road is used for both town and country.

Cars can park on both sides of our **road**.

There's a narrow winding **road** from our village to the next one.

(NOT ... ~~a narrow winding **street**~~ ...).

- 2 Note that, in street names, we stress the word *Road*, but the word before *Street*.

Marylebone 'Road. 'Oxford Street.

## 288 the same

We always use *the* before *same*.

Give me **the same** again, please.

(NOT ~~Give me **same** again, please.~~)

I want **the same** shirt as my friend's.

(NOT ~~I want **a same** shirt like my friend.~~)

We use *the same as* before a noun or pronoun.

Her hair's **the same colour as** her mother's.

(NOT ... ~~**the same colour like** her mother's.~~)

We use *the same that* before a clause.

That's **the same man that** asked me for money yesterday.

## 289 say and tell

- 1 *Tell* means 'inform' or 'order'. After *tell*, we usually say who is told: a personal object is necessary.

tell + person

She **told me** that she would be late. (NOT ~~She **told that she**~~ ...)

I **told the children** to go away.

*Say* is usually used without a personal object.

She **said** that she would be late. (NOT ~~She **said me**~~ ...)

If we want to put a personal object after *say*, we use *to*.

She said 'Go away' **to** the children.

- 2 *Say* is often used before direct speech. *Tell* is not.

She **said** 'Go away'. (NOT ~~She **told** 'Go away'.~~)

- 3 In a few expressions, we use *tell* without a personal object. The most common: *tell the truth*, *tell a lie*, *tell the time* (= know how to read a clock).

I don't think she's **telling the truth**. (NOT ... ~~**saying** the truth.~~)

He's seven years old and he still can't **tell the time**.

## 290 see

- 1 When *see* means 'use one's eyes', it is not usually used in progressive tenses. We often use a structure with *can* instead (see 81).

*I can see a rabbit over there.* (NOT *I'm seeing* . . .)

- 2 *See* can also mean 'understand'. We do not use progressive tenses.

*'We've got a problem.'* *I see!* (NOT *I'm seeing*.)

- 3 When *see* means *meet*, *interview*, *talk to*, progressive tenses are possible.

*I'm seeing Miss Barnett at four o'clock.*

- ▷ For the difference between *look (at)*, *watch* and *see*, see 196.

## 291 seem

- 1 *Seem* is a 'copula verb' (see 91). After *seem*, we use adjectives, not adverbs.

*seem + adjective*

*You seem angry about something.* (NOT *You seem angrily* . . .)

- 2 We use *seem to be* before a noun.

*seem to be + noun*

*I spoke to a man who seemed to be the boss.*

- 3 Other structures: *seem + infinitive*; *seem like*.

*seem + infinitive*

*Ann seems to have a new boyfriend.*

*seem like*

*North Wales seems like a good place for a holiday—let's go there.*

(NOT . . . *seems as a good place* . . .)

## 292 shall

- 1 *Shall* is a 'modal auxiliary verb' (see 202). We can use *shall* instead of *will* after *I* and *we*.

*I'm catching the 10.30 train. What time shall I be in London?*

(OR . . . *will I be in London?*)

Contractions are *I'll*, *we'll* and *shan't* (see 90).

*I'll see you tomorrow. I shaq't be late.*

- 2 When we make offers, or suggestions, and when we ask for orders or advice, we can use *shall I/we*, but not *will I/we*.

**Shall I** carry your bag? **Shall we** go out for lunch?  
What **shall we** do?

## 293 short answers

- 1 When we answer yes/no questions, we often repeat the subject and auxiliary verb of the question.

'**Can he** swim?' 'Yes, **he can**.' 'Has it stopped raining?' 'No, **it hasn't**.'

*Be* and *have* can be used in short answers.

'**Are you** happy?' 'Yes, **I am**.' 'Have you a light?' 'Yes, **I have**.'

- 2 We can also use 'short answers' in replies to statements, requests and orders.

'**You'll** be on holiday soon.' 'Yes, **I will**.' '**You're** late.' 'No, **I'm** not.'  
'**Don't** forget to telephone.' '**I won't**.'

- 3 We use *do* and *did* in short answers to sentences with no auxiliary verb.

'She **likes** cakes.' 'Yes, she **does**.'  
'That surprised you.' 'It certainly **did**.'

## 294 should

### 1 Forms

*Should* is a 'modal auxiliary verb' (see 202). It has no -s in the third person singular.

He **should** be here soon. (NOT ~~He **shoulds**~~ . . .)

Questions and negatives are made without *do*.

**Should we** tell Judy? (NOT ~~**Do we should**~~ . . . ?)

*Should* is followed by an infinitive without *to*.

Should I **go**? (NOT ~~Should I **to go**~~?)

### 2 Obligation

We often use *should* to talk about obligation, duty and similar ideas.

People **should** drive more carefully.

You **shouldn't** say things like that to Granny.

*Should I . . . ?* is used to ask for advice, offer help or ask for instructions. (Like *Shall I . . . ?* See 292.)

**Should I** go and see the police, do you think?

**Should I** help you with the washing up? What **should I** do?

For the differences between *should*, *ought* and *must*, see 295.

### 3 Deduction

We can use *should* to say that something is possible (because it is logical or normal).

*Henry **should** be here soon — he left home at six.  
'We're spending the winter in Miami.' 'That **should** be nice.'*

### 4 *should have* . . .

We can use *should + perfect infinitive* to talk about the past. This structure is used to talk about things which did not happen, or which may or may not have happened (see 202.3).

*should + have + past participle*

*I **should have phoned** Ed this morning, but I forgot.  
Ten o'clock: she **should have arrived** in her office by now.*

### 5 Conditional

*Should/would* is a conditional auxiliary (see 88).

*I **should/would be** very happy if I had nothing to do.*

- ▷ For *should* after *in case*, see 172. For *should* in *that*-clauses, see 332.1.  
For *should* and *would*, see 296.

## 295 *should, ought and must*

- 1 *Should* and *ought* are very similar. They are both used to talk about obligation and duty, to give advice, and to say what we think it is right for people to do. (See 294 and 232.)

*You **ought to/should** see 'Daughter of the Moon' — it's a great film.*

There is sometimes a small difference. We use *should* or *ought* when we are talking about our own feelings, but we prefer *ought* when we are talking about 'outside' rules, laws, moral duties etc.

*Everybody **ought** to give five per cent of their income to the Third World.*

- 2 *Must* is much stronger than *should* and *ought*. For example, we can give advice with *should* and *ought*; we can give orders with *must*. Compare:

*You **ought** to give up smoking. (= It's a good idea.)*

*The doctor said I **must** give up smoking. (= He told me to.)*

We can use *should* and *ought* to say that something is probable; we can use *must* to say that it is certain. Compare:

*Henry **ought** to be at home now. (= There is a good reason to think he's at home.)*

*Henry **must** be at home now. (= There are reasons to be certain that he's at home.)*

## 296 should and would

There are really three different verbs.

### 1 **should**

This verb (*I should/you should/he should* etc) is used to talk about obligation, and in some other ways. For details, see 294.

### 2 **would**

This verb (*I would/you would/he would* etc) can be used to talk about past habits, and to make polite requests. For details, see 369.

### 3 **should/would**

This verb — the conditional auxiliary — has the following forms:

*I should/would*  
*you would*  
*he/she/it would*  
*we should/would*  
*they would*

The conditional is used in sentences with *if*, and in some other ways. For details, see 88.

## 297 should after why and how

- 1 We can ask a question beginning *Why should . . . ?* to show that we do not understand something.

**Why should** *it get colder when you go up a mountain? You're getting nearer the sun.*

- 2 *Why should I?* and *How should I know?* show that we are angry.

'Give me a cigarette.' **Why should I?**

'What's Susan's phone number?' **How should I know?**

## 298 should: (If I were you) I should . . .

We often give advice by saying *If I were you . . .*

**If I were you,** *I should get that car serviced.*

*I shouldn't worry if I were you.*

Sometimes we leave out *If I were you.*

*I should get that car serviced.*

*I shouldn't worry.*

In sentences like these, *I should* has a similar meaning to *you should*.

## 299 similar words

In this list you will find some pairs of words which look or sound similar. Some others (for example *lay* and *lie*) are explained in other parts of the book. Look in the Index to find out where.

### 1 **beside and besides**

*Beside* = 'at the side of' or 'by'.

*Come and sit **beside** me.*

*Besides* = (a) 'as well as' (preposition)

(b) 'also', 'as well' (adverb)

a. **Besides** German, she speaks French and Italian.

b. I don't like those shoes. **Besides**, they're too expensive.

### 2 **clothes and cloths**

*Clothes* are things you wear: skirts, trousers etc.

Pronunciation: /kloʊðz/.

*Cloths* are pieces of material for cleaning.

Pronunciation: /kloθs/.

*Clothes* has no singular: we say *something to wear*, or *an article of clothing*, or *a skirt* etc, but not ~~a clothe~~.

### 3 **dead and died**

*Dead* is an adjective.

a **dead** man Mrs McGinty is **dead**.

That idea has been **dead** for years.

*Died* is the past tense and past participle of the verb *die*.

Shakespeare **died** in 1616. (NOT ~~Shakespeare dead~~ . . . )

She **died** in a car crash. (NOT ~~She is dead~~ in . . . )

### 4 **economic and economical**

*Economic* refers to the science of economics, or to the economy of a country, state etc.

**economic** theory **economic** problems

*Economical* means 'not wasting money'.

an **economical** little car an **economical** housekeeper

### 5 **elder and eldest; older and oldest**

*Elder* and *eldest* are often used before the names of relations: *brother*, *sister*, *son*, *daughter*, *grandson*, *granddaughter*. *Older* and *oldest* are also possible.

My **elder/older** brother has just got married.

His **eldest/oldest** daughter is a medical student.

If I say *my elder brother/sister*, I only have one brother or sister older than me. If I have more, I say *eldest*.

We say *elder son/daughter* when there are only two; if there are more we say *eldest*.

*Elder* and *eldest* are only used before *brother*, *sister* etc.

In other cases we use *older* and *oldest*.

*She likes **older men**.*

*I'm the **oldest person** in my office.*

## 6 **experience and experiment**

The tests which scientists do are called *experiments*.

*Newton did several **experiments** on light and colour.*

(NOT ... ~~several~~ **experiences** ...)

We also use *experiment* for anything that people do to see what the result will be.

*Try some of this perfume as an **experiment**.*

*Experiences* are the things that you 'live through': the things that happen to you in life.

*I had a lot of interesting **experiences** during my year in Africa.*

The uncountable noun *experience* means 'learning by doing things' or 'the knowledge you get from doing things'.

*Salesgirl wanted --- **experience** unnecessary.*

## 7 **female and feminine; male and masculine**

*Female* and *male* say what sex people, animals and plants belong to.

*A **female** fox is called a vixen.*

*He works as a **male** nurse.*

*Feminine* and *masculine* are used for qualities and behaviour that are supposed to be typical of men or women.

*She has a very **masculine** laugh.*

*It was a very **feminine** bathroom.*

*Feminine* and *masculine* are also used for grammatical forms in some languages.

*The word for 'moon' is **feminine** in French and **masculine** in German.*

## 8 **its and it's**

*Its* is a possessive determiner, like *my*, *your*, *his* and *her*.

*The cat's hurt **its** foot. (NOT ... **it's** foot.)*

*It's* is a contraction for *it is* or *it has*.

***It's** late. (NOT ~~its~~ late.) **It's** stopped raining.*

## 9 **last and latest**

We use *latest* for things which are new.

*What do you think of his **latest** film?*

*Last* can mean 'the one before this'.

*I like his new film better than his **last** one.*

*Last* can also mean 'the one at the end', 'final'.

*This is your **last** chance.*

## 10 **look after and look for**

*Look after* = 'take care of'.

*Will you **look after** the children while I'm out?*

*Look for* = 'try to find'.

*'What are you doing down there?' **Looking for** my keys.'*

## 11 **lose and loose**

*Lose* is a verb — the opposite of *find*.

*I keep **losing** my keys. (NOT . . . **loosing** . . .)*

*Loose* is an adjective — the opposite of *tight*.

*My shoes are too **loose**.*

## 12 **presently and at present**

*Presently* most often means 'not now, later'.

*'Mummy, can I have an ice-cream?' **Presently**, dear.'*

*He's having a rest now. He'll be down **presently**.*

*Presently* is sometimes used to mean 'now', especially in American English. This is the same as 'at present'.

*Professor Holloway is **presently** researching into plant diseases.*

## 13 **price and prize**

The *price* is what you pay if you buy something.

*What's the **price** of the green dress?*

A *prize* is what you are given if you win a competition, or if you have done something exceptional.

*She received the Nobel **Prize** for physics.*

## 14 **principal and principle**

*Principal* is usually an adjective. It means 'main', 'most important'.

*What is your **principal** reason for wanting to be a doctor?*

The noun *Principal* means 'headmaster' or 'headmistress' (of a school for adults).

*If you want to leave early you'll have to ask the **Principal**.*

A *principle* is a scientific law or a moral rule.

*Newton discovered the **principle** of universal gravitation.*

*She's a girl with very strong **principles**.*

### 15 **quite and quiet**

*Quite* is an adverb of degree — it can mean 'fairly' or 'completely'. For details, see 274.

*Our neighbours are **quite** noisy.*

*Quiet* is the opposite of *loud* or *noisy*.

*She's very **quiet**. You never hear her moving about.*

### 16 **sensible and sensitive**

If you are *sensible* you have 'common sense'. You do not make stupid decisions.

*'I want to buy that dress.' 'Be **sensible**, dear. You haven't got that much money.'*

If you are *sensitive* you feel things easily or deeply — perhaps you can easily be hurt.

*Don't shout at her — she's very **sensitive**. (NOT . . . ~~very-sensitive~~.)*

### 17 **shade and shadow**

*Shade* is protection from the sun.

*I'm hot. Let's sit in the **shade** of that tree.*

We say *shadow* when we are thinking of the 'picture' made by an unlighted area.

*In the evening your **shadow** is longer than you are.*

### 18 **some time and sometimes**

*Some time* means 'one day'. It refers to an indefinite time, usually in the future.

*Let's have dinner together **some time** next week.*

*Sometimes* is an adverb of frequency (see 14.2). It means 'on some occasions', 'more than once'.

*I **sometimes** went skiing when I lived in Germany.*

### 300 since (conjunction of time): tenses

*Since* can be a conjunction of time. The tense in the *since*-clause can be present perfect or past, depending on the meaning. Compare:

*I've known her since **we were** at school together.*

*I've known her since **I've lived** in this street.*

Note that the tense in the main clause is normally present perfect (see 243.4–6; 244.3).

***I've known** her since ... (NOT ~~I know~~ her since ...)*

### 301 singular and plural: spelling of plural nouns

- 1 If the singular ends in consonant + *-y* (for example *-by*, *-dy*, *-ry*, *-ty*), change *y* to *i* and add *-es*.

#### Singular

... consonant + *y*

*baby*

*lady*

*ferry*

*party*

#### Plural

... consonant + *ies*

*babies*

*ladies*

*ferries*

*parties*

- 2 If the singular ends in *ch*, *sh*, *s*, *x* or *z*, add *-es*.

#### Singular

*-ch/-sh/-s/-x/-z*

*church*

*crash*

*bus*

*box*

*buzz*

#### Plural

*-ches/-shes/-ses/-xes/-zes*

*churches*

*crashes*

*buses*

*boxes*

*buzzes*

- 3 With other nouns, add *-s* to the singular.

#### Singular

*chair*

*table*

#### Plural

*chairs*

*tables*

#### Singular

*boy*

*girl*

#### Plural

*boys*

*girls*

- 4 Some nouns ending in *-o* have plurals in *-es*. The most common:

#### Singular

*echo*

*hero*

*negro*

*potato*

*tomato*

#### Plural

*echoes*

*heroes*

*negroes*

*potatoes*

*tomatoes*

## 302 singular and plural: pronunciation of plural nouns

The plural ending *-(e)s* has three different pronunciations.

- 1 After one of the 'sibilant' sounds /s/, /z/, /ʒ/, /ʒ/, /tʃ/ and /dʒ/, *-es* is pronounced /ɪz/.

*buses* /ˈbʌsɪz/    *crashes* /ˈkræʃɪz/    *watches* /ˈwɒtʃɪz/  
*quizzes* /ˈkwɪzɪz/    *garages* /ˈgærɑːʒɪz/    *bridges* /ˈbrɪdʒɪz/

- 2 After any other 'unvoiced' sound (/p/, /f/, /θ/, /t/ or /k/), *-(e)s* is pronounced /s/.

*cups* /kʌps/    *baths* /bɑːθs/    *books* /bʊks/  
*coughs* /kɒfs/    *plates* /pleɪts/

- 3 After all other sounds (vowels and voiced consonants except /z/, /ʒ/ and /dʒ/), *-(e)s* is pronounced /z/.

*days* /deɪz/    *knives* /naɪvz/    *hills* /hɪlz/    *dreams* /driːmz/  
*boys* /bɔɪz/    *clothes* /kləʊðz/    *legs* /legz/    *songs* /sɒŋz/  
*trees* /triːz/    *ends* /endz/

- 4 Exceptions:

*house* /haʊs/    *houses* /haʊzɪz/    *mouth* /maʊθ/    *mouths* /maʊðz/

Third-person singular verbs (for example *watches*, *wants*, *runs*) and possessives (for example *George's*, *Mark's*, *Joe's*) follow the same pronunciation rules.

## 303 singular and plural: irregular plurals

- 1 The most common words with irregular plurals are:

Singular	Plural	Singular	Plural	Singular	Plural
<i>calf</i>	<i>calves</i>	<i>series</i>	<i>series</i>	<i>child</i>	<i>children</i>
<i>half</i>	<i>halves</i>	<i>analysis</i>	<i>analyses</i>		
<i>knife</i>	<i>knives</i>	<i>basis</i>	<i>bases</i>	<i>sheep</i>	<i>sheep</i>
<i>leaf</i>	<i>leaves</i>	<i>crisis</i>	<i>crises</i>	<i>fish</i>	<i>fish</i>
<i>life</i>	<i>lives</i>			<i>aircraft</i>	<i>aircraft</i>
<i>loaf</i>	<i>loaves</i>	<i>cactus</i>	<i>cacti</i>		
<i>self</i>	<i>selves</i>	<i>fungus</i>	<i>fungi</i>		
<i>shelf</i>	<i>shelves</i>	<i>nucleus</i>	<i>nuclei</i>		
<i>thief</i>	<i>thieves</i>	<i>radius</i>	<i>radii</i>		
<i>wife</i>	<i>wives</i>				
		<i>bacterium</i>	<i>bacteria</i>		
<i>foot</i>	<i>feet</i>				
<i>tooth</i>	<i>teeth</i>	<i>vertebra</i>	<i>vertebrae</i>		
<i>goose</i>	<i>geese</i>				
<i>man</i>	<i>men</i>	<i>criterion</i>	<i>criteria</i>		
<i>woman</i>	<i>women</i>	<i>phenomenon</i>	<i>phenomena</i>		
<i>mouse</i>	<i>mice</i>				

- 2 *Cattle, people and police* are plural words with no singular.

**Cattle are** selling for very high prices this year.

(NOT ~~Cattle is selling~~ . . .)

**The police are** searching for a tall dark man with a beard.

(NOT ~~The police is searching~~ . . .)

**People are** funny. (NOT ~~People is funny~~.)

### 304 singular and plural: singular words ending in -s

Some words that end in -s are singular. Some important examples are:

- a *billiards, draughts* and other names of games ending in -s  
*Draughts is* an easier game than chess.
- b *measles, rabies* and other names of illnesses ending in -s  
*Rabies is* widespread in Europe. We hope we can keep **it** out of Britain.
- c *athletics, politics, mathematics* and other words ending in -ics  
*The mathematics that I did at school has* not been very useful to me.
- d *news*  
*Ten o'clock. Here is* the news.

### 305 singular and plural: singular words with plural verbs

- 1 We often use plural verbs with words like *family, team, government*, which refer to groups of people.

**My family have** decided to move to Nottingham.

We also use plural pronouns, and we use *who*, not *which*.

**My family are** wonderful. **They** do all **they** can for me.

'How **are the team?**' **They** are very confident.' 'Not surprising.

**They're** the only team **who have** ever won all **their** matches right through the season.'

- 2 We prefer singular verbs and pronouns (and *which*) if we see the group as an 'impersonal' unit. (For example, in statistics.)

*The average family (which has* four members) . . .

- 3 *A number of* and *a group of* are used with plural nouns, pronouns and verbs.

**A number of my friends feel** that **they are** not properly paid for the work **they** do. (NOT ~~A number of my friends feels~~ . . .)

- ▷ For singular and plural with a lot of, see 205.2.

### 306 singular and plural: plural expressions with singular verbs

- 1 When we talk about amounts and quantities we usually use singular verbs, pronouns and determiners, even if the noun is plural.

**Where's that** *five pounds I lent you?*

(NOT ~~Where are those five pounds . . . ?~~)

*Twenty miles is* a long way to walk.

'How much petrol have we got left?' 'About five litres.' '**That isn't** enough. We'll have to get some more.'

For expressions like *another six weeks*, see 33.3.

- 2 The expression *more than one* is used with a singular noun and verb.

*More than one person is* going to lose his job.

- 3 Expressions like *one of my . . .* are followed by a plural noun and a singular verb.

**One of my friends is** going to Honolulu.

- 4 Some expressions joined by *and* have singular verbs. This happens when we think of the two nouns as 'one thing'.

**Fish and chips is** getting very expensive.

(NOT ~~Fish and chips are . . .~~)

'**War and Peace is** the longest book I've ever read.'

### 307 singular and plural: anybody etc

*Anybody, anyone, somebody, someone, nobody, no-one, everybody* and *everyone* are used with singular verbs.

**Is** everybody ready?

(NOT ~~Are everybody ready?~~)

However, we often use *they, them* and *their* to refer to these words, especially in an informal style.

*If anybody calls, tell them I'm out, but take their name and address.*

*Nobody phoned, did they?*

*Somebody left their umbrella behind yesterday. Would they please collect it from the office?*

*Everybody thinks they're different from everybody else.*

*They, them* and *their* are not plural in sentences like these. They mean 'he or she', 'him or her' and 'his or her'. In a more formal style, we usually use *he, him* and *his* (meaning 'he or she', etc).

*When somebody does not want to live, he can be very difficult to help.*

### 308 slow(ly)

In an informal style, we sometimes use *slow* as an adverb instead of *slowly*.

Drive **slow** — *I think we're nearly there.*

Can you go **slow** for a minute?

*Slow* is used in road signs.

**SLOW** — DANGEROUS BEND

### 309 small and little

*Small* is used just to talk about size. It is the opposite of *big* or *large* (see 65).

Could I have a **small** brandy, please?

You're too **small** to be a policeman.

The adjective *little* is used to talk about size + emotion.

If we call something *little*, we usually have some sort of feeling about it — we like it, or we dislike it, or it makes us laugh, or we think it is sweet, for example.

**Poor little thing** — *come here and let me look after you.*

'What's he like?' 'Oh, he's a **funny little man**.'

What's that **nasty little boy** doing in our garden?

They've bought a **pretty little house** in the country.

*Little* is not usually used after a verb (see 10).

▷ For the determiners *little* and *few*, see 129.

### 310 smell

There are three ways to use *smell*.

- 1 As a 'copula verb' (see 91), to say what sort of smell something has. Progressive tenses are not used.

subject + *smell* + adjective

*That **smells** funny. What's in it? (NOT ~~That is smelling~~ . . .)*

*Those roses **smell** beautiful. (NOT . . . ~~beautifully~~-)*

subject + *smell of* + noun

*The railway carriage **smelt of** beer and old socks.*

- 2 To say what we perceive with our noses. Progressive tenses are not used. We often use *can smell* (see 81).

*Can you **smell** burning? I **can smell** supper.*

- 3 To say that we are using our noses to find something out. Progressive tenses can be used.

'What are you doing?' **'I'm smelling** my shirt to see if I can wear it for another day.'

### 311 so and not with hope, believe etc

- 1 We use *so* after several verbs instead of repeating a *that*-clause.

'Do you think we'll have good weather?' **'I hope so.'**

(= 'I hope that we'll have good weather.')

The most common expressions like this are: *hope so, expect so, believe so, imagine so, suppose so, guess so, reckon so, think so, be afraid so.*

'Is that Alex?' **'I think so.'**

'Did you lose?' **'I'm afraid so.'**

We do not use *so* before a *that*-clause.

*I hope that we'll have good weather.*

(NOT ~~*+hope so, that we'll have good weather.*~~)

- 2 We can make these expressions negative in two ways.

a. subject + verb + not

'Will it rain?' **'I hope not.'**

'You won't be here tomorrow, will you?' **'I suppose not.'**

'Did you win?' **'I'm afraid not.'**

b. subject + do not + verb + so

'You won't be here tomorrow.' **'I don't suppose so.'**

'Is he ready?' **'I don't think so.'**

'Will it rain?' **'I don't expect so.'**

*Hope* and *be afraid* are always used in the first structure.

(We don't say *I don't hope so* or *I'm not afraid so*.)

*Think* is usually used in the second structure.

(We don't often say *I think not*.)

### 312 so am I, so do I etc

We can use *so* to mean *also*, in a special structure with

auxiliary verb + subject.

so + auxiliary verb + subject

Louise **can** dance beautifully, and **so can** her sister.

'I've lost the address.' **'So have I.'**

*Be* and *have* can be used in this structure, **even when they are not** auxiliary verbs.

*I **was** tired, and **so were** the others.*

*'I **have** a headache.' 'So **have** I.'*

After a clause with no auxiliary verb, we use *do/did*.

*'I **like** whisky.' 'So **do** I.'*

- ▷ For the negative structure *neither/nor am I*, etc, see 217.

## 313 'social' language

Every language has fixed expressions which are used on particular social occasions — for example, when people meet, leave each other, go on a journey, sit down to meals, and so on. English does not have very many expressions of this kind: here are some of the most important.

### 1 Introductions

Common ways of introducing strangers to each other are:

*John, do you know Helen?*

*Helen, this is my friend John.*

*Sally, I don't think you've met Elaine.*

*I don't think you two know each other, do you?*

*Can/May I introduce John Willis? (more formal)*

When people are introduced, they say *Hello* or *How do you do?* (more formal). Note that *How do you do?* is not a question, and there is no answer to it. (It does not mean the same as *How are you?*)

CELIA: *I don't think you two know each other, do you?*

*Alec Sinclair — Paul McGuire.*

ALEC: ]  
PAUL: ] **How do you do?**

People who are introduced often shake hands.

### 2 Greetings

*Hello. Hi.* (very informal)

More formal greetings:

*Good morning/afternoon/evening.*

When leaving people:

*Goodbye.*

*Bye.* (informal)

*Bye-bye.* (often used to and by children)

*See you.* (informal)

*Cheers.* (informal)

*Good morning/afternoon/evening/night.* (formal)

### 3 Asking about health etc

When we meet people, we often ask politely about their health or their general situation.

*How are you? How are things? (informal)*  
*How's it going? (informal)*

Answers:

*Very well, thank you. And you? Fine, thank you.*

Informal answers:

*Not too bad.*  
*OK.*  
*So-so.*  
*All right.*  
*(It) could be worse.*

### 4 Special greetings

Greetings for special occasions are:

*Happy birthday! OR Many happy returns!*  
*Happy New Year/Easter!*  
*Happy/Merry Christmas!*

### 5 Holidays

Before somebody starts a holiday, we may say:

*Have a good holiday.*

When the holiday is over, we may say:

*Did you have a good holiday?*

### 6 Journeys

We do not *always* wish people a good journey, but common expressions are:

*Have a good trip. Have a good journey.*  
*Safe journey home.*

After a journey (for example, when we meet people at the airport or station), we may say:

*Did you have a good journey/flight?*  
*Did you have a good trip?*

### 7 Meals

We do not have fixed expressions for the beginning and end of meals. At family meals, people may say something nice about the food during the meal (for example *This is very nice*) and after (for example *That was lovely: thank you very much*). Some religious people say 'grace' (a short prayer) before and after meals.

## 8 Visits and invitations

There are no fixed expressions which have to be used when you visit people.

Invitations often begin:

*Would you like to . . . ?*

Possible replies:

*Thank you very much. That would be very nice.*

*Sorry. I'm afraid I'm not free.*

It is normal to thank people for hospitality at the moment of leaving their houses.

*Thank you very much. That was a wonderful evening.*

## 9 Sleep

When somebody goes to bed, people often say *Sleep well*.

In the morning, we may ask *Did you sleep well?*

*Did you have a good night?* or *How did you sleep?*

## 10 Giving things

We do not have an expression which is always used when we give things. We sometimes say *Here you are*, especially when we want to make it clear that we are giving something.

*'Have you got a map of London?' 'I think so. Yes, **here you are.**'*

*'Thanks.'*

## 11 Asking for things

We normally ask for things by using yes/no questions.

***Could you lend me a pen?*** (NOT ~~*Please lend me a pen.*~~)

For details, see 286.

## 12 Thanks

Common ways of thanking people are:

*Thank you very much. Thank you.*

*Thanks.* (informal) *Thanks a lot.* (informal)

If we want to reply to thanks, we can say:

*Not at all. You're welcome.*

*That's (quite) all right. That's OK.* (informal)

▷ For more information about *please* and *thank you*, see 249.

For requests (asking for things), see 286.

For the use of *excuse me*, *pardon* and *sorry*, see 121.

For the use of names and titles, see 211.

For expressions used when telephoning, see 341.

For rules for letter-writing, see 192.

## 314 some and any

- 1 *Some* and *any* are determiners (see 96). We use them before uncountable and plural nouns. Before another determiner or a pronoun we use *some of* and *any of*. Compare:

*Would you like **some** ice-cream?*  
*Would you like **some of this** ice-cream?*  
*I can't find **any** cigarettes.*  
*I can't find **any of my** cigarettes.*

- 2 *Some* and *any* have the same sort of meaning as the indefinite article *a/an* (see 39). They refer to an indefinite quantity or number. Compare:

*Have you got **an** aspirin?* (singular countable noun)  
*Have you got **any** aspirins?* (plural countable noun)  
*I need **some** medicine.* (uncountable noun)

- 3 We usually use *some* in affirmative clauses, and *any* in questions and negatives. Compare:

*I want **some** razor-blades.*  
*Have you got **any** razor-blades?*  
*Sorry, I haven't got **any** razor-blades.*

We use *some* in questions if we expect or **want** people to say 'yes'; for example, in offers and requests.

*Would you like **some** more beer?*  
*Could I have **some** brown rice, please?*  
*Have you got **some** glasses that I could borrow?*

We use *any* after words that have a negative meaning: for example *never*, *hardly*, *without*. We often use *any* after *if*.

*You **never** give me **any** help.*  
*We got there **without any** trouble.*  
*There's **hardly any** tea left.*  
*If you want **some/any** help, let me know.*

- 4 When *some* is used before a noun, it usually has the 'weak' pronunciation /səm/ (see 358).

▷ For other uses of *any*, see 34; 35.

For other uses of *some*, see 315.

For *somebody* and *anybody*, *something* and *anything* etc, see 317.

For the difference between *some/any* and no article, see 316.

For *not ... any*, *no* and *none*, see 221; 223.

## 315 **some**: special uses

- 1 We can use *some* (with the strong pronunciation /sʌm/) to make a contrast with *others*, *all* or *enough*.

*Some* people like the sea; *others* prefer the mountains.

*Some* of us were late, but we were **all** there by ten o'clock.

I've got **some** money, but not **enough**.

- 2 We can use *some* (/sʌm/) with a singular countable noun, to talk about an unknown person or thing.

There must be **some job** I could do.

She's living in **some village** in Yorkshire.

We can use this structure to suggest that we are not interested in somebody or something, or that we do not think much of somebody or something.

Mary's gone to Australia to marry **some sheep farmer** or other.

I don't want to spend my life doing **some boring little office job**.

## 316 **some/any** and no article

- 1 We use *some* and *any* when we are talking about fairly small numbers or quantities. Compare:

Have you got **any** animals? (NOT ~~Have you got animals?~~)

Do you like animals? (= all animals)

- 2 *Some* and *any* refer to uncertain, indefinite or unknown numbers or quantities. Compare:

You've got **some great pop records**.

You've got **beautiful toes**.

(NOT ~~You've got some beautiful toes.~~ This would mean an uncertain number — perhaps six or seven, perhaps more or less.)

Would you like **some more beer**?

(Not a definite amount — as much as the hearer wants.)

We need **beer**, sugar, eggs, butter, rice and toilet paper.

(The usual quantities — more definite.)

## 317 **somebody** and **anybody**, **something** and **anything**, etc

The difference between *somebody* and *anybody*, *someone* and *anyone*, *somewhere* and *anywhere*, *something* and *anything* is the same as the difference between *some* and *any*. (See 314.) Most important, we use

*somebody* etc in affirmative clauses, and *anybody* etc usually in questions and negatives.

*There's **somebody** at the door.*

*Did **anyone** telephone?*

*I **don't** think **anybody** telephoned.*

*Let's go **somewhere** nice for dinner.*

*Do you know **anywhere** nice?*

*I **don't** want to go **anywhere** too expensive.*

*Somebody, something, anybody and anything* are singular. Compare:

***There is somebody** waiting to see you.*

***There are some people** waiting to see you.*

### 318 sound

- 1 *Sound* is a 'copula verb' (see 91). We use it **with** adjectives, not adverbs.

*You **sound unhappy**. What's the matter?*

(NOT ~~*You sound unhappily*~~ . . .)

- 2 We do not usually use *sound* in progressive tenses.

*The car **sounds** a bit funny.* (NOT ~~*The car is sounding*~~ . . .)

- 3 Note the structure *sound like*.

*That **sounds like** Arthur coming upstairs.*

### 319 spelling: capital letters

We use capital (big) letters at the beginning of the following words:

days, months and public holidays

**Sunday Tuesday March September Easter Christmas**

the names of people and places

**John Mary Canada The United States Mars**

**North Africa The Ritz Hotel The Super Cinema**

people's titles

**Mr Smith Professor Jones Colonel Blake Dr Webb**

'nationality' and regional words (nouns or adjectives)

*He's **Russian** I speak **German** **Japanese** history*

***Catalan** cooking*

the first word (and often other important words) in the names of books, plays, films, pictures, magazines etc

***Gone with the wind** OR **Gone with the Wind** **New Scientist***

### 320 spelling: **ch** and **tch**, **k** and **ck**

- 1 After one vowel, at the end of a word, we usually write **-ck** and **-tch** for the sounds /k/ and /tʃ/.

*back neck sick lock stuck*  
*catch fetch stitch botch hutch*

Exceptions:

*rich which such much*

- 2 After a consonant or two vowels, we write **-k** and **-ch**.

*bank work talk march bench*  
*break book week peach coach*

### 321 spelling: doubling final consonants

When we add **-ed**, **-ing**, **-er** or **-est** to a word, we sometimes double the final consonant.

*big **bigg**er sit **sitt**ing stop **stopp**ed*

- 1 We double the following letters:

<i>b: <b>rub</b> <b>rub</b>bing</i>	<i>n: <b>begin</b> <b>begin</b>ner</i>
<i>d: <b>sad</b> <b>sadd</b>er</i>	<i>p: <b>stop</b> <b>stopp</b>ed</i>
<i>g: <b>big</b> <b>bigg</b>er</i>	<i>r: <b>prefer</b> <b>prefer</b>red</i>
<i>l: <b>travel</b> <b>travell</b>ing</i>	<i>t: <b>sit</b> <b>sitt</b>ing</i>
<i>m: <b>slim</b> <b>slimm</b>er</i>	

- 2 We only double these letters when they come at the end of a word.  
Compare:

***hop** **hopp**ing BUT *hope* *hop*ing*  
***fat** **fatt**er BUT *late* *lat*er*  
***plan** **plann**ed BUT *phone* *phon*ed*

- 3 We only double when there is *one* consonant after *one* vowel letter.  
Compare:

***fat** **fatt**er BUT *fast* *fast*er (NOT *fast*er)*  
***bet** **bett**ing BUT *beat* *beat*ing (NOT *beat*ing)*

- 4 In longer words, we only double a consonant if the *last* syllable of the word is stressed. Compare:

*up'**set** up'**sett**ing BUT *'visit* *'visit*ing*  
*be'**gin** be'**ginn**ing BUT *'open* *'open*ing*  
*re'**fer** re'**ferr**ing BUT *'offer* *'offer*ing*

Note the spelling of these words:

'gallop 'gallo**pp**ing 'gallo**pp**ed (NOT ~~gallopp~~ing ~~gallopp~~ed)  
de'velop de'velo**pp**ing de'velo**pp**ed (NOT ~~develo~~pping ~~develo~~pped)

- 5** In British English, we double / at the end of a word even in an unstressed syllable.

'travel 'travelling 'equal 'equalled

(In American English, / is not doubled in unstressed syllables: 'travelling.)

- 6** The reason for doubling is to show that a vowel has a 'short' sound. This is because, in the middle of a word, a stressed vowel before one consonant is usually pronounced long. Compare:

hoping /'həʊpɪŋ/ hopping /'hɒpɪŋ/  
later /'leɪtə(r)/ latter /'lætə(r)/  
dining /'daɪnɪŋ/ dinner /'dɪnə(r)/

## 322 spelling: final -e

- 1** When a word ends in -e, and we add something that begins with a vowel (-ing, -able or -ous), we usually leave out the -e.

hope hoping  
make making  
note notable  
fame famous

This does not happen with words ending in -ee.

see seeing agree agreeable

- 2** In words that end in -ge or -ce, we do not leave out -e before a or o.

courage courageous replace replaceable

## 323 spelling: full stops with abbreviations

A full stop is the small dot (.) that comes at the end of a sentence. In American English, full stops are often used after abbreviations (shortened words), and after letters that are used instead of full names.

Mr. Lewis Ms. Johnson Andrew J. McCann  
etc. e.g. U.S.A.  
S.E. Asia T.S. Eliot

In British English, we now usually write abbreviations without full stops.

Mr Lewis Ms Johnson Andrew J McCann  
etc e g USA  
S E Asia T S Eliot

## 324 spelling: hyphens

- 1 A hyphen is the short line (-) that we put between two words in an expression like *book-shop* or *ex-husband*.  
The rules about hyphens are complicated and not very clear. If you are not sure, look in the dictionary, or write an expression as two separate words. Note:

a. We usually put a hyphen in a two-part adjective like *blue-eyed*, *broken-hearted*, *grey-green*, *nice-looking*.

b. When we use a group of words as an adjective before a noun, we use hyphens. Compare:

*He's **out of work**.*      *an **out-of-work** lorry driver*  
*It cost **ten pounds**.*      *a **ten-pound** note*

c. In groups of words where the first word is stressed, we usually put hyphens. Compare:

*'book-case    a paper 'bag*  
*'make-up    to make 'up*

- 2 We use a hyphen to separate the parts of a long word at the end of a line. (To see where to divide words, look in a good dictionary.)

*. . . is not in accordance with the policy of the present govern-  
ment, which was . . .*

## 325 spelling: ie and ei

The sound /i:/ (as in *believe*) is often written *ie*, but not usually *ei*. However, we write *ei* after *c*. English children learn a rhyme:

'i before e  
except after c.'

*believe    chief    field    grief*  
*ceiling    deceive    receive    receipt*

## 326 spelling: -ise and -ize

Many English verbs can be spelt with either *-ise* or *-ize*. In American English, *-ize* is preferred in these cases. Examples:

*mechanize/mechanise* (GB)    *mechanize* (US)  
*computerize/computerise* (GB)    *computerize* (US)

Words of two syllables usually have *-ise* in both British and American English.

*surprise* (NOT *surprize*)    *revise*    *advise*    *comprise*    *despise*  
(but GB and US *capsize*, *baptize*; GB also *baptise*)

A number of longer words only have *-ise*, in both British and American English. These include:

*compromise exercise improvise supervise televise*  
*advertise* (US also *advertize*)

Note also *analyse* (US *analyze*).

If in doubt, use *-ise* — it is almost always correct, at least in British English.

### 327 spelling: **-ly**

- 1 We often change an adjective into an adverb by adding **-ly**.

*late lately right rightly hopeful hopefully*  
*real really* (NOT ~~*realy*~~) *definite definitely*  
*complete completely* (NOT ~~*completly*~~)

- 2 *-y* changes to *-i* (see 328).

*happy happily easy easily dry drily*

- 3 If an adjective ends in *-le*, we change *-le* to *-ly*.

*idle idly noble nobly*

- 4 If an adjective ends in *-ic*, the adverb ends in *-ically*.

*tragic tragically*

- 5 Exceptions: *truly, wholly, fully, shyly, publicly*.

### 328 spelling: **y and i**

- 1 When we add something to a word that ends in *-y*, we usually change *-y* to *-i*.

*hurry hurried marry marriage*  
*happy happily fury furious*  
*easy easier merry merriment*  
*busy business*

Generally, nouns and verbs that end in *-y* have plural or third person singular forms in *-ies*.

*story stories hurry hurries spy spies*

- 2 We do not change *-y* to *-i* before *-i* (for example, when we add *-ing*, *-ish*, *-ism*, *-ize*).

*try trying Tory Toryism baby babyish*

- 3** We do not change -y to -i- after a vowel letter.

*buy buying play played enjoy enjoyment*  
*grey greyish*

Exceptions: *say said lay laid pay paid*

- 4** We change -ie to -y- before -ing.

*die dying lie lying*

## 329 spelling and pronunciation

In many English words, the spelling is different from the pronunciation. (This is because our pronunciation has changed over the last few hundred years, while the spelling system has stayed more or less the same.)

Here are some difficult common words:

- 1** two syllables, not three:

*asp(i)rin bus(i)ness diff(e)rent ev(e)ning ev(e)ry*  
*marri(a)ge med(i)cine om(e)lette rest(au)rant sev(e)ral*

- 2** three syllables, not four:

*comf(or)table secret(a)ry temp(e)rature*  
*veg(e)table us(u)ally*

- 3** silent letters:

*shou(l)d cou(l)d wou(l)d ca(l)m wa(l)k ta(l)k ha(l)l*  
*whis(t)le cas(t)le lis(t)en fas(t)en Chris(t)mas of(t)en*  
*(w)rite (w)rong*  
*(k)now (k)nife (k)nee (k)nock (k)nob*  
*si(g)n forei(g)n champa(g)ne*  
*clim(b) com(b) dum(b) hym(n) autum(n)*  
*w(h)ere w(h)y w(h)at w(h)en w(h)ich w(h)ether*  
*(h)onest (h)onour (h)our*  
*cu(p)board i(s)land i(r)on mus(c)le (p)sychology*  
*han(d)kerchief san(d)wich We(d)nesday*  
*(w)ho (w)hose (w)hole*

*juice /dʒu:s/ heart /hɑ:t/*

## 330 still, yet and already

### 1 Meanings

*Still*, *yet* and *already* are all used to talk about things which are going on, or expected, around the present. We use these words to say whether something is in the past, the present or the future.

- a *Still* says that something is in the present, not the past — it has not finished.

*She's **still** asleep.*

*It's **still** raining.*

- b *Not yet* says that something is in the future, not the present or past. We are waiting for it.

*'Has Sally arrived?' **Not yet.***

*The postman **hasn't** come **yet.***

In questions, *yet* asks whether something is in the future or not.

*Has the postman come **yet?***

- c *Already* says that something is in the present or past, not the future — perhaps it has happened sooner than we expected.

*'When's Sally going to come?' **She's already** here.'*

*'You must go to Scotland.' 'I've **already** been.'*

### 2 Position

*Already* and *still* go in 'mid-position' (see 13.2).

*He's **already** gone.*

*When I was fourteen I **already** knew that I wanted to be a doctor.*  
(NOT ~~*Already when I was fourteen . . .*~~)

*She's **still** working.*

*I **still** remember your first birthday.*

*Yet* usually goes at the end of a clause.

*She **hasn't** gone **yet.***

*I **haven't** done the shopping **yet.***

### 3 Tenses

We usually use *already* and *yet* with the present perfect tense in British English.

*She **hasn't** gone **yet.***

*I've **already** forgotten.*

- ▷ For other meanings of *still* and *yet*, see a good dictionary.  
For the meaning of *ever*, see 116.

### 331 subject and object forms

- 1 Six English words have one form when they are used as subjects, and a different form when they are used as objects.

subject	object
I	me
he	him
she	her
we	us
they	them
who	whom

Compare:

*I like dogs.*

**We** went to see **her**.

*Dogs don't like **me**.*

**She** came to see **us**.

*This is Mr Perkins, **who** works with me.*

*This is Mr Perkins, with **whom** I am working at the moment.*

- 2 In informal English, we use object-forms (*me, him* etc) after *be* and in one-word answers.

*'Who's that?' 'It's **me**.'*

*'Who said that?' '**Him**.'*

In a more formal style, we prefer to use a subject form with a verb.

*'Who said that?' '**He did**.'*

- 3 *Whom* is not often used in informal English. We prefer to use *who* as an object, especially in questions.

**Who** did you go with?

**Who** have you invited?

We use *whom* in a more formal style; and we must use *whom* after a preposition.

**Whom** did they arrest? (formal)

**With whom** did you go? (very formal)

- 4 After *as, than, but* and *except*, we use object forms in an informal style.

*My sister's nearly as tall as **me**.*

*I'm prettier than **her**.*

*Everybody but **me** knew what was happening.*

*Everybody except **him** can come.*

Subject forms are used in a more formal style (usually with auxiliary verbs) after *as* and *than*.

*My sister's nearly as tall as **I am**.*

*I'm prettier than **she is**.*

## 332 subjunctive

- 1 The subjunctive is a special verb form that looks the same as the infinitive. It is sometimes used to say that something should be done.

*It's important that everybody **write** to the President.*

*The Director asked that he **be** allowed to advertise for more staff.*

In British English the subjunctive is unusual. We usually express this kind of idea with *should*.

*It's important that everybody **should write** to the President.*

*The Director asked that he **should be** allowed to advertise for more staff.*

- 2 We often use *were* instead of *was* after *if* and *I wish*. (See 165 and 367.) This is also a subjunctive.

*If I **were** you, I would stop smoking. I **wish I were** on holiday now.*

## 333 suggest

We do not use *suggest* with object + infinitive.

*My uncle suggested that I should get a job in a bank.*

*My uncle suggested getting a job in a bank.*

(NOT *My uncle **suggested me to get** . . .*)

## 334 such and so

- 1 We use *such* before a noun (with or without an adjective).

*such* (+ adjective) + noun

*She's **such a fool**.*

*He's got **such patience**.*

*I've never met **such a nice person**.*

*It was **such a good film** that I saw it twice.*

We use *so* before an adjective alone (without a noun).

*so* + adjective

*She's **so stupid**.*

*He's **so patient** with her.*

*Your mother's **so nice**.*

*The film was **so good** that I saw it twice.*

We cannot use either *such* or *so* with *the* or a possessive.

*I am happy to visit your country — it's **so beautiful**.*

(NOT . . . **your so beautiful** country.)

- 2 *So* and *such* can be followed by *that*-clauses.

It was **so** cold **that** we stopped playing.

It was **such** a cold afternoon **that** we stopped playing.

### 335 surely

*Surely* does not mean the same as *certainly*. Compare:

That's **certainly** a mouse. (= I know that's a mouse.)

**Surely** that's a mouse? (= That seems to be a mouse. How surprising!)

**Surely** expresses surprise.

We can use *surely not* to show that we do not want to believe something, or find it difficult to believe.

**Surely** you're not going to wear that hat?

### 336 sympathetic

*Sympathetic* is a 'false friend' for people who speak European languages. It does not mean the same as *sympathique*, *sympathisch*, *sympatisk*, *simpatico* etc.

The people in my class are all very **nice/pleasant**.

(NOT . . . very **sympathetic**.)

*Sympathetic* means 'sharing somebody's feelings' or 'sorry for somebody who is in trouble'.

I'm **sympathetic** towards the strikers.

She's always very **sympathetic** when people feel ill.

### 337 take

*Take* has three main meanings.

#### 1 The opposite of *give*

She **took** my plate and gave me a clean one.

Who's **taken** my bicycle?

'Could I speak to Andrew?' 'I'm sorry, he's not here just now. Can I **take** a message?'

We take something *from/out of/off* a place, and *from* a person.

Could you **take** some money **out of** my wallet?

They **took** everything away **from** me. (NOT ~~They took me everything.~~)

#### 2 The opposite of *put*

I **took** off my coat and put on a dressing gown.

He **took** a ring out of his pocket and put it on her finger.

### 3 The opposite of *bring*

We can use *take* for movements away from the speaker, and in other directions (see 71).

Can you **take** me to the station tomorrow morning?

**Take** this form to Mr Collins, ask him to sign it, and then *bring* it back.

▷ For *take* with expressions of time, see 338.

## 338 take (time)

We can use *take* to say how much time we need to do something. Three constructions are possible.

person + *take* + time + infinitive

I **took** three hours to get home last night.

She **takes** all day to wake up.

activity + *take* (+ person) + time

The journey **took** me three hours.

Gardening **takes** a lot of time.

It + *take* (+ person) + time + infinitive

It **took** me three hours to get home last night.

It **takes** ages to do the shopping.

## 339 tall and high

1 We use *tall* for things which are this shape:

We can talk about tall people, trees, and sometimes buildings.

How **tall** are you? (NOT ~~How high are you?~~)

There are some beautiful **tall** trees at the end of our garden.

We do not use *tall* for things which are this shape:

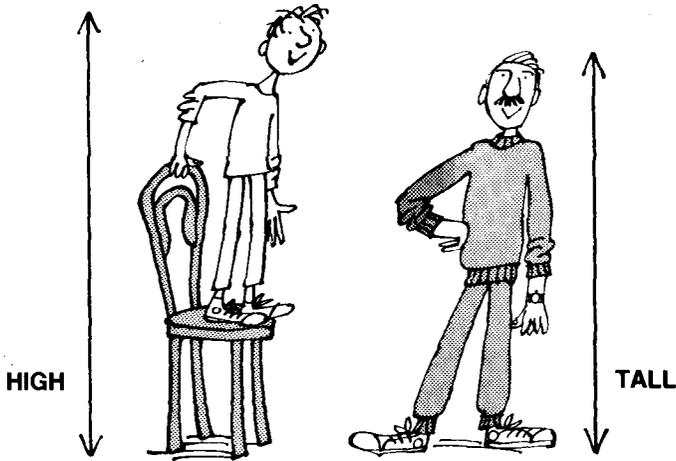

We use *high*.

Mont Blanc is the **highest** mountain in Europe.

(NOT ... ~~the tallest mountain~~.)

It's a very **high** room. (NOT ... ~~tall room~~.)

- 2 We use *high* to say how far something is above the ground. A child standing on a chair may be *higher* than his father, but not *taller*.

- 3 Parts of the body are *long*, not *tall*.  
*She's got beautiful **long** legs.* (NOT ... **tall** legs.)

## 340 taste

We can use *taste* in three ways.

- 1 *Taste* can be a 'copula verb' (see 91). We can describe the taste of food etc by using taste + adjective or taste of + noun.

Progressive tenses are not used.

taste + adjective

*This **tastes nice**. What's in it?* (NOT ~~*This is tasting*~~ ...)

*The wine **tasted horrible**.* (NOT ... **horribly**.)

taste of + noun

*The wine **tasted of old boots**.*

- 2 We can talk about our sensations by using *taste* with a personal subject. Progressive tenses are not possible; we often use *can taste*. (See 81.)  
*I **can taste** garlic and mint in the sauce.* (NOT ~~*am tasting*~~ ...)
- 3 We can talk about using our sense of taste to find something out.  
*'Stop eating the cake.' 'I'm just **tasting** it to see if it's OK.'*

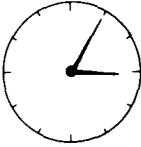

## 341 telephoning

- 1 We usually answer a private phone like this:  
*Hello. Abingdon three seven eight double two. (= 37822)*  
 Some people give their names.  
*Hello. Albert Packard.*
- 2 We ask for a person like this:  
*'Could I speak to Jane Horrabin?'*
- 3 We can identify ourselves with the word *speaking*.  
*'Could I speak to Jane Horrabin?' **Speaking.** (= That's me.)*
- 4 Note the difference between *this* (the speaker) and *that* (the hearer).  
**This** is Corinne. Is **that** Susie?  
 (Americans use *this* for both speaker and hearer.)
- 5 We ask for a number like this:  
*Could I have Bristol three seven eight seven eight?*  
*Could I have extension two oh four six? (= 2046)*
- 6 The telephonist may say:  
*One moment, please.*  
*Hold on a moment, please.*  
*Trying to connect you. (The number's) ringing for you.*  
*Putting you through now.*  
*I'm afraid this number is engaged/busy.*  
*I'm afraid this number is not answering/there's no reply from this extension.*  
*Will you hold? (= Will you wait?)*  
 A possible answer to the last question:  
*No, I'll ring again later. OR I'll ring back later.*
- 7 If somebody is not there:  
*'I'm afraid she's not in at the moment. Can I take a message?'*  
*'Yes. Could you ask her to ring me back this evening?'*
- 8 Other expressions:  
*I'm afraid you've got the wrong number.*  
*I'm sorry. I've got the wrong number.*  
*Could you speak louder? It's a bad line.*  
*Could I possibly use your phone?*  
*What's the code for London?*  
*How do I call the operator?*

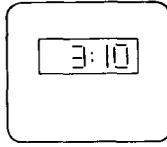

I'd like to make a reversed charge call/transferred charge call to Washington 348 6767. (The person at the other end pays. Americans call this a *collect call*.)

## 342 telling the time

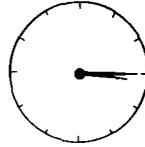

- 1 There are two ways of saying what time it is.

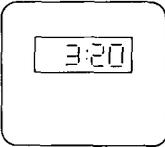

five past three  
three five

ten past three  
three ten

a quarter past three  
three fifteen

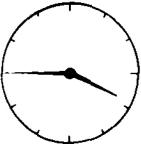

twenty past three  
three twenty

half past three  
three thirty

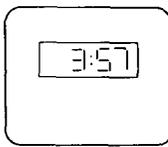

twenty-five to four  
three thirty-five

a quarter to four  
three forty-five

five to four  
three fifty-five

three minutes to four  
three fifty-seven

- 2 In conversation, we do not usually use the 'twenty-four hour clock'. We can make a time more precise by saying *in the morning*, *in the afternoon* etc. or by saying *am* (= 'before midday') and *pm* (= 'after midday').
- 3 We ask about the time like this:  
*What time is it? What's the time?*  
*What time does the match start?*

## 343 tenses in subordinate clauses

- 1 In subordinate clauses (after conjunctions), we often use tenses in a special way. In particular, we use present tenses with a future meaning, and past tenses with a conditional meaning. This happens after *if*; after conjunctions of time like *when*, *until*, *after*, *before*, *as soon as*; after *as*, *than*, *whether*, *where*; after relative pronouns; and in reported speech.

### present for future

*She'll be happy if you **telephone** her.*  
*I'll write to her when I **have** time. (NOT . . . ~~when I will have time.~~)*  
*I'll stay here until the plane **takes off**.*  
*She'll be on the same train as I **am** tomorrow.*  
*We'll get there sooner than you **do**.*  
*I'll ask him whether he **wants** to go.*  
*I'll go where you **go**.*  
*I'll give a pound to anybody who **finds** my pen.*  
*One day the government will really ask people what they **want**.*

### past for conditional

*If I had lots of money, I'd give some to anybody who **asked** for it.*  
 (NOT . . . ~~who would ask for it.~~)  
*Would you follow me wherever I **went**?*  
*In a perfect world, you could say exactly what you **thought**.*

- 2 Sometimes we use a future tense in a subordinate clause. This happens if the main clause is not about the future. Compare:

*I'll tell you when I **arrive**.*  
*I wonder when I'll **arrive**.*  
*I don't know if I'll **be** here tomorrow.*

## 344 that: omission

We can often leave out the conjunction *that*, especially in an informal style.

### 1 Relative pronoun

We can leave out the relative pronoun *that* when it is the object of the relative clause.

*Look! There are the people (**that**) we met in Brighton.*

### 2 Reported speech

We can leave out *that* after more common verbs. Compare:

*James said (**that**) he was feeling better.*  
*James replied **that** he was feeling better.*  
 (NOT ~~James replied he was feeling better.~~)

### 3 After adjectives

We can use *that*-clauses after some adjectives. We can leave out *that* in more common expressions.

*I'm glad (that) you're all right.*  
*It's funny (that) he hasn't written.*

### 4 After *so* and *such*

We sometimes leave out *that* after *so* and *such*.

*I came to see you so (that) you would know the truth.*  
*I was having such a nice time (that) I didn't want to leave.*

## 345 there is

- 1 When we tell people that something exists (or does not exist), we usually begin the sentence with *there is*, *there are* etc, and put the subject after the verb.

***There's a hole in my sock.*** (NOT ~~*A hole is in my sock*~~)

We use this structure with 'indefinite subjects' — for example, nouns with *a/an*, nouns with *some*, *any*, or *no*, nouns with no article, *somebody*, *anything*, *nothing*.

***There's some beer in the fridge.***  
***Are there tigers in South America?***  
***There's somebody at the door.***

- 2 We can use this structure with all simple tenses of *be*.

***There has been nothing in the newspaper about the accident.***  
***There will be snow on high ground.***

*There may be, there might be, there can be* etc are also possible.

***There might be rain later.***    ***There must be some mistake.***

- 3 The infinitive of *there is* (*there to be*) is used after certain verbs and adjectives.

*I don't want **there to be** any trouble.*  
*It's important for **there to be** a meeting soon.*

- 4 We can use *there* to introduce indefinite subjects of present and past progressive verbs.

***There's a man standing in the garden.***  
***There was somebody looking at her.***

- 5 Note the expression *there's no need to*.

***There's no need to worry — everything will be all right.***

## 346 think

- 1 *Think* can mean 'have an opinion'. In this meaning, it is not used in progressive tenses.

**I don't think** much of his latest book.

(NOT ~~**I'm not thinking**~~ much . . .)

Who **do you think** will win the election?

(NOT ~~**Who are you thinking**~~ . . . ?)

- 2 When *think* has other meanings (for example *plan*, or *consider*) progressive tenses are possible.

**I'm thinking** of changing my job.

What **are you thinking** about?

- 3 When *think* is used to introduce a negative idea, we usually construct the sentence *I do not think . . .*, not *I think . . . not . . .* (See 215.7.)

**I don't think** it will rain.

**Mary doesn't think** she can come.

▷ Note also the structures *I think so*, *I don't think so*. (See 311.)

## 347 this and that

- 1 We use *this* to talk about people and things which are close to the speaker, and for situations that we are in at the moment of speaking.

*I don't know what I'm doing in **this** country.*

(NOT . . . in ~~**that**~~ country.)

**This** is very nice — how do you cook it?

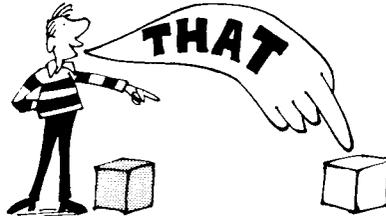

Get **this** cat off my shoulder.

We use *that* to talk about people and things which are more distant, not so close.

*I don't like **that** boy you're going out with.* (NOT . . . ~~**this**~~ boy . . .)

**That** smells nice — is it for lunch?

Get **that** cat off the piano.

- 2 We use *this* to talk about things which are happening or just going to happen (present or future).

*I like **this** music. What is it? Listen to **this**. You'll like it.*

We use *that* to talk about things which have finished.

***That** was nice. What was it? Who said **that**?*

- 3 On the telephone, British people use *this* to talk about themselves, and *that* to talk about the hearer.

*Hello. **This** is Elizabeth. Is **that** Ruth?*

Americans often use *this* in both cases.

- ▷ The difference between *this* and *that* is like the difference between *here* and *there* (see 159). See also *come* and *go* (83) and *bring* and *take* (71).

## 348 too

- 1 We can use an infinitive structure after *too*.

*too + adjective/adverb + infinitive*

*He's **too old to work**.*

*It's **too cold to play** tennis.*

*We arrived **too late to have** dinner.*

We can also use a structure with *for* + object + infinitive.

*too + adjective/adverb + for + object + infinitive*

*It's **too late for the pubs to be** open.*

*The runway's **too short for planes to land**.*

- 2 We can modify *too* with *much*, *a lot*, *far*, *a little*, *a bit* or *rather*.

***much too** old (NOT ~~**very too**~~ old)      **a little too** confident*

***a lot too** big                                      **a bit too** soon*

***far too** young                                    **rather too** often*

- 3 Don't confuse *too* and *too much*. We do not use *too much* before an adjective without a noun, or an adverb.

*You are **too kind** to me. (NOT ... ~~**too much kind**~~ to me-)*

*I arrived **too early**. (NOT ... ~~**too much early**~~-)*

- 4 Don't confuse *too* and *very*. *Too* means 'more than enough', 'more than necessary'. Compare:

*He's a **very** intelligent child.*

*He's **too** intelligent for his class — he's not learning anything.*

*It was **very** cold, but we went out.*

*It was **too** cold to go out, so we stayed at home.*

### 349 travel, journey and trip

*Travel* means 'travelling in general'. It is uncountable (see 92).

*My interests are music and **travel**.*

A *journey* is one 'piece' of travelling.

*Did you have a good **journey**?(NOT ~~Did you have a good **travel**?~~)*

A *trip* is a journey together with the activity which is the reason for the journey.

*I'm going on a **business trip** next week.*

(= *I'm going on a journey and I'm going to do some business.*)

We do not usually use *trip* for journeys which take a very long time.

### 350 unless and if not

Very often, we can use *unless* to mean *if . . . not*.

*Come tomorrow **if** I **don't** phone / **unless** I phone.*

*I'll take the job **if** the pay's **not** too low / **unless** the pay's too low.*

We cannot always use *unless* instead of *if not*. It depends on the sense.

a. The sentence says 'A will happen if B does not stop it.' We can use *if not* or *unless*.

*I'll come back tomorrow **if** there's **not** a plane strike.*

(OR . . . **unless** there's a plane strike.)

*Let's have dinner out — **if** you're **not** too tired.*

(OR . . . **unless** you're too tired.)

b. The sentence says 'A will happen because B does not happen'. We can use *if not*, but not *unless*.

*I'll be glad **if** she **doesn't** come this evening.*

(NOT ~~I'll be glad **unless** she comes this evening.~~)

*She'd be pretty **if** she **didn't** wear so much make-up.*

(NOT . . . **unless** she wore so much make-up.)

### 351 until and by

We use *until* to talk about a situation or state that will continue up to a certain moment.

*Can I stay **until** the weekend?*

We use *by* to talk about an action that will happen on or before a future moment

*You'll have to leave **by** Monday midday at the latest.*

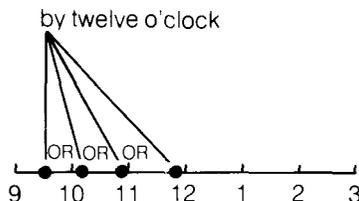

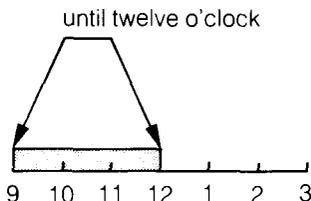

(= *at twelve on Monday or before.*)

Compare:

'Can you repair my watch **by** Tuesday?

(NOT ... **until** Tuesday.)

'No, I'll have to keep it **until** Saturday.'

## 352 until and to

- 1 We usually use *until* (or *till*) to talk about 'time up to'.  
*I waited for her **until** six o'clock, but she didn't come.*  
 (NOT *I waited for her **to** six o'clock ...*)
  - 2 We can use *to* after *from*.  
*I usually work **from** nine **to** five. (OR ... **from** nine **till** five.)*  
 We can also use *to* when we are counting the time until a future event.  
*It's another three weeks **to** the holidays. (OR ... **until** the holidays.)*
  - 3 We do not use *until* for space — only for time.  
*We walked **to** the edge of the forest. (OR ... **as far as** ...)*  
 (NOT *We walked **till** the edge of the forest.*)
  - 4 *Until* and *till* mean the same. They are used in the same way, except that we prefer *until* in more formal situations.
- ▷ For the difference between *until* and *by*, see 351.

## 353 used to + infinitive

- 1 *Used to* + infinitive is only used in the past: it has no present form. We use it to talk about past habits and states which are now finished.  
*I **used to smoke**, but I've stopped.*  
*She **used to be** very shy.*  
 To talk about present habits and states, we usually just use the simple present tense (see 261).  
*He **smokes**. (NOT ~~He uses to smoke.~~)*  
*Her sister **is** still very shy.*

- 2 In a formal style, *used to* can have the forms of a modal auxiliary verb (questions and negatives without *do*).

**Did you use to** play football at school?(informal)

**Used you** to play football at school?(formal)

**I didn't use to** like opera, but now I do. (informal)

**I used not** to like opera, but now I do. (formal)

A contracted negative is possible. (*I **usedn't** to like . . .*)

- 3 We do not use *used to* to say how long something took, or how often it happened.

*I **lived** in Chester for three years.*

(NOT *+ **used to live** in Chester for three years.*-)

*I **went** to France seven times.*

(NOT *+ **used to go** to France seven times.*-)

- 4 Note the pronunciation of *used* /ju:st/ and *use* /ju:s/ in this structure.

- 5 Don't confuse *used to + infinitive* and *be used to . . . -ing*

(see 354). The two structures have quite different meanings.

## 354 (be) used to + noun or . . . -ing

After *be used to*, we use a noun or an *-ing* form.

The meaning is quite different from *used to + infinitive* (see 353).

If you say that you are used to something, you mean that you know it well. You have experienced it so much that it is no longer strange to you

*be used to + noun*

*I'm **used to** London traffic — I've lived here for six years.*

*At the beginning, I couldn't understand the Londoners, because*

*I **wasn't used to** their accent.*

We can use an *-ing* form after *be used to*, but not an infinitive.

*be used to + . . . -ing*

*I'm **used to driving** in London now, but it was hard at the beginning.*

(NOT *I'm **used to drive** . . .*)

*It was a long time before **she was** completely **used to working** with old people.*

*Get used to* means 'become used to'.

*You'll soon **get used to** living in the country.*

- ▷ For more information about structures with *to + . . . -ing*, see 181.

### 355 verbs with object complements

- 1 Some verbs are used with object + adjective  
They usually show how something is changed.

verb + object + adjective

The rain **made** the grass wet.

Let's **paint** the door red.

Try to **get** it clean.

**Cut** the bread thin.

Keep and leave show how things are not changed.

**Keep** him warm.

You **left** the house dirty.

- 2 Other verbs are used with object + noun

verb + object + noun

They **elected** him President.

You have **made** me a very happy man.

Why do you **call** your brother 'Piggy'?

### 356 verbs with two objects

- 1 We use many verbs with two objects — a direct object and an indirect object. Usually the indirect object refers to a person, and comes first.

verb + indirect object + direct object

He gave **his wife a camera** for Christmas.

Can you send **me the bill**?

I'll lend **you some**.

Some common verbs which are used like this:

bring	pay
buy	promise
cost	read
give	refuse
leave	send
lend	show
make	take
offer	tell
owe	write
pass	

- 2 We can also put the indirect object *after* the direct object, with a preposition (usually *to* or *for*).  
We do this when the direct object is much shorter than the indirect object, or when we want to give special importance to the indirect object.

verb + direct object + preposition + indirect object

*I took **it to the policeman**.*

*She sent **some flowers to the nurse** who was looking after her daughter.*

*Mother bought **the ice cream for you**, not for me.*

- 3 When both objects are personal pronouns, we more often put the direct object first.

*Give **it to me**.* (*Give **me it*** is also possible.)

*Send **them to her**.* (*Send **her them*** is also possible.)

- 4 In passive sentences, the subject is usually the person (not the thing which is sent, given etc).

*I've just **been given** a lovely picture.*

***You** were paid three hundred pounds last month.*

But we can make the thing given etc the subject if necessary.

*'What happened to the picture?' **It** was sent to Mr Dunn.'*

- 5 We do not use *explain*, *suggest* or *describe* with the structure

indirect object + direct object

*Can you explain **your decision to us**?*

(NOT *Can you explain **us your decision**?*)

*Can you suggest **a good dentist to me**?*

(NOT *Can you suggest **me** . . . ?*)

*Please describe **your wife to us**.*

(NOT *Please describe **us your wife**.*)

- 6 When *write* has no direct object, we put *to* before the indirect object.  
Compare:

*Write me a letter.*

*Write **to me**.* (*Write me* is not common in British English.)

▷ For structures like *They made him captain*, see 355.2.

## 357 way

- 1 We often use *way* (= *method*) in expressions without a preposition.

*You're doing it (in) **the wrong way**.*

*You put in the cassette **this way**.*

*Do it **any way** you like.*

In relative structures, we often use *the way that* . . .

*I don't like **the way (that)** you're doing it.*

- 2 After *way*, we can use an infinitive structure or *of* . . . *-ing*. There is no important difference between the two structures.

*There's no **way to prove / of proving** that he was stealing.*

- 3 Don't confuse *in the way* and *on the way*.

If something is *in the way*, it stops you getting where you want to go.

*Please don't stand in the kitchen door — you're **in the way**.*

*On the way* means 'during the journey' or 'coming'.

*We'll have lunch **on the way**.*

*Spring is **on the way**.*

▷ For *by the way*, see 97.1.

## 358 weak and strong forms

- 1 Some words in English have two pronunciations: one when they are stressed, and one when they are not. Compare:

*I got up **at** /ət/ six o'clock.*

*What are you looking **at**? /'æt/*

Most of these words are prepositions, pronouns, conjunctions, articles and auxiliary verbs. They are not usually stressed, so the unstressed ('weak') pronunciation is the usual one. This usually has the vowel /ə/ or no vowel. The 'strong' pronunciation has the 'written' vowel. Compare:

*I **was** late. /w(ə)z/*

*It **was** raining. /w(ə)z/*

*Yes, I '**was**. /wɒz/*

*I **must** go now. /m(ə)s/*

*I really '**must** stop smoking. /mʌst/*

*Where **have** you been? /(ə)v/*

*You might **have** told me. /(ə)v/*

*What did you '**have** for breakfast? /hæv/*

(*Have* is not an auxiliary verb in this sentence.)

Contracted negatives always have a strong pronunciation.

*can't /kɑːnt/    mustn't /'mʌsnt/    wasn't /'wɒznt/*

2 The most important words which have weak and strong forms are:

	<b>Weak form</b>	<b>Strong form</b>
a	/ə/	/eɪ/(unusual)
am	/(ə)m/	/æm/
an	/ən/	/æn/ (unusual)
and	/ənd/	/ænd/
are	/ə(r)/	/ɑ:(r)/
as	/əz/	/æz/
at	/ət/	/æt/
be	/bi/	/bi:/
been	/bi:n/	/bi:n/
but	/bət/	/bʌt/

there	/ðə(r)/	/ðeə(r)/
to	/tə/	/tu:/
us	/əs/	/ʌs/
was	/w(ə)z/	/wɒz/
we	/wi/	/wi:/
were	/wə(r)/	/wɜ:(r)/
who	/hu/	/hu:/
would	/wəd; əd/	/wʊd/
will	/w(ə)l/	/wɪl/
you	/ju/	/ju:/
your	/jə(r)/	/jɔ:(r)/

**359 well**

- 1 *Well* is an adverb, with the same kind of meaning as the adjective *good*. Compare:

*It's a **good** car.* (adjective)

*It runs **well**.* (adverb)

*She speaks **good** English.*

*She speaks English **well**.* (NOT ~~*She speaks English **good**.*~~)

Note that we cannot say *She speaks well English*.

(Adverbs cannot go between the verb and the object — see 13.1.)

- 2 *Well* is also an adjective, meaning 'in good health'.

*'How are you?' 'Quite **well**, thanks.'*

*I don't feel very **well**.*

*Well* is not usually used before a noun.

We can say *She's **well***, but not ~~*a **well** girl*~~.

▷ For *ill* and *sick*, see 169.

**360 when and if**

We use *if* to say that we are not sure whether something will happen.

*I'll see you in August, **if** I come to New York.*

(Perhaps I'll come to New York; perhaps I won't.)

We use *when* to say that we are sure that something will happen.

*I'll see you in August, **when** I come to New York.*

(I'm sure I'll come to New York.)

We can use both *if* and *when* to talk about things that always happen.

There is not much difference of meaning.

***If/When** you heat ice, it turns into water.*

**361 whether and if**

- 1 In reported questions (see 284), we can use both *whether* and *if*.

*I'm not sure **whether/if** I'll have time.*

*I asked **whether/if** she had any letters for me.*

We prefer *whether* before *or*, especially in a formal style.

*Let me know **whether** you can come **or** not.*

(... *if* ... is possible in an informal style.)

- 2 After *discuss*, only *whether* is possible.

*We **discussed whether** we should close the shop.*

(NOT ~~*We **discussed if** ...*~~)

## 362 whether ... or ...

We can use *whether ... or ...* as a conjunction, with a similar meaning to *it doesn't matter whether ... or ...*. The clause with *whether ... or ...* can come at the beginning of the sentence or after the other clause.

**Whether you like it or not**, you'll have to pay.  
You'll have to pay, **whether you like it or not**.

## 363 which, what and who: question words

### 1 Determiners

We can use *which* and *what* before nouns to ask questions about people or things.

**Which** teacher do you like best?  
**Which** colour do you want — green, red, yellow or brown?  
**What** writers do you like?  
**What** colour are your girl-friend's eyes?

We usually prefer *which* when we are choosing between a small number, and *what* when we are choosing between a large number. Before another determiner (for example *the, my, these*) or a pronoun, we use *which of*.

**Which of** your teachers do you like best?  
**Which of** them do you want?

### 2 Pronouns

We can use *which, what* and *who* as pronouns, without nouns. We use *who*, not *which*, for people.

**Who** won — Smith or Fitzgibbon?  
**Which** would you prefer — wine or beer?  
**What** would you like to eat?

We usually use *who*, not *whom*, as an object.

**Who** do you like best — your father or your mother?  
(**Whom** do you like best ... ? is very formal.)

▷ For *who* and *which* as relative pronouns, see 277. For relative *what*, see 278.

## 364 who ever, what ever, how ever etc

These express surprise, or difficulty in believing something.

**Who ever** is that girl with the green hair?  
**What ever** are you doing?  
**How ever** did you manage to start the car? I couldn't.  
**When ever** will I have time to write some letters?

**Where ever** have you been?

**Why ever** didn't you tell me you were coming?

▷ For *whoever*, *whatever* etc., see 365.

## 365 **whoever, whatever, whichever, however, whenever and wherever**

These words mean 'it doesn't matter who', 'it doesn't matter what', etc. They are conjunctions: they join clauses together.

*Whoever*, *whatever* and *whichever* are also relative pronouns: they can be the subjects or objects of clauses.

*whoever* etc + clause + clause  
clause + *whoever* etc + clause

**Whoever** telephones, tell them I'm out.

I'm not opening the door, **whoever** you are.

**Whatever** you do, I'll always love you.

Keep calm, **whatever** happens.

'Which is my bed?' 'You can have **whichever** you like.'

**However** much he eats, he never gets fat.

People always want more, **however** rich they are.

**Whenever** I go to London I visit the National Gallery.

You can come **whenever** you like.

**Wherever** you go, you'll find Coca-Cola.

The people were friendly **wherever** we went.

## 366 **will**

### 1 **Forms**

*Will* is a 'modal auxiliary verb' (See 202). It has no -s in the third person singular; questions and negatives are made without *do*; after *will*, we use an infinitive without *to*.

**Will** the train be on time?

Contractions are *'ll*, *won't*.

Do you think it **'ll** rain? It **won't** rain.

### 2 **Future**

We can use *will* as an auxiliary verb when we talk about the future. After *I* and *we*, *will* and *shall* are both possible with the same meaning.

I **will/shall** be happy when this is finished.

What **will** you do when you leave school?

For the different ways of talking about the future, see 134–140.

### 3 Willingness and intentions

We can use *will* (but not *shall*) to say that we are willing to do something, or to offer to do something.

*'Can somebody help me?' 'I will.'*    *'There's the doorbell.' 'I'll go.'*

*Will* can express a firm intention, a promise or a threat.

*I really will stop smoking. I'll kill her for this.*

We can use *won't* to talk about refusal.

*She won't open the door.*

*'Give me a kiss.' 'No, I won't.'*

*The car won't start.*

We can use *wouldn't* for a past refusal.

*The car wouldn't start. She wouldn't open the door.*

### 4 Requests and orders

We use *will you* to tell people what to do.

**Will you** send me the bill, please?    **Will you** come this way?

*Would you* is 'softer', more polite.

**Would you** send me the bill, please?    **Would you** come this way?

*Will you have . . . ?* can be used for offers.

**Will you have** some more potatoes?    **What will you have** to drink?

### 5 Habits and characteristics

We can use *will* to talk about habits and characteristic (typical) behaviour.

*She'll sit talking to herself for hours.*

*Would* is used for the past.

*On Saturdays, when I was a child, we would all get up early and go fishing.*

### 6 *will* and *want*

Don't confuse *will* and *want*. *Will* is 'interpersonal' — we use it when our wishes affect other people: when we promise, offer, request etc. *Want* simply describes our wishes. Compare:

**Will you** open the window? (an order)

*Do you want* to open the window? (a question about somebody's wishes).

*She won't* tell anybody. (= *She refuses to . . .*)

*She doesn't want* to tell anybody. (= *She prefers not to . . .*)

- ▷ For more information about *would*, see 369.  
For information about *shall*, see 292.

## 367 wish

- 1 We can use *wish* + infinitive to mean *want*. *Wish* is more formal.

*I wish to see the manager, please.*

For the differences between *wish*, *want*, *expect*, *hope* and *look forward to*, see 122.

- 2 We can also use *wish* to express regrets — to say that we would like things to be different. We use a past tense with a present meaning in this case.

*I wish + subject + past tense*

*I wish I was better-looking.*

*I wish I spoke French.*

*I wish I had a yacht.*

*I wish it wasn't raining.*

In a formal style, we can use *were* instead of *was* after *I wish*.

*I wish I were better-looking.* (formal)

We can say *I wish . . . would* (but not *I wish . . . will*).

*I wish she would be quiet.*

*I wish something interesting would happen.*

To talk about the past, we use a past perfect tense (*had* + past participle).

*I wish + subject + past perfect*

*I wish I had gone to university.*

*I wish I hadn't said that.*

*If only* is used in the same way. (See 167.) For other structures where we use a past tense with a present or future meaning, see 239.

- 3 We do not use *wish* in progressive tenses.

*I wish I knew why.* (NOT *I am wishing . . .*)

## 368 worth . . . -ing

We can use *worth . . . -ing* in two structures.

*it is (not) worth . . . -ing (+ object)*

*It isn't worth repairing the car.*

*Is it worth visiting Leicester?*

*It's not worth getting angry with her.*

*subject + is (not) worth . . . -ing*

*The car isn't worth repairing.*

*Is Leicester worth visiting?*

*She's not worth getting angry with.*

## 369 would

### 1 Forms

*Would* is a 'modal auxiliary verb' (see 202). There is no **-s** in the third person singular; questions and negatives are made **without do**; after *would*, we use the infinitive without *to*.

### 2 Meaning

We use *would* as a past form of *will*, or as a less definite, 'softer' form of *will*. Compare:

*I'll be here at ten tomorrow.*

*I said I **would** be there at ten the next day.*

*She **will** talk to herself for hours.* (present habit)

*She **would** talk to herself for hours.* (past habit)

*He **won't** do his homework.* (present refusal)

*He **wouldn't** do his homework.* (past refusal)

***Will** you open the window, please?* (firm request)

***Would** you open the window, please?* ('softer' request)

*Would* is the auxiliary verb for the 'conditional' of other verbs (see 88).

*I **would** tell you if I knew.*

- ▷ For the difference between *would* and *should*, see 296.  
For more information about *will*, see 366.

## 370 would rather

- 1 *Would rather* means 'would prefer to'. It is followed by the infinitive without *to*. We often use the contraction *'d rather*: this means 'would rather', not 'had rather'.

*would rather + infinitive without to*

***Would you rather** stay here or go home?*

*'How about a drink?' **'I'd rather** have something to eat.'*

- 2 We can use *would rather* to say that one person would prefer another person to do something. We use a special structure with a past tense.

*would rather + subject + past tense*

***I'd rather** you **went** home now.*

*Tomorrow's difficult. **I'd rather** you **came** next weekend.*

*My wife **would rather** we **didn't** see each other any more.*

*'Shall I open a window?' **'I'd rather** you **didn't**.'*

- ▷ For other structures where a past tense has a present or future meaning, see 239.  
For another way of using *rather*, see 124.

## Basic English Usage

For students of English at a lower intermediate level and upwards, this reference guide will serve as a comprehensive and reliable study companion. Its 370 short articles clearly explain those points of English grammar and vocabulary that most frequently cause difficulty.

- simple explanations
- numerous examples of acceptable usage and common mistakes
- descriptions of formal and informal language
- contrasts between British and American English
- glossary of technical terms
- complete list of entries
- full index
- clear two-colour design

**Basic English Usage** is a shortened and simplified version of Michael Swan's popular and authoritative **Practical English Usage**.
